

CONTENTS

Volume 254, No. 1, 1988

REVIEW ARTICLE

- Physiological roles of nicotinamide nucleotide transhydrogenase J. B. HOEK & J. RYDSTRÖM 1-10

FULL AND RAPID PAPERS

Proteins

- The acylation of proteins by xenobiotic amphipathic carboxylic acids in cultured rat hepatocytes R. HERTZ & J. BAR-TANA 39-44
- Analysis of the multiple forms of Gaucher spleen sphingolipid activator 2 B. C. PATON & A. POULOS 77-84
- Chemical-modification studies of a unique sialic acid-binding lectin from the snail *Achatina fulica*. Involvement of tryptophan and histidine residues in biological activity S. BASU, C. MANDAL & A. K. ALLEN 195-202
- Study of the phosphorylatable light chains of skeletal and gizzard myosins by nuclear magnetic resonance spectroscopy B. A. LEVINE, H. S. GRIFFITHS, V. B. PATCHELL & S. V. PERRY 277-286
- Characterization of antibodies to chicken riboflavin carrier protein. Immunoneutralizing ability of antibodies to a sequence-specific region of the protein U. NATRAJ, S. GEORGE & M. S. KADAM 287-292

Enzymes

- The effect of glycerol on the activity of β -glucosidase from *Botryodiplodia theobromae* Pat. G. M. UMEZURIKE 73-76
- Reversible dissociation of the catalytically active subunits of pigeon liver malic enzyme G.-G. CHANG, T.-M. HUANG & T.-C. CHANG 123-130
- Endogenous calcium in sickle cells does not activate polyphosphoinositide phospholipase C M.-D. RHODA, J.-C. Sulpice, P. GASCARD, F. GALACTEROS & F. GIRAUD 161-169
- Modification of the tandem reactive centres of human inter- α -trypsin inhibitor with butanedione and *cis*-dichlorodiammineplatinum(II) M. W. SWAIM & S. V. PIZZO 171-178
- NADP-linked malic enzyme. Purification from maize leaves, M_r and subunit composition M. S. THORNILEY & K. DALZIEL 229-233
- The electrostatic fields in the active-site clefts of actinidin and papain R. W. PICKERSGILL, P. W. GOODENOUGH, I. G. SUMNER & M. E. COLLINS 235-238
- The human glutathione *S*-transferases. Immunohistochemical studies of the developmental expression of Alpha- and Pi-class isoenzymes in liver C. HILEY, A. FRYER, J. BELL, R. HUME & R. C. STRANGE 255-259
- Multiple cysteine proteinase forms during the life cycle of *Dictyostelium discoideum* revealed by electrophoretic analysis M. J. NORTH, K. I. SCOTT & B. C. LOCKWOOD 261-268
- A bacterial factor induces changes in cysteine proteinase forms in the cellular slime mould *Dictyostelium discoideum* M. J. NORTH 269-275
- The inhibition of glucosylceramide β -glucosidase and other acid hydrolases by nucleic acids A. SANO & N. S. RADIN 297-300

Carbohydrates

- Immunochemical characterization of mucins. Polypeptide (M1) and polysaccharide (A and Le^b) antigens J. BARA, R. GAUTIER, J. LE PENDU & R. ORIOL 185-193

Lipids

- Species pattern of phosphatidylinositol from lung surfactant and a comparison of the species pattern of phosphatidylinositol and phosphatidylglycerol synthesized *de novo* in lung microsomal fractions B. RÜSTOW, Y. NAKAGAWA, H. RABE, K. WAKU & D. KUNZE 67-71
- Isolation of a high-density-lipoprotein conversion factor from human plasma. A possible role of apolipoprotein A-IV as its activator P. J. BARTER, O. V. RAJARAM, L. B. F. CHANG, K. A. RYE, P. GAMBERT, L. LAGROST, C. EHNHOLM & N. H. FIDGE 179-184
- The iron chelators desferrioxamine and 1-alkyl-2-methyl-3-hydroxypyrid-4-ones inhibit vascular prostacyclin synthesis *in vitro* J. Y. JEREMY, G. J. KONTOGHIORGHES, A. V. HOFFBRAND & P. DANDONA 239-244
- Use of 3-aminopropanol as an ethanolamine analogue in the study of phospholipid metabolism in *Tetrahymena* J. D. SMITH & L. J. BARROWS 301-302

CONTENTS (continued)

Fluazifop, a grass-selective herbicide which inhibits acetyl-CoA carboxylase in sensitive plant species	K. A. WALKER, S. M. RIDLEY, T. LEWIS & J. L. HARWOOD	307-310
Gene structure and expression		
Translation of globin RNA spliced <i>in vitro</i>	A. K. ABRAHAM, G. BURNS & M. SIMSEK	21-26
Structure and expression of the guinea-pig α -lactalbumin gene	J. E. LAIRD, L. JACK, L. HALL, A. P. BOULTON, D. PARKER & R. K. CRAIG	85-94
DNA sequence of a gene cluster coding for subunits of the F ₀ membrane sector of ATP synthase in <i>Rhodospirillum rubrum</i> . Support for modular evolution of the F ₁ and F ₀ sectors	G. FALK & J. E. WALKER	109-122
Synthesis and degradation of macromolecules		
Immunochemical characterization and biosynthesis of pI-6.4 esterase, a carboxylesterase of rat liver microsomal extracts	M. ROBBI & H. BEAUFAY	51-57
Tyrosine sulphation is not required for microvillar expression of intestinal aminopeptidase N	E. M. DANIELSEN	219-222
Intermediary metabolism and metabolic control		
Regulation by insulin of glucose metabolism in mammary gland of anaesthetized lactating rats. Stimulation of phosphofructokinase-1 by fructose 2,6-bisphosphate and activation of acetyl-CoA carboxylase	A.-F. BURNOL, S. EBNER, P. FERRÉ & J. GIRARD	11-14
Effect of inhibitors of <i>S</i> -adenosylmethionine decarboxylase on the contents of ornithine decarboxylase and <i>S</i> -adenosylmethionine decarboxylase in L1210 cells	R. MADHUBALA, J. A. SECRIST, III & A. E. PEGG	45-50
Acute inhibition by ethanol of intestinal absorption of glucose and hepatic synthesis on glucose refeeding after starvation in the rat	E. B. COOK, J. A. PREECE, S. D. M. TOBIN, M. C. SUGDEN, D. J. COX & T. N. PALMER	59-65
Uptake and metabolism of <i>myo</i> -inositol by L1210 leukaemia cells	J. D. MOYER, N. MALINOWSKI, E. A. NAPIER & J. STRONG	95-100
The role of the <i>Ah</i> locus in hexachlorobenzene-induced porphyria. Studies in congenic C57BL/6J mice	M. E. HAHN, T. A. GASIEWICZ, P. LINKO & J. A. GOLDSTEIN	245-254
Bioenergetics and transport		
Uptake of choline by rat mammary-gland epithelial cells	C.-K. CHAO, E. A. POMFRET & S. H. ZEISEL	33-38
Cytochrome <i>b</i> -562 from <i>Acinetobacter calcoaceticus</i> L.M.D. 79.41. Its characteristics and role as electron acceptor for quinoprotein glucose dehydrogenase	P. DOKTER, J. E. VAN WIELINK, M. A. G. VAN KLEEF & J. A. DUINE	131-138
The effect of non-esterified fatty acids on the proton-pumping cytochrome <i>c</i> oxidase reconstituted into liposomes	N. LABONIA, M. MÜLLER & A. AZZI	139-145
The plasma-membrane component is the primary site of action of alloxan on ATP-driven Ca ²⁺ transport in vascular-muscle microsomal fractions	C.-Y. KWAN	293-296
Analysis of NADH dehydrogenases from plant [mung bean (<i>Phaseolus aureus</i>)] mitochondrial membranes on non-denaturing polyacrylamide gels and purification of Complex I by band excision	I. R. COTTINGHAM & A. L. MOORE	303-305
Membranes and receptors		
Differential effects of fluoride on adenylate cyclase activity and guanine nucleotide regulation of agonist high-affinity receptor binding	J. M. STADEL & S. T. CROOKE	15-20
Guanine nucleotide-independent inhibition of adenylate cyclase by a stimulatory hormone	C. GREINER & K. H. JAKOBS	27-31
Liposomes as carriers of poorly water-soluble substrates: linear modelling of membrane systems with catalytic or binding sites of different facedness. Significance of experimental membrane partition coefficients and of kinetic and equilibrium parameters	K. P. M. HEIRWEGH, J. A. T. P. MEUWISSEN, M. VERMEIR & H. DE SMEDT	101-108
Alcohol-induced stimulation of phospholipase C in human platelets requires G-protein activation	R. RUBIN & J. B. HOEK	147-153
Effect of surface curvature on the rate of cholesterol transfer between lipid vesicles	P. D. THOMAS & M. J. POZNANSKY	155-160

CONTENTS (continued)

Aberrant regulation of the metabolism of the insulin receptor in Swarm rat chondrosarcoma chondrocytes	K. OTSU, E. S. GEARY & R. L. STEVENS	203-209
Transmembrane signalling at epidermal growth factor receptors overexpressed in NIH 3T3 cells. Phosphoinositide hydrolysis, cytosolic Ca ²⁺ increase and alkalization correlate with epidermal-growth-factor-induced cell proliferation	A. PANDIELLA, L. BEGUINOT, T. J. VELU & J. MELDOLESI	223-228
Cell structure and function		
Glucose-, calcium- and concentration-dependence of acetylcholine stimulation of insulin release and ionic fluxes in mouse islets	M.-C. GARCIA, M. P. HERMANS & J.-C. HENQUIN	211-218
BJ LETTERS		
A re-evaluation of the kinetic equations for hyperbolic tight-binding inhibition	S. E. SZEDLACSEK, V. OSTAFE, M. SERBAN & M. O. VLAD	311-312
