REVIEW ARTICLE

The anomalous kinetics of sulphatase A

A. B. ROY & T. J. MANTLE 689-697

FULL AND RAPID PAPERS

Proteins

Isolation of the *N*-terminal globular protein domains from cartilage proteoglycans. Identification of G2 domain and its lack of interaction with hyaluronate and link protein

A. J. FOSANG & T. E. HARDINGHAM 801-809

Identification of glycation at the *N*-terminus of albumin by gas chromatography-mass spectrometry

D. A. ROBB, O. S. OLUFEMI, 871-878

D. A. WILLIAMS & J. M. MIDGLEY

The amino acid sequence of component 7c, a type II intermediate-filament protein from wool

L. G. SPARROW, C. P. ROBINSON, 1015-1022

D. T. W. MCMAHON & M. R. RUBIRA

X-ray-scattering of turkey skeletal-muscle troponin C in solution at low pH

E. J. WACHTEL, T. SVERBILOVA, 1043-1046

W. D. MCCUBBIN & C. M. KAY

Enzymes

Effect of propan-2-ol on enzymic and structural properties of elongation factor G

M. MASULLO, G. PARLATO, 725-731

E. DE VENDITTIS & V. BOCCHINI

The low C5 convertase activity of the C4A6 allotype of human complement component C4

T. KINOSHITA, A. W. DODDS, S. K. A. LAW 743-748

& K. INOUE

Purification and properties of 2-aminoadipate:2-oxoglutarate aminotransferase from bovine kidney

D. R. DESHMUKH & S. M. MUNGRE 761-768

High activity of cytochrome *P*-450-linked aminopyrine *N*-demethylase in mouse brain microsomes, and associated sex-related difference

V. RAVINDRANATH & 769-773

H. K. ANANDA THEERTHA VARADA

Cumene hydroperoxide-dependent oxidation of *NNN'*-tetramethyl-*p*-phenylenediamine and 7-ethoxycoumarin by cytochrome *P*-450. Comparison between the haemoproteins from liver and olfactory tissue

C. J. REED & F. DE MATTEIS 793-800

Ectoenzymes of the kidney microvillar membrane. Isolation and characterization of the amphipathic form of renal dipeptidase and hydrolysis of its glycosyl-phosphatidylinositol anchor by an activity in plasma

N. M. HOOPER & A. J. TURNER 811-818

Fungal cellulase systems. Comparison of the specificities of the cellobiohydrolases isolated from *Penicillium pinophilum* and *Trichoderma reesei*

M. CLAEYSSENS, H. VAN TILBEURGH, 819-825

P. TOMME, T. M. WOOD & S. I. MCRAE

Purification and catalytic properties of L-valine dehydrogenase from *Streptomyces cinnamonensis*

N. D. PRIESTLEY & J. A. ROBINSON 853-861

The effects of phospholipids on the activation of glutamate dehydrogenase by L-leucine

I. COUÉE & K. F. TIPTON 921-925

Human glutamic- γ -semialdehyde dehydrogenase. Kinetic mechanism. Endopeptidase 24.15 from rat testes. Isolation of the enzyme and its specificity toward synthetic and natural peptides, including enkephalin-containing peptides

C. FORTE-MCROBBIE & R. PIETRUSZKO 935-943

M. ORLOWSKI, S. REZNIK, J. AYALA & 951-958

A. R. PIEROTTI

Purification and characterization of glucose dehydrogenase from the thermoacidophilic archaebacterium *Thermoplasma acidophilum*

L. D. SMITH, N. BUDGEN, S. J. BUNGARD, 973-977

M. J. DANSON & D. W. HOUGH

Further kinetic and molecular characterization of an extremely heat-stable carboxylesterase from the thermoacidophilic archaebacterium *Sulfolobus acidocaldarius*

H. SOBEK & H. GÖRISCH 993-998

Mouse hepatic glutathione transferase isoenzymes and their differential induction by anticarcinogens. Specificities of butylated hydroxyanisole and bisethylxanthogen as inducers of glutathione transferases in male and female CD-1 mice

A. M. BENSON, M. J. HUNKELER & 1023-1029

J. L. YORK

Dissociation of tissue inhibitor of metalloproteinases (TIMP) from enzyme complexes yields fully active inhibitor

G. MURPHY, P. KOKLITIS & A. F. CARNE 1031-1034

Calpain I activation is not correlated with aggregation in human platelets

J. S. ELCE, L. SIGMUND & M. J. FOX 1039-1042

CONTENTS (continued)

The activities of 'Pz-peptidase' and 'endopeptidase 24.15' are due to a single enzyme	A. J. BARRETT & U. TISLJAR	1047-1050
Carbohydrates		
Infrared spectroscopy of chemically modified heparins	D. GRANT, W. F. LONG, C. F. MOFFAT & F. B. WILLIAMSON	1035-1038
Gene structure and expression		
δ -Elimination in the repair of AP (apurinic/aprimidinic) sites in DNA	V. BAILLY, M. DERYDT & W. G. VERLY	707-713
The sequence of the mouse 14 kDa β -galactoside-binding lectin and evidence for its synthesis on free cytoplasmic ribosomes	T. J. G. WILSON, M. N. FIRTH, J. T. POWELL & F. L. HARRISON	847-852
Synthesis and degradation of macromolecules		
The action of the β -agonist clenbuterol on protein metabolism in innervated and denervated phasic muscles	C. A. MALTIN, S. M. HAY, M. I. DELDAY, G. E. LOBLEY & P. J. REED	965-971
Biosynthesis of heparin. Relationship between the polymerization and sulphation processes	K. LIDHOLT, L. KJELLÉN & U. LINDAHL	999-1007
Intermediary metabolism and metabolic control		
The rate of the AMP/adenosine substrate cycle in concanavalin-A-stimulated rat lymphocytes	Z. SZONDY & E. A. NEWSHOLME	739-742
Stimulation of calcium-ATPase activity by 3,5,3'-tri-iodothyronine in rat thymocyte plasma membranes. A possible role in the modulation of cellular calcium concentration	J. SEGAL, J. HARDIMAN & S. H. INGBAR	749-754
Oxytocin inactivates and phosphorylates rat hepatocyte glycogen synthase	J. ARIÑO, F. BOSCH, A. M. GÓMEZ-FOIX & J. J. GUINOVART	827-830
Insulin-like effects of epidermal growth factor and insulin-like growth factor-I on [3 H]2-deoxyglucose uptake, diacylglycerol generation and protein kinase C activation in BC3H-1 myocytes	R. V. FARESE, G. P. NAIR, C. G. SIERRA, M. L. STANDAERT, R. J. POLLET & D. R. COOPER	927-934
Rapid stimulation of hepatic oxygen consumption by 3,5-di-iodo-L-thyronine	C. HORST, H. ROKOS & H. J. SEITZ	945-950
The effect of glutamine concentration on the activity of carbamoyl-phosphate synthase II and on the incorporation of [3 H]thymidine into DNA in rat mesenteric lymphocytes stimulated by phytohaemagglutinin	Z. SZONDY & E. A. NEWSHOLME	979-983
Hormone and substrate regulation of glycogen accumulation in primary cultures of rat hepatocytes	A. I. SALHANICK, C. L. CHANG & J. M. AMATRUDA	985-992
Phosphorylation of complement factor C3 <i>in vivo</i>	S. C. MARTIN	1051-1054
Bioenergetics and transport		
Stopped-flow kinetics of oxygen uptake and release by embryonic red blood cells	T. BRITTAİN & R. SIMPSON	1009-1013
Polyamines and neomycin inhibit the purified plasma-membrane Ca^{2+} pump by interacting with associated polyphosphoinositides	L. MISSIAEN, F. WUYTACK, L. RAEYMAEKERS, H. DE SMEDT & R. CASTEELS	1055-1058
Membranes and receptors		
Further evidence for a two-step model of glucose-transport regulation. Inositol phosphate-oligosaccharides regulate glucose-carrier activity	B. OBERMAIER-KUSSER, C. MÜHLBACHER, J. MUSHACK, E. SEFFER, B. ERMEL, F. MACHICAO, F. SCHMIDT & H.-U. HÄRING	699-705
The novel thermogenic β -adrenergic agonist Ro 16-8714 increases the interscapular brown-fat β -receptor-adenylate cyclase and the uncoupling-protein mRNA level in obese (<i>fa/fa</i>) Zucker rats	P. MUZZIN, J.-P. REVELLI, D. RICQUIER, M. K. MEIER, F. ASSIMACOPOULOS-JEANNET & J.-P. GIACOBINO	721-724
Identification of specific polypeptides of the nuclear envelope by iodination of mouse liver nuclei	S. PANDEY & V. K. PARNAIK	733-738
Activation of electroporabilized neutrophils by adenosine 5'-[γ -thio]triphosphate (ATP[S]). Role of phosphatases in stimulus-response coupling	S. GRINSTEIN, M. HILL & W. FURUYA	755-759

CONTENTS (continued)

The effect of iloprost on the ADP-ribosylation of $G_s\alpha$ (the α -subunit of G_s)	L. MOLINA Y VEDIA, R. D. NOLAN & E. G. LAPETINA	841-845
Antibodies to junctional sarcoplasmic reticulum proteins: probes for the Ca^{2+} -release channel	F. ZORZATO, A. CHU & P. VOLPE	863-870
Transforming growth factor $\beta 1$ treatment of AKR-2B cells is coupled through a pertussis-toxin-sensitive G-protein(s)	P. H. HOWE & E. B. LEOF	879-886
Insulin stimulates the tyrosyl phosphorylation and activation of the 52 kDa peripheral plasma-membrane cyclic AMP phosphodiesterase in intact hepatocytes	N. J. PYNE, W. CUSHLEY, H. G. NIMMO & M. D. HOUSLAY	897-904
Distribution of G-proteins in rat liver plasma-membrane domains and endocytic pathways	N. ALI, G. MILLIGAN & W. H. EVANS	905-912
The phorbol ester TPA stimulates the expression of functional β -adrenoceptors in human T lymphoblasts Molt 3	P. ROBBERECHT, P. DE NEEF, L. BUSCAIL & J. CHRISTOPHE	959-963
Cell structure and function		
Characterization of poly(ADP-ribosyl)ated domains of rat pachytene chromatin	K. SATYANARAYANA & M. R. S. RAO	775-786
Low- M_r iron isolated from guinea pig reticulocytes as AMP-Fe and ATP-Fe complex	J. WEAVER & S. POLLACK	787-792
Oral mucosal pellicle. Adsorption and transpeptidation of salivary components to buccal epithelial cells	S. D. BRADWAY, E. J. BERGEY, P. C. JONES & M. J. LEVINE	887-896
Methods		
The kinetics of adsorption of human immunoglobulin G to poly(vinyl chloride) enzyme-linked-immunoadsorbent-assay vessels walls	P. B. MCGINLAY & W. G. BARDSLEY	715-720
The spin trapping of pyrimidine nucleotide free radicals in a Fenton system	W. D. FLITTER & R. P. MASON	831-839
Semi-synthetic aequorins with improved sensitivity to Ca^{2+} ions	O. SHIMOMURA, B. MUSICKI & Y. KISHI	913-920
BJ LETTERS		
Inhibition of inositol 1,4,5-trisphosphate 3-kinase by heparin: basal and Ca^{2+} /calmodulin-stimulated activity	K. TAKAZAWA & C. ERNEUX	1059
Some comments on the type references of the official nomenclature (IUB) for β - <i>N</i> -acetylglucosaminidase, β - <i>N</i> -acetylhexosaminidase and β - <i>N</i> -acetylgalactosaminidase	J. A. CABEZAS	1059-1060
Correction: skeletal muscle glycerate 1,3-bisphosphate changes	A. KATZ	1061
