LEIFO
PHOTOMETER

A NEW INSTRUMENT FOR DETERMINING CONCENTRATIONS, FOR pH AND GLOSS MEASUREMENTS, FOR ASCERTAINING THE ABSORPTION AND DENSITY OF SOLIDS OR LIQUIDS, OF PHOTOGRAPHIC PLATES AND FILMS, FOR TURBIDITY DETERMINATIONS AND COLOUR MEASUREMENTS ON TRANSPARENT AND OPAQUE SOLIDS AND LIQUIDS AFTER THE ADDITIVE COLOUR MIXING METHOD, FOR MEASURING ALBEDO OF PAPERS AND POWDERS.

Principal Features
The instrument is a polarizing photometer. Lamp does not require special adjustment. Only one beaker required to hold the liquid, and depth variable by means of a plunger. Macro (up to 60 mm. depth) and micro analysis. Special micro chamber for depths from 0—3mm. with reading accuracy 0·01 mm. for solutions with extremely high extinction coefficient. No end-point solutions required for pH determinations. Great sensitivity for measuring smallest amounts of turbidity.

The Experimental
Analysis of
Development

By BERNHARD DÜRKEN 14s.
Illustrated

“All who are interested in fundamental
biological problems, or are concerned
with their bearing on related questions,
should consider the authoritative work
of Bernhard Dürken.”
Lancet

“Biological, physiological, and medical
students in their first or second years
will find it invaluable....Specialists in
those and other branches of biology will
also welcome it.” Spectator

NUTRITION ABSTRACTS & REVIEWS
ISSUED UNDER THE DIRECTION OF
THE IMPERIAL AGRICULTURAL BUREAUX COUNCIL, THE MEDICAL
RESEARCH COUNCIL AND THE REID LIBRARY

Editors:
JOHN BOYD ORR
Imperial Bureau of Animal Nutrition,
Aberdeen

J. J. R. MACLEOD
University of Aberdeen

HARRIETTE CHICK
Lister Institute, London

The Editors, in co-operation with Corresponding Editors abroad scrutinize upwards of
400 periodicals and, with the assistance of a competent panel of abstractors issue abstracts
of papers published throughout the world dealing with the subject of Nutrition in all its
aspects.

The abstracts are conveniently arranged in three main sections: (1) Chemistry and
Physiology of Nutrition, (2) Human Diet in Relation to Health and Disease, and
(3) Feeding of Domestic Animals. These sections are designed to meet the requirements
respectively of the research worker, the medical practitioner and dietician and the practical
farmer.

Four numbers appearing in July, October, January and April of each year constitute a
Volume, the subscription price for which is 21/- . The current volume is Volume III.

Subscriptions may be paid through any bookseller or direct to

ii
Organic and Biochemistry
By Professor R. H. A. PLIMMER, D.Sc.
FIFTH EDITION, THOROUGHLY REVISED
of the author's Practical Organic and Biochemistry
21s. net

"The book ... has won an enviable reputation both as a text-book for the student
and as a book of reference for the man in active professional practice ... is brought
up to date and references are made to original papers published up to the time of
the book going to press. A very good feature of the book is the wealth of detail
given to practical sections."

CRYSTALLINE VITAMIN C

(Ascorbic Acid B.D.H.)

Enquiries are invited for Vitamin C, the antiscorbutic vitamin, in crystal-
line form. This vitamin in a state of chemical purity is prepared from
natural sources in the laboratories of The British Drug Houses after
the method of Szent-Györgyi, and
supplies are now freely available for
research purposes or clinical use.

Price £2 per gramme

APPOINTMENTS REGISTER

A REGISTER OF CHEMISTS WHO ARE AVAILABLE FOR APPOINTMENTS, or who are
seeking to improve their positions, is kept at the office of the Institute. The facilities afforded
by this Register are available (free) to Companies and Firms requiring the services of Chemists,
and to Universities, Colleges and Technical Schools requiring Teachers of Chemistry and Technology.
A List of Laboratory Assistants is also available.

Particulars of the Regulations and Examinations of the Institute can be obtained, free, on application
to the Registrar.

THE STANDARD RAT

The London Strain of Wistar Albino rat (*Mus norvegicus albinus*) is now available in four different classes

**CLASS A (Genealogical).** For breeding. Supplied in pairs (adult) or litter groups (immature), one male and three to five females.

**CLASS B (Nutritional).** Supplied in litter groups (immature). Especially suitable for work on the B vitamin, the anaemias, etc.

**CLASS C (Physiological).** Adult animals of slightly retarded growth but otherwise fully normal. Suitable for physiological and pathological work, cancer research, etc. Unsuitable for breeding or nutritional work.

**CLASS X (Special Nutritional).** Supplied in litter groups (immature). With extremely low reserves of fat-soluble vitamins. Especially reared for work on vitamins A, D and E.
