CONTENTS (continued)

Gene structure and expression

Conformational differences between surface-bound and fluid-phase complement-component-C3 fragments. Epitope mapping by cDNA expression

Effect of polyamine depletion on chromatin structure in U-87 MG human brain tumour cells

Evidence for two cDNA clones encoding human GM2-activator protein

Regulation of metabolism

Zone-specific inducibility of cytochrome *P450 2B1/2* is retained in isolated perivenous hepatocytes

Molybdate and tungstate act like vanadate on glucose metabolism in isolated hepatocytes

Comparison of the effects of insulin and adrenergic agonists on the phosphorylation of an acid-soluble 22 kDa protein in rat epididymal fat-pads and isolated fat-cells

Mechanisms of fructose-induced hypertriglyceridaemia in the rat. Activation of hepatic pyruvate dehydrogenase through inhibition of pyruvate dehydrogenase kinase

Effect of diabetes and fasting on GLUT-4 (muscle/fat) glucose-transporter expression in insulin-sensitive tissues. Heterogeneous response in heart, red and white muscle

The role of cell swelling in the stimulation of glycogen synthesis by insulin

Regulation of glycogen synthesis and glycolysis by insulin, pH and cell volume. Interactions between swelling and alkalization in mediating the effects of insulin

Proteinase treatment of intact hepatic mitochondria has differential effects on inhibition of carnitine palmitoyltransferase by different inhibitors

Determination of Flux Control Coefficients from transient metabolite concentrations

Membranes and bioenergetics

Nitrate transport in the cyanobacterium *Anacystis nidulans* R2. Kinetic and energetic aspects

Receptors and signal transduction

The effect of protein kinase C activation on muscarinic-M₃- and K⁺-evoked release of [³H]noradrenaline and increases in intracellular Ca²⁺ in human neuroblastoma SH-SY5Y cells

Aldosterone antagonists destabilize the mineralocorticosteroid receptor

Calcium-sensitivity of inositol 1,4,5-trisphosphate metabolism in exocrine cells from the avian salt gland

Interleukin-2-dependent phosphorylation of the retinoblastoma-susceptibility-gene product p110-115RB in human T-cells

Multiphasic generation of diacylglycerol in thrombin-activated human platelets

Cyclic AMP stimulates the synthesis and function of the low-density lipoprotein receptor in human vascular smooth-muscle cells and fibroblasts

Adenosine stimulates Ca²⁺ fluxes and increases cytosolic free Ca²⁺ in cultured rat mesangial cells

Phosphorylation of elongation factor 2 during Ca²⁺-mediated secretion from rat parotid acini

Cell biology and development

Proteoglycan synthesis in human erythroleukaemia (HEL) cells

Mechanisms of caeruloplasmin biosynthesis in normal and copper-deficient rats
