

# 26 Essays in BIOCHEMISTRY Volume 26

Edited by **K. F. Tipton**

ISBN 1 85578 007 0 PRICE : £12.50/US\$25.00

**Essays in Biochemistry** is one of the most popular series of books created by the Biochemical Society. First started in 1965, and until recently published by Academic Press, the Society has now entrusted its publication to Portland Press. The series has undergone extensive revision to restore its relevance for its primary audience - advanced undergraduates, graduate students and their teachers.

**Essays in Biochemistry** will be published annually at the start of each academic year. Each volume will cover exciting and rapidly developing areas of biochemistry and molecular and cellular biology of particular interest to students and their teachers. Carefully selected bibliographies provide a lead in to the primary literature, helping readers pursue topics in greater depth.

## Contents

The biochemistry of memory **Steven P. R. Rose**

Tubulin and microtubules **Edward H. Byard and Bodo M.H. Lange**

Plant signal perception and transduction: the role of the phosphoinositide system **Bjørn K. Drøbak**

Artificial cell adhesive proteins **Kiyotoshi Sekiguchi, Toshinaga Maeda and Koiti Titani**

The urea cycle: a two compartment system **Malcolm Watford**

Antibody engineering: an overview **Richard O'Kennedy and Paul Roben**

Ecstasy: towards an understanding of the biochemical basis of the actions of MDMA **Marcus Rattray**

Structure and function of ribonuclease A binding subsites **Xavier Parés, M. Victòria Nogués, Rafael de Llorens and Claudi M. Cuchillo**

Metabolic studies using  $^{13}\text{C}$  nuclear magnetic resonance spectroscopy  
**Ronnitte Badar-Goffer and Herman Bachelard**

# Two review compendia from Portland Press

## **Biochemical Journal Reviews 1990** edited by P.J. England and W.H. Evans

Review articles which were published in **The Biochemical Journal** in 1990 are now available in this invaluable compilation. They provide an important source of teaching material and give research workers an overview of areas outside their own particular speciality. **Biochemical Journal Reviews 1990** gives new insights on the wide range of topics now subject to biochemical investigation.

Topics reviewed include: the glyoxalase system, histone acetylation, DNA methylation, eukaryotic transcription factors, Interleukin-6, transferrin and cellular iron uptake, the prolamin storage proteins of cereal seeds, the molecular design of receptor-selective peptides, protein folding, human IgA, hepatic very-low-density lipoprotein, prion liposomes, transmembrane signalling, nitrogen metabolism in liver, phosphatidylcholine hydrolysis and drug resistance.

*Paperback, ISBN 1 8 5578 00 62, 238 pages, price £9.50/US\$20.00*

## The Journal of Biological Chemistry

1990 MINIREVIEW COMPENDIUM

Published by the American Society for Biochemistry and Molecular Biology

## **The Journal of Biological Chemistry 1990 Minireview Compendium**

**The Journal of Biological Chemistry** is one of the world's leading journals of biological chemistry; it publishes over 1000 research articles each year. It also publishes review articles on selected topics of scientific importance. This is the annual compendium of reviews published during 1990. The 36 reviews published in 1990 covered a wide range of topics and will supply invaluable material for lecturers and students.

Topics reviewed include: protein kinase regulation; glycogen phosphorylase; ribonuclease P; islet amyloid polypeptide; ribonucleotide reductases; telomeres; epidermal growth factor; sliding filaments and molecular motile systems; calcium oscillations; the genes of hepatic glucose metabolism; the protonmotive Q cycle; heat shock proteins; molecular-scanning methods of mutation detection; structure of transglutaminases; regulation of cell cycle-dependent gene expression in yeast; protein-protein recognition sites; enzyme-inhibition by fluoro compounds.

*Published by the American Society for Biochemistry and Molecular Biology. Paperback, ISBN 0 9621 688 2 3, 144 pages, price £5.00/US\$10.00*

# Nutrient Regulation of Insulin Secretion

edited by **P. R. Flatt**

ISBN 1 85578 004 6

The mechanism of insulin release in response to the body's intake of nutrients is a problem at the centre of research into diabetes. **Nutrient Regulation of Insulin Secretion** is a comprehensive review of the mechanisms by which nutrients, such as glucose, and neurohormonal stimuli generated by feeding, control pancreatic B-cell function in health and disease.

## Contents

Insulin secretion and the entero-insular axis **L.M. Morgan**

Role of classical and peptidergic neurotransmitters in insulin secretion **J.J. Holst**

Intra-islet interactions **V. Marks, E. Samols and J. Stagner**

Biosynthesis of insulin secretory granule proteins **P.C. Guest and J.C. Hutton**

Regulation of insulin secretion by nutrients: the fuel concept **W.J. Malaisse**

Glucokinase: signal recognition enzyme for glucose-induced insulin secretion **S. Lenzen**

Phospholipids and insulin secretion **N. G. Morgan and W. Montague**

Intracellular pH and B-cell function **L. Best**

Regulation of  $K^+$  permeability and membrane potential in insulin-secreting cells **J.-C. Henquin, A. Debuyser, G. Drews and T. D. Plant**

Ion channels involved in the regulation of nutrient-stimulated insulin secretion **F. M. Ashcroft, B. Williams, P. A. Smith and C. M. S. Fewtrell**

Cytoplasmic calcium and insulin secretion **B. Hellman, E. Gylfe, E. Grapenglosser, P.-E. Lund and A. Marcström**

The role of protein kinase C in insulin secretion **S. J. Persaud, P.M. Jones and S.L. Howell**

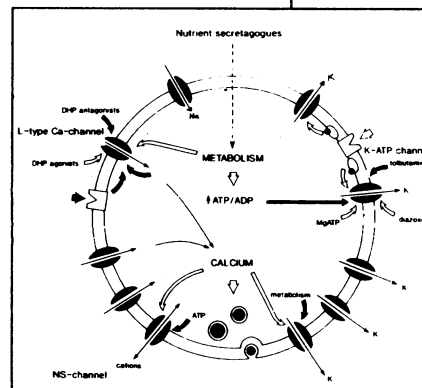

Cyclic AMP, protein phosphorylation and insulin secretion **S. J. Hughes and S.J.H. Ashcroft**

Mechanisms of action of entero-insular hormones, islet peptides and neural input on the insulin secretory process **P.-O. Berggren, P. Rorsman, S. Efendic, C.-G. Ostenson, P.R. Flatt, T. Nilsson, P. Arkhammar and L. Juntti-Berggren**

Molecular mechanisms of sulphonylurea action in the pancreatic B-cell **D.A. Nelson, L. Aguilar-Bryan, H. Raef and A.E. Boyd III**

Defective insulin secretion in diabetes and insulinoma **P. R. Flatt, C.J. Bailey, P.-O. Berggren, L. Herberg and S.K. Swanson-Flatt**

Mechanisms of destruction of insulin-secreting cells **H. Okamoto**

Copies of **Nutrient Regulation of Insulin Secretion** (price £60.00/US\$111.00) can be ordered from Portland Press at the address below. Payment should accompany order and can be made by cheque or credit card.
