

Nutrient Regulation of Insulin Secretion

edited by **P. R. Flatt**

ISBN 1 85578 004 6

The mechanism of insulin release in response to the body's intake of nutrients is a problem at the centre of research into diabetes. **Nutrient Regulation of Insulin Secretion** is a comprehensive review of the mechanisms by which nutrients, such as glucose, and neurohormonal stimuli generated by feeding, control pancreatic B-cell function in health and disease.

Contents

Insulin secretion and the entero-insular axis **L.M. Morgan**

Role of classical and peptidergic neurotransmitters in insulin secretion **J.J. Holst**

Intra-islet interactions **V. Marks, E. Samols and J. Stagner**

Biosynthesis of insulin secretory granule proteins **P.C. Guest and J.C. Hutton**

Regulation of insulin secretion by nutrients: the fuel concept **W.J. Malaisse**

Glucokinase: signal recognition enzyme for glucose-induced insulin secretion **S. Lenzen**

Phospholipids and insulin secretion **N. G. Morgan and W. Montague**

Intracellular pH and B-cell function **L. Best**

Regulation of K^+ permeability and membrane potential in insulin-secreting cells **J.-C. Henquin, A. Debyser, G. Drews and T. D. Plant**

Ion channels involved in the regulation of nutrient-stimulated insulin secretion **F. M. Ashcroft, B. Williams, P. A. Smith and C. M. S. Fewtrell**

Cytoplasmic calcium and insulin secretion **B. Hellman, E. Gylfe, E. Grapenglosser, P.-E. Lund and A. Marcström**

The role of protein kinase C in insulin secretion **S. J. Persaud, P.M. Jones and S.L. Howell**

Cyclic AMP, protein phosphorylation and insulin secretion **S. J. Hughes and S.J.H. Ashcroft**

Mechanisms of action of entero-insular hormones, islet peptides and neural input on the insulin secretory process **P.-O. Berggren, P. Rorsman, S. Efendic, C.-G. Ostenson, P.R. Flatt, T. Nilsson, P. Arkhammar and L. Juntti-Berggren**

Molecular mechanisms of sulphonylurea action in the pancreatic B-cell **D.A. Nelson, L. Aguilar-Bryan, H. Raef and A.E. Boyd III**

Defective insulin secretion in diabetes and insulinoma **P. R. Flatt, C.J. Bailey, P.-O. Berggren, L. Herberg and S.K. Swanston-Flatt**

Mechanisms of destruction of insulin-secreting cells **H. Okamoto**

Copies of **Nutrient Regulation of Insulin Secretion** (price £60.00/US\$111.00) can be ordered from Portland Press at the address below. Payment should accompany order and can be made by cheque or credit card.

The Archaeobacteria: Biochemistry and Biotechnology

Edited by M J Danson, D W Hough and G G Lunt

The tools of biotechnology are often living organisms and cell constituents which have to survive extremely challenging environments. Archaeobacteria may provide some of the answers to many of the problems of using biotechnological techniques under industrial conditions.

The Biochemical Society Symposium drew together acknowledged international experts on archaeobacteria. They explored the biochemistry and molecular biology of these unusual organisms, and then examined how we might use these cells and their uniquely stable constituents to meet the demands of industry's biotechnological future.

The book is divided into five sections:

- * The archaeobacteria
- * Biochemical features of archaeobacteria
- * Molecular biological features of archaeobacteria
- * Proteins in extreme environments
- * Biotechnological potential of the archaeobacteria

Contents

What are the archaeobacteria and why are they important?	W F Doolittle
The enzymology of archaeobacterial pathways of central metabolism	M J Danson and D W Hough
Bioenergetics and autotrophic carbon metabolism of chemolithotrophic archaeobacteria	G Fuchs <i>et al</i>
Biochemistry of methanogenesis	R S Wolfe
Archaeobacterial lipids: structure, biosynthesis and function	M Kates
Progress in developing the genetics of the halobacteria	W F Doolittle <i>et al</i>
RNA polymerases and transcription in archaeobacteria	W Zillig <i>et al</i>
Structure, function and evolution of the archaeal ribosome	A T Matheson
Chromosome structure and DNA topology in extremely thermophilic archaeobacteria	P Forterre <i>et al</i>
Halophilic malate dehydrogenase - a case history of biophysical investigations	H Eisenberg
Proteins from hyperthermophilic archaea	R Hensel <i>et al</i>
Biotechnological potential of halobacteria	F Rodriguez-Valera
Enzymes from thermophilic archaeobacteria: current and future applications in biotechnology	D A Cowan
Thermoacidophilic archaeobacteria: potential applications	P R Norris
Biotechnological potential of methanogens	L Daniels
Where next with archaeobacteria?	O Kandler

New titles from Portland Press

Essays in Biochemistry Volume 27

Edited by Keith Tipton

Essays in Biochemistry has been appreciated as a source of material by biochemistry teachers for many years. Relunched by Portland Press in 1991 with a new format it has returned to its original focus on topics at a level ideal for use by advanced undergraduates, graduate students and their teachers. Each essay provides a valuable overview of an exciting and rapidly developing area of biochemistry or molecular or cellular biology.

Contents

The collagen superfamily - diverse structures and assemblies **D J S Hulmes** Towards an understanding of C3-C4 photosynthesis **S Rawsthorne** The biochemistry of blood clotting: the digestion of a liquid to form a solid **M F Scully** Endothelins **T Masaki and M Yanagisawa** Wither PQQ **W S McIntire** Ubiquitin **R J Mayer and F J Doherty** The repair of DNA alkylation damage by methyltransferases and glycosylases **L D Samson** Roles for protein phosphorylation in synaptic transmission **R Rodnight and S T Wofchuk** Biosensors: principles and practice **J D Newman and A P F Turner** Cell death in Parkinson's disease **S A Greenfield** How groups of proteins titrate - a new approach **H B F Dixon** Proteolysis is a key process in virus replication **G Kemp, A Webster and W C Russell**

ISBN 1 85578 015 1 Paperback, 178 pages, £15.00/US\$30.00* August 1992

Still available

Essays in Biochemistry Volume 26, edited by K. F. Tipton

"I have little doubt that the current scientific interest of the topics, and the quick readability, conciseness and visual appeal of this collection of essays, will be of interest to students and teachers of many branches of modern biological science and not just of biochemistry as indicated in the title"
Biochemical Education

ISBN 1 85578 007 0 Paperback 110 pages £12.50/US\$25.00* 1991

Compendium of Biochemical Nomenclature and Related Documents

Edited by C. Liébecq

This is an essential reference text for all authors and editors in biochemistry and related disciplines. It contains all the current recommendations on nomenclature issued by the nomenclature committees of the International Union of Biochemistry. It also includes text from, and references to, other important nomenclature documents.

The book's main sections cover: amino acids, peptides and proteins; enzymes; nucleotides, nucleic acids and protein synthesis; carbohydrates; and lipids. There are also articles covering the nomenclature of: organic chemistry, isotopically modified compounds, phosphorus-containing compounds, folic acids, vitamin B6, corrinoids and tetrapyrroles; as well as the presentation of thermodynamic data.

ISBN 185578 005 4 paperback 350 pages £18.00/US\$36.00* August 1992

Nucleoside Triphosphatases In Energy Transduction, Cellular Regulation and Information Transfer In Biological Systems

A discussion meeting of the Royal Society

The importance of enzyme reactions in the transduction of energy and information is gradually being realized. Many of these enzyme reactions involve the hydrolysis of phosphate ester bonds and link a wide variety of processes within the cell: triphosphatase hydrolysis provides the energy required in sensory perception and cell signalling, as well as in a range of protein-DNA and protein-protein interactions.

This Discussion Meeting of the Royal Society focused on a class of physiologically diverse enzymes, including myosin, the G-proteins and nitrogenase, that can be grouped together because they share structural features and, most probably, a common mechanism. The interchange of ideas between the participants of the meeting will provide a stimulus for research workers in this field.

ISBN 1 85578 032 1, casebound, 120 pages (approx), £19.50/US\$35.00*, August 1992

Orders for these books, or requests for further information should be sent to: Portland Press Commerce Way, Colchester CO2 8HP UK Tel: (0206) 796351 Fax: (0206) 799331 Orders from the USA and Canada should be sent to: Portland Press Inc, PO Box 2191, Chapel Hill, NC 27515-2191, USA.
