# Essays in Biochemistry Volume 27

**Edited by Keith Tipton**

**Essays in Biochemistry** has been appreciated as a source of material by biochemistry teachers for many years. Relunched by Portland Press in 1991 with a new format it has returned to its original focus on topics at a level ideal for use by advanced undergraduates, graduate students and their teachers. Each essay provides a valuable overview of an exciting and rapidly developing area of biochemistry or molecular or cellular biology.

### **Contents**

The collagen superfamily - diverse structures and assemblies **D J S Hulmes** Towards an understanding of C3-C4 photosynthesis **S Rawsthorne** The biochemistry of blood clotting: the digestion of a liquid to form a solid **M F Scully** Endothelins **T Masaki and M Yanagisawa** Wither PQQ **W S McIntire** Ubiquitin **R J Mayer and F J Doherty** The repair of DNA alkylation damage by methyltransferases and glycosylases **L D Samson** Roles for protein phosphorylation in synaptic transmission **R Rodnight and S T Wofchuk** Biosensors: principles and practice **J D Newman and A P F Turner** Cell death in Parkinson's disease **S A Greenfield** How groups of proteins titrate - a new approach **H B F Dixon** Proteolysis is a key process in virus replication **G Kemp, A Webster and W C Russell**

ISBN 1 85578 015 1 Paperback, 178 pages, £15.00/US\$30.00\* August 1992

**Still available ....**

**Essays in Biochemistry Volume 26, edited by K. F. Tipton**

*"I have little doubt that the current scientific interest of the topics, and the quick readability, conciseness and visual appeal of this collection of essays, will be of interest to students and teachers of many branches of modern biological science and not just of biochemistry as indicated in the title"*  
**Biochemical Education**

ISBN 1 85578 007 0 Paperback 110 pages £12.50/US\$25.00\* 1991

### **Compendium of Biochemical Nomenclature and Related Documents**

**Edited by C. Liébecq**

This is an essential reference text for all authors and editors in biochemistry and related disciplines. It contains all the current recommendations on nomenclature issued by the nomenclature committees of the International Union of Biochemistry. It also includes text from, and references to, other important nomenclature documents.

The book's main sections cover: amino acids, peptides and proteins; enzymes; nucleotides, nucleic acids and protein synthesis; carbohydrates; and lipids. There are also articles covering the nomenclature of: organic chemistry, isotopically modified compounds, phosphorus-containing compounds, folic acids, vitamin B6, corrinoids and tetrapyrroles; as well as the presentation of thermodynamic data.

ISBN 185578 005 4 paperback 350 pages £18.00/US\$36.00\*  
August 1992

### **Nucleoside Triphosphatases in Energy Transduction, Cellular Regulation and Information Transfer in Biological Systems**

**A discussion meeting of the Royal Society**

The importance of enzyme reactions in the transduction of energy and information is gradually being realized. Many of these enzyme reactions involve the hydrolysis of phosphate ester bonds and link a wide variety of processes within the cell: triphosphatase hydrolysis provides the energy required in sensory perception and cell signalling, as well as in a range of protein-DNA and protein-protein interactions.

This Discussion Meeting of the Royal Society focused on a class of physiologically diverse enzymes, including myosin, the G-proteins and nitrogenase, that can be grouped together because they share structural features and, most probably, a common mechanism. The interchange of ideas between the participants of the meeting will provide a stimulus for research workers in this field.

ISBN 1 85578 032 1, casebound, 120 pages (approx),  
£19.50/US\$35.00\*, August 1992

Orders for these books, or requests for further information should be sent to: Portland Press  
Commerce Way, Colchester CO2 8HP UK Tel: (0206) 796351 Fax: (0206) 799331 Orders from  
the USA and Canada should be sent to: Portland Press Inc, PO Box 2191, Chapel Hill, NC  
27515-2191, USA.

# Two review compendia from Portland Press

## Biochemical Journal Reviews Compendium 1991

This invaluable compendium contains the review articles published in the **Biochemical Journal** in 1991. The reviews cover a wide range of modern biochemistry and molecular biology and provide the opportunity for research workers to gain an overview of areas outside their own particular speciality.

The compilation is also an important source of teaching material. The use of colour in diagrams allows the particularly clear presentation of complex topics, and enhances this book's value as a teaching aid.

The reviews fall into five sections covering:

- \* Gene structure and expression
- \* Cell biology and development
- \* Proteins
- \* Membranes and bioenergetics
- \* Regulation of metabolism

Areas reviewed include: pulmonary surfactant proteins, adenovirus oncoproteins, protein-DNA recognition, transcription factors, regulation of gene expression by insulin, glycosylation mutants and protein transport, dioxin toxicity, interaction of ribosomes and the cytoskeleton, muscle contraction, blood coagulation and the complement system, caldesmon, ras proteins, magnetic resonance of membranes, regulation of muscle protein turnover and control of heart ATP synthesis.

*"It provides a valuable teaching aid at a reasonable cost over quite a wide range of biochemistry and molecular biology."*

ISBN 1 85578 020 8,

240 pages

price £12.50/US\$25.00

## Journal of Biological Chemistry Minireview Compendium 1991

The **Journal of Biological Chemistry** is one of the world's leading journals of biological chemistry; it publishes over 1000 research articles each year. It also publishes review articles on selected topics of scientific importance. This is the compendium of reviews published during 1991. The 36 reviews published in 1991 covered a wide range of topics and will supply invaluable material for lecturers and students.

Topics reviewed include: protein structure of actin, HNF-1, cytoplasmic transcription system encoded by vaccinia virus, metal-catalyzed oxidation of proteins, the interleukin-2 receptor, antigenic structures recognized by cytotoxic T lymphocytes, the cholinesterases, lipid activation of protein kinase C, homologous pairing and strand exchange driven by RecA protein, phosphorylation of ribosomal protein S6, DNA topoisomerases, tumor necrosis factor, three proteolytic systems in yeast, protein N-myristoylation, nitrogenases, cytochrome P-450, visual excitation and recovery, calmodulin fluorescence spectroscopy, caldesmon, adhesive recognition sequences,

protein phosphorylation, SPARC, tenascin and thrombospondin, selenocysteine-containing enzymes, aminoacyl-tRNA synthetases, DNA polymerase III holoenzyme, molecular genetics of Alzheimer disease amyloid, lysosomal membrane glycoproteins, conotoxins, and CD 45.

### The Journal of Biological Chemistry

1991 MINIREVIEW COMPENDIUM

Published by the American Society for Biochemistry and Molecular Biology

# Four firsts from **BIOS** SCIENTIFIC PUBLISHERS

## **Oncogenes and Tumor Suppressor Genes**

*F. Macdonald and C.H.J. Ford*

This book is the first in a new series called "Medical Perspectives", devised specifically for non-specialists working in medicine and the medical sciences. Medical students in particular will find these concise texts useful. Primarily intended to inform and explain, each book in the series examines the fascinating developments now occurring in the life sciences which are having, or which are likely to have, a major impact on human medicine and medical practice.

In this book, the authors use the most up-to-date laboratory and clinical data to summarize our present understanding of the roles of oncogenes and tumor suppressor genes in cancer. They also describe techniques for studying these genes, their clinical relevance for diagnosis and prognosis, and ideas for turning this knowledge into useful clinical treatments.

ISBN 1 872 748 55 4 paperback published May 1991, price £11.95/US\$24.00

## **Abscisic Acid: Physiology and Biochemistry**

*Edited by W. J. Davies and H. G. Jones*

The first volume in this new series of high-quality, carefully edited, and topic-oriented reviews comprises an up-to-date survey of the state of our knowledge concerning the plant growth regulator, abscisic acid. Leading experts from the USA, Europe and Australia emphasise recent advances and the application of molecular techniques.

ISBN 1 872748 65 1 hardback to be published in October 1991, price provisionally £39.95/US\$80.00

## **An Introduction to CENTRIFUGATION**

T.C. Ford and J.M. Graham

## **An Introduction to Centrifugation**

*T.C. Ford and J.M. Graham*

"Introduction to Biotechniques" is a new series which gives the novice an introduction to basic techniques. Each book covers both the theory and the practical applications of a key technique. This first book explains what centrifugation is, what it does, how it does it, and the types of centrifuges, rotors, techniques, and density gradient media currently available. It is also useful for the more experienced worker who needs a better grasp of the theory to modify or design new separation methods.

ISBN 1 872748 40 6 paperback published February 1991, price £12.95/US\$25.00

## **Molecular Biology LABFAX**

*T.A. Brown*

Tracking down useful data is time-consuming and frustrating. Now, a new series of books provides the data you need ... quickly and accurately. Labfax is the most comprehensive, easy-to-use, best value for money laboratory companion yet conceived.

ISBN 1 872748 00 7, spiral bound in hard case published January 1991, price £21.95

The LABFAX series is co-published in North America with Academic Press, Inc., and in the rest of the world with Blackwell Scientific Publications Ltd. Orders from North America to Academic Press Inc.
