The Biology of Nitric Oxide

Part I - Physiological and Clinical Aspects

Edited by **S Moncada, M A Marletta, J B Hibbs Jr. and E A Higgs**

It is now widely recognised that nitric oxide acts as a signal transduction mechanism in many biological systems. Understanding the molecular mechanisms of this compound, its distribution and its relation to other important agents will be of vital physiological significance. Research in this area is expanding rapidly and has many implications for our understanding of the cardiovascular system, the central and peripheral nervous systems and host defence mechanisms.

The proceedings of the Second International Meeting on the Biology of Nitric Oxide brings together for the first time investigations from very different areas of research with a common interest in the newly discovered pathway synthesising nitric oxide from L-arginine in mammalian cells.

The proceedings are being published in two volumes, and Part I reports the aspects of nitric oxide research relating to the cardiovascular, central and peripheral nervous systems, as well as clinical data. Part II entitled **Enzymology, Biochemistry and Immunology** will be published in December 1992.

ISBN 1 85578 012 7 Hardback
420 pages

146 papers

£87.50/US\$160.00
October 1992

Part II - Enzymology, Biochemistry and Immunology

ISBN 1 85578 013 5 Hardback
230 pages

97 papers

£57.50/US\$110.00
December 1992

Parts I and II purchased together

£140.00/US\$260.00

Order Form

Please send me the following volumes of **The Biology of Nitric Oxide**

| Title | Price | Quantity |
|--|--------------------|----------|
| Part 1 - Physiological and Clinical Aspects | £87.50/US\$160.00 | _____ |
| Part 2 - Enzymology, Biochemistry and Immunology | £57.50/US\$110.00 | _____ |
| Parts 1 and 2 | £140.00/US\$260.00 | _____ |

I enclose payment* of £/US\$ _____

Please debit my credit card: Visa Mastercard/Access American Express

New Journal for Portland Press ...

Biotechnology and Applied Biochemistry

Editor-in-Chief

P N Campbell, Department of Biochemistry and Molecular Biology,
University College London, UK

Portland Press is pleased to announce that it is taking over the publication of the prestigious journal **Biotechnology and Applied Biochemistry** from 1st January 1993 on behalf of the International Union of Biochemistry and Molecular Biology (IUBMB). The journal was previously published by Academic Press, Inc.

Biotechnology and Applied Biochemistry will continue to publish high quality papers, review articles and other features in the field of applied biochemistry, as well as the results of fundamental studies directly related to the design of new biotechnology, the improvement of existing biochemical processes, and the preparation, utilisation, conversion, or application of biological materials.

Volume 17, No.1 of **Biotechnology and Applied Biochemistry** includes the following papers:

The application of lux genes, *P J Hill, ED Rees, M K Winson and G S A B Stewart*

Poly(ethyleneimine) as a phase-forming polymer in aqueous two-phase systems, *U Dising and B Mattiasson*

Evaluation of collagen crosslinking techniques for the stabilisation of tissue matrices, *D M Simmons and J N Kearney*

Encapsulation of the cobra cytotoxin P4 in liposomes, *A Chaim-Matyas, G Borkow and M Ovodja*

Sugar coated liposomes: A novel delivery system for increased drug efficacy, *S Medda, S Mukherjee, N Das, K Naskar, S B Mahato and M K Basu*

Immobilization of β -glucosidase from *Penicillium funiculosum* on nylon powder, *J Aguado, M D Romero and L Rodriguez*

A new and sensitive method for the assay of amine oxidase by measurement of the liberated peroxide, *A Cona, R Federico, A Niglio, Z Shepherd and P M Dey*

Properties of NADH/NADPH-dependent p-hydroxybenzoate hydroxylase from *Moraxella sp.*, *Raja Sterjiades*

Hydrolytic properties of two cellulases of *Trichoderma reesei* expressed in yeast, *M J Bailey, M Siika-aho, A Valkeajarvi and M E Penttila*

Microbial reduction of 1-(4-fluorophenyl)-4-[4-(5-fluoro-2-pyrimidinyl)-1-piperazinyl]butan-1-one, *R N Patel, A Banerjee, M Liu, R Hanson, R Ko, J Howell and L J Szarka*

Inhibition of the RNA-directed DNA polymerase activity of a recombinant HIV-1 p51 reverse transcriptase by a p15 ribonuclease, *D B Evans, F J Kezdy, W G Tarpley and S K Sharma*

Surface modification of horseradish peroxidase with poly(ethylene glycol) of various molecular masses, *G Fortier and M Laliberte*

Purification of basic fibroblast growth factor and alkaline phosphatase from human placenta, *M H B Costa, P L Ho, A M da Silva, G R Baptista, L C C Leite, J Cabrera-Crespo, K M Venturini, M Katz, C Liberman, A R de Brandao and I Raw*

Co-immobilization of amyloglucosidase and pullulanase, *D Y Schafhauser and K B Storey*

Subscription

Published bimonthly in two volumes per year, Volume 17 and 18 (1993), ISSN 0885-4513

Compendium of Biochemical Nomenclature and Related Documents

New

Published for the International Union of Biochemistry and Molecular Biology by Portland Press

Edited by C Liébecq

This is an essential reference text for all authors and editors in biochemistry and related disciplines. It contains all the current recommendations on nomenclature issued by the nomenclature committees of the International Union of Biochemistry. It also includes text from, and references to, other important nomenclature documents.

The book's main sections cover: amino acids, peptides and proteins; enzymes; nucleotides, nucleic acids and protein synthesis; carbohydrates; and lipids. There are also articles covering the nomenclatures of: organic chemistry, isotopically modified compounds, phosphorus-containing compounds, folic acids, vitamin B6, corrinoids and tetrapyrroles; as well as the presentation of thermodynamic data.

Contents

General - Nomenclature of organic chemistry: stereochemistry; Nomenclature of organic chemistry: natural products and related compounds; Isotopically modified compounds and isotopically labelled compounds; Recommendations for the presentation of thermodynamic and related data in biology; Citation of bibliographic references in biochemical journals.

Amino acids, peptides and proteins - Nomenclature and symbolism for amino acids and peptides; Abbreviated nomenclature of synthetic polypeptides - Polymerized amino acids; Abbreviations and symbols for the description of the conformation of polypeptide chains; Nomenclature of peptide hormones; Nomenclature of glycoproteins, glycopeptides and peptidoglycans; Nomenclature of initiation, elongation and termination factors for translation in eukaryotes.

Enzymes - Nomenclature of multiple forms of enzymes; Symbolism and terminology in enzyme kinetics; Nomenclature for multienzymes.

Nucleotides, nucleic acids and protein synthesis - Abbreviations and symbols for nucleic acids, polynucleotides and their constituents; Abbreviations and symbols for the description of the conformations of polynucleotide chains; Nomenclature for incompletely specified bases in nucleic acid sequences; Nomenclature of initiation, elongation and termination factors for translation in eukaryotes.

Carbohydrates, etc. - Carbohydrate nomenclature; Nomenclature of cyclitols; Numbering of atoms in *myo*-inositol; Conformational nomenclature for five- and six-membered ring forms of monosaccharides and their derivatives; Nomenclature of unsaturated monosaccharides; Nomenclature of branched-chain monosaccharides; Abbreviated terminology of oligosaccharide chains; Polysaccharide nomenclature; Symbols for specifying the conformation of polysaccharide chains; Nomenclature of glycoproteins, glycopeptides and peptidoglycans.

Lipids, etc. - Nomenclature of lipids; Nomenclature of steroids; Nomenclature of quinones with isoprenoid side chains; Nomenclature of carotenoids and amendments; Nomenclature of tocopherols and related compounds; Nomenclature of vitamin D; Nomenclature of retinoids; Prenol nomenclature.

Miscellaneous - Nomenclature of phosphorus-containing compounds of biochemical importance; Nomenclature and symbols for folic acids and related compounds; Nomenclature for vitamins B-6 and related compounds; Nomenclature of corrinoids; Nomenclature of tetrapyrroles. Excerpts from the newsletters of the nomenclature committees of the International Union of Biochemistry (JCBN and NC-IUB); Journals and other documents of biochemical nomenclature.

ISBN 1 85578 005 4 paperback

350 pages

£18.00/US\$36.00
