THE UNIVERSITY OF CHICAGO PRESS

Ultraviolet Light and Vitamin D in Nutrition. By Katharine Blunt and Ruth Cowan. 11s. 6d. net.
A survey of all vitamin D discoveries, including creation of its effects by ultraviolet light.

Diet and Efficiency. A Five-Year Controlled Experiment on Man. By Harald G. O. Holck. 4s. 6d. net.
Objective evidence of the effects of certain eating habits.

Food Poisoning and Food-Borne Infection. (Revised edition, 1931.) By Edwin O. Jordan. 11s. 6d. net.

The Epidemiology and Control of Malaria in Palestine. By I. J. Kliger. 22s. 6d. net.
A complete account of successful control measures.

The Newer Knowledge of Bacteriology and Immunology. Edited by E. O. Jordan and I. S. Falk. 45s. net.
Eighth leading men of science have collaborated in the preparation of this summarization of the present status of knowledge and methods in bacteriology and immunology.

Laboratory Outlines in Bacteriology and Immunology. By John F. Norton and I. S. Falk. 7s. 6d. net.

Nutrition Work with Children. By Lydia J. Roberts. Revised Edition. 13s. 6d. net.
Dealing with the causes, effects, prevention, and treatment of malnutrition.

The Control of Hunger and Thirst in Health and Disease. (Revised edition, 1933.) By A. J. Carlson. 13s. 6d. net.

Rhus Dermatitis: Its Pathology and Chemotherapy. By James B. McNair. 18s. net.

NUTRITION ABSTRACTS & REVIEWS

ISSUED UNDER THE DIRECTION OF
THE IMPERIAL AGRICULTURAL BUREAUX COUNCIL, THE MEDICAL
RESEARCH COUNCIL AND THE REID LIBRARY

Editors:

John Boyd Orr
Imperial Bureau of Animal Nutrition, Aberdeen

J. J. R. Macleod
University of Aberdeen

Harriette Chick
Lister Institute, London

The Editors, in co-operation with Corresponding Editors abroad scrutinize upwards of 400 periodicals and, with the assistance of a competent panel of abstractors issue abstracts of papers published throughout the world dealing with the subject of Nutrition in all its aspects.

The abstracts are conveniently arranged in three main sections: (1) Chemistry and Physiology of Nutrition, (2) Human Diet in Relation to Health and Disease, and (3) Feeding of Domestic Animals. These sections are designed to meet the requirements respectively of the research worker, the medical practitioner and dietician and the practical farmer.

Four numbers appearing in July, October, January and April of each year constitute a Volume, the subscription price for which is 21/-.. Volume IV begins July 1934.

Subscriptions may be paid through any bookseller or direct to

THE SECRETARY, COMMITTEE OF MANAGEMENT "NUTRITION ABSTRACTS & REVIEWS"
REID LIBRARY, ROWETT INSTITUTE, ABERDEEN, SCOTLAND
BIBLIOGRAPHY OF THE MORE IMPORTANT HEAVY METALS OCCURRING IN FOOD AND BIOLOGICAL MATERIALS
(For the years 1929 to 1933 inclusive)

Compiled for the Society of Public Analysts and other Analytical Chemists.

Classified, with a précis of the subject-matter, under thirteen headings.

THIRTY PAGES

To be obtained from
The Editor of ‘The Analyst’

Price 3/- prepaid

'ANALAR' CHEMICALS

The trade-mark 'AnalaR' has been adopted recently in place of the letters 'A.R.' for the characterisation of 220 laboratory chemicals which have been chosen because of their importance in scientific work.

'AnalaR' chemicals conform to definite and precise specifications which have been compiled in the light of recent advances in analytical technique. These specifications are published in

'ANALAR' STANDARDS for LABORATORY CHEMICALS

Further particulars and prices from
THE BRITISH DRUG HOUSES LTD.
GRAHAM STREET LONDON, N.I

THE LOVIBOND TINTOMETER

The British Drug Houses Pattern

For determining the Blue Unit Value of Cod Liver Oil, etc.

A complete colorimeter for the Laboratory.

Also The Lovibond Comparator for determining the pH of Solutions.

THE TINTOMETER LTD
The Colour Laboratory, SALISBURY

THE INSTITUTE OF CHEMISTRY OF GREAT BRITAIN AND IRELAND

The Institute of Chemistry was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was incorporated by Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (free), on application.

All communications to be addressed to the Registrar

RETROSPECT
of eight years’ advertising in the Biochemical Journal

The forty-eight advertisements that have appeared in the Biochemical Journal over the name of the Glaxo Research Laboratory in the last eight years have recorded several facts that were thought to be of interest to the biochemist.

We welcome the opportunity now afforded by the Journal to bring our activities to the notice of biochemists twelve times, instead of six times, each year, in the knowledge that the advice and services we are able to offer are at any rate founded on practical experience and that the animals and dietary constituents to which we call their attention from time to time are at least as good as those they can obtain elsewhere in any part of the world.

GLAXO RESEARCH LABORATORY, 56 OSNABURGH STREET, LONDON, N.W.1

1. We are the only laboratory capable of supplying regularly the highly standardized albino rats of the Wistar variety (London strain). Since 1923 we have sold 17,000 Wistar rats to biochemists throughout the world.

2. We can supply different varieties of caseinogen and caseinate for basal and stock diets, and various other substances needed in nutritional experiments. Since 1923 we have sold about 7 tons of caseinogen and sodium caseinate to biochemical workers, to take no account of salt mixtures, cholesterol, calciferol, vitamin A concentrates and other dietary constituents.

3. Our specialised experience of biochemical work upon vitamins and other nutritional problems—an experience covering 12 years—has always been entirely at the disposal of biochemists.

HEFFER’S BOOKSHOP

If you would like to be advised of the important new and second-hand books on any special subject, please send us a card stating your interests.

Have you any books you wish to sell? We are always glad to purchase good books and learned journals of every description, especially the following:

In preparation: Catalogue 447, Medical Books and Journals
