GONAN
THE ANTERIOR PITUITARY-LIKE GONADOTROPIC HORMONE
Standardised in terms of its power to produce corpora lutea or corpora haemorrhagica in the ovaries of immature rodents.

PROGESTIN B.D.H.
THE HORMONE OF THE CORPUS LUTEUM
Standardised for its proliferational activity in the immature rabbit uterus which has been previously treated with oestrin.

Further particulars of Gonan and Progestin B.D.H. will be supplied on request

THE INSTITUTE OF CHEMISTRY
OF GREAT BRITAIN AND IRELAND
The Institute of Chemistry was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1889 the Institute was incorporated by Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency. Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application.

All communications to be addressed to the Registrar

Instruments for Colorimetric Determinations
Manufactured by
THE TINTOMETER LTD.
The Colour Laboratory
Milford, Salisbury
GLAXO LABORATORIES LTD.

The Glaxo Laboratories have now completed their move to the new group of buildings specially planned and constructed for them at Greenford, Middlesex.

One result of this removal will be to make possible still further extensions of the services that the Research Laboratory renders to biochemical workers all over the world.

The requirements of the bio-assayist—from Wistar rats (London Strain) to vitamin concentrates and salt mixtures—and of the organic chemist for certain compounds, especially of the sterol class, can be supplied, as can also such information and advice as fourteen years of biochemical research and analysis entitles the Research Laboratory to proffer.

Enquiries should be addressed to:
THE CHIEF CHEMIST
GLAXO LABORATORIES LTD.

HEFFER'S BOOKSHOP

BIOCHEMICAL JOURNAL (The).
From the commencement in 1906 to 1933 (Vols. 1–27), with collective Index to Vols. 1–20, 25 Vols. in 30, newly bound in buckram, and 2 Vols., in parts as issued, 1906–33.
£125

Complete sets of this valuable journal are now very scarce, many of the volumes being out of print.

£115

£210

Many of the volumes of this valuable journal are now out of print and extremely difficult to obtain.

ZEITSCHRIFT FÜR PHYSIOLOGISCHE CHEMIE, hrsg. von F. Hoppe-Seyler. Complete set from the commencement in 1877 to 1925 (Band 1–150), and General Register to Band 1–150, 3 Vols. (1 Vol., wrappers), strongly bound in 137 Vols., buckram, very fine uniform set, Leipzig, 1877–1925.$105

Fifteen of the volumes are excellent reprints, otherwise original issues.

The above are a few items from our large stock of Scientific Books and Journals.
