AN INTRODUCTION TO PLANT BIOCHEMISTRY

By

CATHERINE CASSELS STEELE

M.A., B.Sc., Ph.D.

Sometime Lecturer in Chemistry at Swanley Horticultural College

This text-book bridges the gap which so commonly prevails in the teaching of the closely allied subjects of Organic Chemistry and Botany. It forms a concise and up-to-date introduction to Plant Biochemistry for students of Botany, Agriculture and Biology in general.

"The author is be commended for a straightforward treatment of a difficult subject and for supplying a textbook where there has long been the need of one."
Chemistry and Industry

"The author has made a very wise selection...a well-balanced account of the subject which should prove of considerable value to students."
Journal of Botany

364 pages. Price 15s. net

BIOMATHEMATICS

By W. M. FELDMAN, M.D., B.S.,
M.R.C.P., F.R.A.S., F.R.S.Ed.

Being an original compilation of the principles
of Mathematics for students of biological science.

Second Edition. Re-set and enlarged. pp. 480. With 164
Diagrams, and many worked examples.

Postage 6d., Abroad 1s.

SECOND EDITION

PLANT BIOLOGY

An Outline of the Principles underlying
Plant Activity and Structure

By H. GODWIN

Illustrated Crown 8vo. 6s. net

"It is a pleasure to be able unreservedly to
recommend this book...to all who wish to
know how plants live and what part they play
in the world." *The Cambridge Review*

Cambridge University Press
Fetter Lane, London, E.C. 4

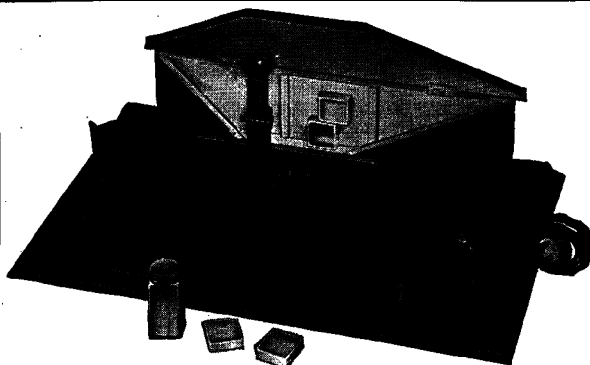

LABORATORY CHEMICALS

The recently published specifications
for the laboratory chemicals which are
issued under the trade-mark 'AnalaR'
have been compiled in the light of recent
advances in analytical technique, and are
more stringent and exact than the 'A.R.'
specifications they supersede.

These specifications are published in
**'ANALAR' STANDARDS for
LABORATORY CHEMICALS**

Demy 8vo. pp. xvi + 296

THE INSTITUTE OF CHEMISTRY OF GREAT BRITAIN AND IRELAND

The Institute of Chemistry was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was incorporated by Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (*free*),
on application.

All communications to be addressed to the Registrar

RETROSPECT

of eight years' advertising in the Biochemical Journal

The forty-eight advertisements that have appeared in the *Biochemical Journal* over the name of the Glaxo Research Laboratory in the last eight years have recorded several facts that were thought to be of interest to the biochemist.

We welcome the opportunity now afforded by the *Journal* to bring our activities to the notice of biochemists twelve times, instead of six times, each year, in the knowledge that the advice and services we are able to offer are at any rate founded on practical experience and that the animals and dietary constituents to which we call their attention from time to time are at least as good as those they can obtain elsewhere in any part of the world.

1. *We are the only laboratory capable of supplying regularly the highly standardised albino rats of the Wistar variety (London strain). Since 1923 we have sold 17,000 Wistar rats to biochemists throughout the world.*

2. *We can supply different varieties of caseinogen and caseinate for basal and stock diets, and various other substances needed in nutritional experiments. Since 1923 we have sold about 7 tons of caseinogen and sodium caseinate to biochemical workers, to take no account of salt mixtures, cholesterol, calciferol, vitamin A concentrates and other dietary constituents.*

3. *Our specialised experience of biochemical work upon vitamins and other nutritional problems—an experience covering 12 years—has always been entirely at the disposal of biochemists.*

GLAXO RESEARCH LABORATORY, 56 OSNABURGH STREET, LONDON, N.W. 1

HEFFER'S BOOKSHOP

If you would like to be advised of the important new and second-hand books on any special subject, please send us a card stating your interests.

Have you any books you wish to sell? We are always glad to purchase good books and learned journals of every description, especially the following:

American Journal of Physiology—Annales de l'Institut Pasteur—Bulletin de l'Institut Pasteur—Année Biologique—Archiv für Anatomie und Physiologie—Archiv für Entwicklungsmechanik—Archiv für experimentelle Pathologie—Archiv für mikroskopische Anatomie—Archiv für Physiologie (Pflüger)—Archives d'Anatomie microscopique—BIOCHEMICAL JOURNAL

—Archives internationales de Physiologie—Journal of Anatomy and Physiology—Journal of Biological Chemistry—Journal of Pathology and Bacteriology—Journal of Physiology—Physiological Reviews—Physiological Abstracts—Quarterly Journal of Microscopical Science—Skandinavisches Archiv für Physiologie—Zeitschrift für Biologie, and many others.

Now ready: Catalogue 447; Medical Books and Journals
