The Editors, in co-operation with Corresponding Editors abroad scrutinize upwards of 400 periodicals and, with the assistance of a competent panel of abstractors issue abstracts of papers published throughout the world dealing with the subject of Nutrition in all its aspects.

The abstracts are conveniently arranged in three main sections: (1) Chemistry and Physiology of Nutrition, (2) Human Diet in Relation to Health and Disease, and (3) Feeding of Domestic Animals. These sections are designed to meet the requirements respectively of the research worker, the medical practitioner and dietician and the practical farmer.

Four numbers appearing in July, October, January and April of each year constitute a Volume, the subscription price for which is 21/- Volume V begins July 1935.

Subscriptions may be paid through any bookseller or direct to

AGENTS IN GREAT BRITAIN AND THE BRITISH EMPIRE (EXCEPT CANADA)
Cambridge University Press, Fetter Lane, London, E.C. 4
THE Institute of Chemistry of Great Britain and Ireland

The Institute of Chemistry was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was incorporated by Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency. Particulars of the Regulations and Examinations of the Institute can be obtained (free), on application.

All communications to be addressed to the Registrar

FEATURES IN THE ARCHITECTURE OF PHYSIOLOGICAL FUNCTION

By JOSEPH BARCROFT

Demy 8vo. 106 text-figures, 43 tables. 20s. net

Cambridge Comparative Physiology Series

"It is evident that the subjects dealt with in the book cover practically the whole range of physiological activities. The author during his intensive and extensive work in the Cambridge laboratory has worked on many branches of physiology, and has come into close contact with many of the leaders of physiological thought. As a result this book emerges as a philosophical treatise enriched with a wealth of scientific detail of the greatest interest and importance."

CAMBRIDGE UNIVERSITY PRESS
‘ANALAR’ CHEMICALS

The trade-mark ‘AnalR’ has been adopted recently in place of the letters ‘A.R.’ for the characterisation of 220 laboratory chemicals which have been chosen because of their importance in scientific work.

‘AnalR’ chemicals conform to definite and precise specifications which have been compiled in the light of recent advances in analytical technique. These specifications are published in

‘ANALAR’ STANDARDS for LABORATORY CHEMICALS
