

Review

Stress response of yeast
by W.H. Mager and P. Moradas Ferreira

1-13

Biochemical Journal

Volume 290, part 1

15 February 1993

Research Papers

Proteins

- Identification of monomeric α -macroglobulin proteinase inhibitors in birds, reptiles, amphibians and mammals, and purification and characterization of a monomeric α -macroglobulin proteinase inhibitor from the American bullfrog *Rana catesbiana* D.S. Rubenstein, I.B. Thøgersen, S.V. Pizzo and J.J. Enghild 85-95
- Characterization of a DNA-damage-recognition protein from F9 teratocarcinoma cells, which is inducible by retinoic acid and cyclic AMP C.C.-K. Chao, N.-K. Sun and S. Lin-Chao 129-134
- Folate transport in intestinal brush border membrane: involvement of essential histidine residue(s) H.M. Said and R. Mohammadkhani 237-240
- Purification and characterization of a DNA-binding heterodimer of 52 and 100 kDa from HeLa cells W.-W. Zhang, L.-X. Zhang, R.K. Busch, J. Farrés and H. Busch 267-272

Enzymes

- The pK_a of the catalytic histidine residue of chloramphenicol acetyltransferase A. Lewendon and W.V. Shaw 15-19
- Angiotensin I-converting enzyme in human circulating mononuclear cells: genetic polymorphism of expression in T-lymphocytes O. Costerousse, J. Allegrini, M. Lopez and F. Alhenc-Gelas 33-40
- Catalytic-site characteristics of the porcine calpain II 80 kDa/18 kDa heterodimer revealed by selective reaction of its essential thiol group with two-hydronic-state time-dependent inhibitors: evidence for a catalytic site Cys/His interactive system and an ionizing modulatory group G.W. Mellor, S.K. Sreedharan, D. Kowlessur, E.W. Thomas and K. Brocklehurst 75-83
- Factors which affect the activity of purified rat liver acyl-CoA oxidase R. Hovik and H. Osmundsen 97-102
- L-Mandelate dehydrogenase from *Rhodotorula graminis*: comparisons with the L-lactate dehydrogenase (flavocytochrome b_2) from *Saccharomyces cerevisiae* O. Smékal, M. Yasin, C.A. Fewson, G.A. Reid and S.K. Chapman 103-107
- Quaternary structure of quinoprotein ethanol dehydrogenase from *Pseudomonas aeruginosa* and its reoxidation with a novel cytochrome *c* from this organism J.M.J. Schrover, J. Frank, J.E. Van Wielink and J.A. Duine 123-127
- Membrane peptidases on human osteoblast-like cells in culture: hydrolysis of calcitonin and hormonal regulation of endopeptidase-24.11 S. Howell, A.M. Caswell, A.J. Kenny and A.J. Turner 159-164
- Site-directed activation of calpain is promoted by a membrane-associated natural activator protein F. Salamino, R. De Tullio, P. Mengotti, P.L. Viotti, E. Melloni and S. Pontremoli 191-197
- The characterization of glutathione S-transferases from rat olfactory epithelium K.K. Banger, E.A. Lock and C.J. Reed 199-204
- Evolutionary families of peptidases N.D. Rawlings and A.J. Barrett 205-218
- Purification and characterization of 5-aminolaevulinic acid dehydratase from *Escherichia coli* and a study of the reactive thiols at the metal-binding domain P. Spencer and P.M. Jordan 279-287
- Ionization characteristics of the Cys-25/His-159 interactive system and of the modulatory group of papain: resolution of ambiguity by electronic perturbation of the quasi-2-mercaptopyridine leaving group in a new pyrimidyl disulphide reactivity probe G.W. Mellor, E.W. Thomas, C.M. Topham and K. Brocklehurst 289-296

Carbohydrates and lipids

- Disruption of the processing α -mannosidase gene does not prevent outer chain synthesis in *Saccharomyces cerevisiae* R. Puccia, B. Grondin and A. Herscovics 21-26
- Mechanisms of hepatic phosphatidylcholine synthesis in the developing guinea pig: contributions of acyl remodelling and of N-methylation of phosphatidylethanolamine G.C. Burdge, F.J. Kelly and A.D. Postle 67-73

Oxidation of low-density lipoprotein with hypochlorite causes transformation of the lipoprotein into a high-uptake form for macrophages	L.J. Hazell and R. Stocker	165–172
Gene structure and expression		
Modulation of expression of endogenous collagenase and collagen genes by electroporation: possible involvement of Ca ²⁺ and protein kinase C	C.A. Lambert, P.Y. Lefebvre, B.V. Nusgens and C.M. Lapière	135–138
Regulation of metabolism		
Peroxyntirite-induced luminol chemiluminescence	R. Radi, T.P. Cosgrove, J.S. Beckman and B.A. Freeman	51–57
The hepatic acute-phase proteins α_1 -antitrypsin and α_2 -macroglobulin inhibit binding of transferrin to its receptor	I. Graziadei, R. Kaserbacher, H. Braunsteiner and W. Vogel	109–113
Effects of chronic 5'-{[(Z)-4-amino-2-butenyl]methylamino}-5'-deoxyadenosine (AbeAdo) treatment on polyamine and eIF-5A metabolism in AbeAdo-sensitive and -resistant L1210 murine leukaemia cells	T.L. Byers, L. Wiest, R.S. Wechter and A.E. Pegg	115–121
Caerulein and gastrin(2–17 ds) regulate differently synthesis of secretory enzymes, mRNA levels and cell proliferation in pancreatic acinar cells (AR4-2J)	P. Pradel, A. Estival, C. Seva, C. Wicker-Planquart, A. Puigserver, N. Vaysse and F. Clemente	219–224
Membranes and bioenergetics		
Studies on the inhibitory mechanism of iodonium compounds with special reference to neutrophil NADPH oxidase	V.B. O'Donnell, D.G. Tew, O.T.G. Jones and P.J. England	41–49
A role for aminopeptidase N in Na ⁺ -dependent amino acid transport in bovine renal brush-border membranes	S. Plakidou-Dymock, M.J. Tanner and J.D. McGivan	59–65
Kinetics of inhibition of purified and mitochondrial cytochrome c oxidase by psychosine (β -galactosylsphingosine)	C.E. Cooper, M. Markus, S.P. Seetulsingh and J.M. Wrigglesworth	139–144
Steady-state kinetics of ubiquinol–cytochrome c reductase in bovine heart submitochondrial particles: diffusional effects	R. Fato, M. Cavazzoni, C. Castelluccio, G. Parenti Castelli, G. Palmer, M. Degli Esposti and G. Lenaz	225–236
Characterization of the inhibition by stilbene disulphonates and phloretin of lactate and pyruvate transport into rat and guinea-pig cardiac myocytes suggests the presence of two kinetically distinct carriers in heart cells	X. Wang, R.C. Poole, A.P. Halestrap and A.J. Levi	249–258
Temperature-induced membrane-lipid adaptation in <i>Acanthamoeba castellanii</i>	A.L. Jones, A.C. Hann, J.L. Harwood and D. Lloyd	273–278
Receptors and signal transduction		
Thrombin Ca ²⁺ -dependently stimulates protein tyrosine phosphorylation in BC ₃ H1 muscle cells	S. Offermanns, E. Bombien and G. Schultz	27–32
Pathway of synthesis of 3,4- and 4,5-phosphorylated phosphatidylinositols in the duckweed <i>Spirodela polyrhiza</i> L.	C.A. Brearley and D.E. Hanke	145–150
Phorbol esters inhibit insulin-induced receptor down-regulation in cultured human lymphocytes: association with diminished insulin receptor autophosphorylation	K. Torossian, P. Nower, T. Schwartz and I.G. Fantus	151–158
Relationship between phosphorylation and translocation to the plasma membrane of p47phox and p67phox and activation of the NADPH oxidase in normal and Ca ²⁺ -depleted human neutrophils	S. Dusi, V. Della Bianca, M. Grzeskowiak and F. Rossi	173–178
Organization of the phosphoinositide cycle. Assessment of inositol transferase activity in purified plasma membranes	O.M. Santiago, L.I. Rosenberg and M.E. Monaco	179–183
Enkephalin activates the phospholipase C/Ca ²⁺ system through cross-talk between opioid receptors and P ₂ -purinergic or bradykinin receptors in NG 108-15 cells. A permissive role for pertussis toxin-sensitive G-proteins	F. Okajima, H. Tomura and Y. Kondo	241–247
Subcellular-membrane characterization of [³ H]ryanodine-binding sites in smooth muscle	Z.-D. Zhang, C.-Y. Kwan and E.E. Daniel	259–266

Cell biology and development

Tumour necrosis factor-induced cytotoxicity is accompanied by intracellular mitogenic signals in ME-180 human cervical carcinoma cells

K.M. Manchester, W.D.W. Heston and D.B. Donner

185–190
