

**Review**

The structure and function of proline-rich regions in proteins  
by M.P. Williamson

249–260

**Research Communications**

Nitrogenase of *Klebsiella pneumoniae*: electron nuclear double resonance (ENDOR) studies on the substrate reduction site

B.D. Howes, K. Fisher and D.J. Lowe

261–264

Simultaneous oscillations of cytoplasmic free Ca<sup>2+</sup> concentration and Ins(1,4,5)P<sub>3</sub> concentration in mouse pancreatic β-cells

C.J. Barker, T. Nilsson, C.J. Kirk, R.H. Michell and P.-O. Berggren

265–268

**Research Papers**

**Proteins**

Catalytic and ligand binding properties of the FK506 binding protein FKBP12: effects of the single amino acid substitution of Tyr<sup>82</sup> to Leu

M.J. Bossard, D.J. Bergsma, M. Brandt, G.P. Livi, W.-K. Eng and M.A. Levy

365–372

**Enzymes**

Microsomal lipoamide reductase provides vitamin K epoxide reductase with reducing equivalents

H.H.W. Thijssen, Y.P.G. Janssen and L.T.M. Vervoort

277–280

Effect of specificity on ligand conformation in acyl-chymotrypsins

S.S. Johal, A.J. White and C.W. Wharton

281–287

Steady-state kinetics of malonyl-CoA synthetase from *Bradyrhizobium japonicum* and evidence for malonyl-AMP formation in the reaction

Y.S. Kim and S.W. Kang

327–333

Intronless *celB* from the anaerobic fungus *Neocallimastix patriciarum* encodes a modular family A endoglucanase

L. Zhou, G.-p. Xue, C.G. Orpin, G.W. Black, H.J. Gilbert and G.P. Hazlewood

359–364

Electron-paramagnetic-resonance and magnetic-circular-dichroism studies of the binding of cyanide and thiols to the iron-molybdenum cofactor from *Klebsiella pneumoniae* nitrogenase

A.J.M. Richards, D.J. Lowe, R.L. Richards, A.J. Thomson and B.E. Smith

373–378

**Carbohydrates and lipids**

Constitutive expression of a saturable transport system for non-esterified fatty acids in *Xenopus laevis* oocytes

S.-L. Zhou, D. Stump, L. Isola and P.D. Berck

315–319

Low-density lipoprotein as a transporter of dolichol intermediates in the mammalian circulation

J.W. Rip, M.M. Blais and L.W. Jiang

321–325

Structural features of the exocellular polysaccharides of *Mycobacterium tuberculosis*

A. Lemassu and M. Daffé

351–357

**Gene structure and expression**

*In vitro* splicing of pre-messenger RNA with extracts from 5-fluorouridine-treated cells

J.R. Patton

297–301

Isolation and expression of a novel chick G-protein cDNA coding for a Gα<sub>13</sub> protein with a Gα<sub>o</sub> N-terminus

E.J. Kilbourne and J.B. Galper

303–308

Effect of retinoic acid on mucin gene expression in rat airways *in vitro*

B. Manna, M. Lund, P. Ashbaugh, B. Kaufman and S.N. Bhattacharyya

309–313

Platelet-derived growth factor (PDGF) BB homodimer regulates PDGF A- and PDGF B-chain gene transcription in human mesangial cells

B. Bhandari, G. Grandaliano and H.E. Abboud

385–388

Molecular characterization of hNRP, a cDNA encoding a human nucleosome-assembly-protein-1-related gene product involved in the induction of cell proliferation

H.-U. Simon, G.B. Mills, M. Kozlowski, D. Hogg, D. Branch, Y. Ishimi and K.A. Siminovitch

389–397

**Membranes and bioenergetics**

- Structural disruption of the *trans*-Golgi network does not interfere with the acute stimulation of glucose and amino acid uptake by insulin-like growth factor I in muscle cells H.S. Hundal, P.J. Bilan, T. Tsakiridis, A. Marette and A. Klip **289–295**
- Correlated expression of the 97 kDa sarcoendoplasmic reticulum Ca<sup>2+</sup>-ATPase and Rap1B in platelets and various cell lines C. Magnier, R. Bredoux, T. Kovacs, R. Quarck, B. Papp, E. Corvazier, J. de Gunzburg and J. Enouf **343–350**

**Receptors and signal transduction**

- Cathepsin G and thrombin: evidence for two different platelet receptors M.A. Selak **269–275**
- Association of the insulin receptor and phosphatidylinositol 3-kinase requires a third component R. Liu and J.N. Livingston **335–342**
- Platelet-derived growth factor (PDGF)-AB-mediated phosphorylation of PDGF  $\beta$  receptors S.R. Coats, H.D. Love and W.J. Pledger **379–384**
- Stimulation by prostaglandin E<sub>2</sub> of a high-affinity GTPase in the secretory granules of normal rat and human pancreatic islets A. Kowluru and S.A. Metz **399–406**
- A role for protein kinase C subtypes  $\alpha$  and  $\epsilon$  in phorbol-ester-enhanced K<sup>+</sup>- and carbachol-evoked noradrenaline release from the human neuroblastoma SH-SY5Y N.A. Turner, M.G. Rumsby, J.H. Walker, F.A. McMorris, S.G. Ball and P.F.T. Vaughan **407–413**
- Comparative localization of inositol 1,4,5-trisphosphate and ryanodine receptors in intestinal smooth muscle: an analytical subfractionation study M. Wibo and T. Godfraind **415–423**
