The Biochemical Journal is conducted by the Biochemical Society and is published by the Cambridge University Press.

This Society has been instituted solely for the advancement of the Science of Biochemistry. Persons interested in Biochemistry are eligible for election.

Meetings are held at different centres for the communication of papers to the Society.

Members are entitled to receive a copy of the Journal. Further information as to the conditions of membership may be obtained on application to the Hon. Sec., Prof. A. C. Chibnall, Imperial College of Science and Technology, South Kensington, S.W. 7, or to the Hon. Treas., Mr J. Addyman Gardner, 24 Palace Mansions, Kensington, W. 14, to whom subscriptions should be sent.

Papers for publication should be sent to Sir A. Harden, F.R.S., Sunnyholme, Bourne End, Bucks. Communications respecting the printing of the articles, or respecting the purchase of offprints should be addressed to the University Press, Cambridge.

The Journal is issued in monthly numbers and the date at which each paper is received by the editors is printed at the beginning of the paper.

All communications respecting the purchase of copies of the parts or volumes, whether current or back issues, or respecting subscriptions in the case of non-members of the Biochemical Society (£3. 10s. 0d. net per volume (post free) payable in advance) should be addressed to The Cambridge University Press, Fetter Lane, London, E.C.4, or to the Hon. Treas., Mr J. Addyman Gardner, 24 Palace Mansions, Kensington, W. 14. For prices of back numbers and volumes see list on p. 4 of Wrapper.

Quotations can be given for Buckram binding cases and for binding Subscribers' Sets.

The Cambridge University Press has appointed the University of Chicago Press agent for the sale of the Biochemical Journal in the United States of America.

Notice to Contributors.

1. Contributors who are members of the Biochemical Society receive 25 copies (without covers) of their papers free and can purchase additional copies if notice is given when their proofs are returned. Other contributors may purchase reprints but receive no free copies.

2. Papers forwarded to the Editors for publication are understood not to be offered to any other Journal for prior or simultaneous publication.

3. All communications intended for publication must be type-written.

4. Contributors residing outside Europe are requested to nominate someone resident in Great Britain to be responsible for the correction of the proofs of their papers. Papers from such contributors should be accompanied by a statement of the number of reprints required.

5. References. References to literature should be arranged alphabetically according to authors' names at the end of the communication, each accompanied by the date, title of Journal, volume and page, thus: Ackermann (1912), Z. Biol. 59, 17. In the text the reference should be indicated by the author's name and the date, enclosed in brackets, thus [Ackermann, 1912]. If reference is made to several papers published by one author in a single year, these should be numbered in sequence and the number quoted along with the year both in the text and in the collected references.

6. Chemical formulae should be written, as far as possible, in a single horizontal line.

7. Illustrations and curves accompanying the papers must be carefully drawn, about twice the size of the finished block, on smooth white Bristol boards or ordinary curve paper in Indian ink. Any lettering on these drawings should be lightly inserted in pencil. Further information can be obtained from the Editors.

During 1937 the Journal will be issued in monthly numbers. MSS. for the successive numbers of Vol. 31 should be in the hands of the Editors by the first of each month. Contributors are specially requested to arrange references in the manner uniformly adopted in this Journal.
CONTENTS

CCCXVII. The effect of light on the vitamin C of milk. By S. K. Kon and M. B. Watson. (With seven figures) ........................................... 2273

CCCXVIII. On the amount of ascorbic acid in blood and urine. The daily human requirements for ascorbic acid. By M. Van Eekelen. (With two figures) ........................................... 2291

CCCXIX. I. On the relation between diet and urinary output of thiosulphate (and ascorbic acid). II. Human requirements for vitamin C. By M. Heinemann. (With two figures) ........................................... 2299

CCCXX. The influence of fertilizers on the carotene and vitamin C content of plants. By J. B. H. Ijdo ........................................... 2307

CCCXXI. An investigation of the rates of digestion of starches and glycogen a-d the bearing on the chemical constitution. II. Liver amylase. By G. E. Glock. (With one figure) ........................................... 2313

CCCXXII. Ketogenesis-antiketogenesis. V. Metabolism of ketone bodies. By N. L. Edson and L. F. Leloir ........................................... 2319

INDEX

Absorption apparatus for micro-determination of certain volatile substances (Conway and Flood) 716
Absorption spectra of 1:2-benzpyrene (Sannié) 704
Absorption spectra of oestrone and related compounds in alkaline solution (Callow) 906
Absorption spectra of sterols from natural sources (Gillam and Heilbron) 1253
Absorption spectra of tyrosine, tryptophan and their mixtures (Holiday) 1765
Absorption spectra, ultraviolet, of oestrone and spectra, ultraviolet, of tyrosine, tryptophan, and their mixtures (Holiday) 1765
Absorption spectra of tyrosine, tryptophan and their mixtures (Holiday) 1765
Absorption spectra, ultraviolet, of oestrone and spectra, ultraviolet, of tyrosine, tryptophan, and their mixtures (Holiday) 1765
Absorption spectra, ultraviolet, of oestrone and spectra, ultraviolet, of tyrosine, tryptophan, and their mixtures (Holiday) 1765
Acetone in urine, simple micro-test for (Barrett) 888
Acetylcholine, colorimetric method for determination of, in small amounts (Beattie) 1554
ACHARYA, C. N. Determination of carbon and nitrogen by the action of chromic acid under reduced pressure 241
ACHARYA, C. N. Structure in relation to chromic oxidation of nitrogenous substances 1026
Acidity, effect of, on action of hypochlorites on amino-acids and proteins (Wright) 1661
Acids, behaviour of kephalin from human brain towards (Spiegel-Adolf) 1536
Acids, bile, comparison of different methods for determination of, in bile (Josephson and Jungner) 1953
Acids, bile, resorption of, from the intestines (Josephson and Rydin) 2224
Acids, 4-carbon dicarboxylic, role of, in muscle respiration (Innes) 2040
Acids, conjugated bile, biological splitting of (Frankel) 2111
Acids, dicarboxylic, metabolism of (Edson) 1855
Acids, fatty, of phrenosin and keratin (Chibnall, Piper and Williams) 100
Activator of proline dehydrogenase (Das) 1617
ADAMS, G. S. see ROUGHTON, F. J. W.
ADAMS, G. A. The ultraviolet spectrum of haemoglobin and its derivatives 2016
Adenine compounds, decomposition of, by bacteria (Lutwak-Mann) 1405
Adrenalectomised rats, effect of parathyroid hormone upon serum calcium and calcium excretion of (Pugsley and Collip) 1274
Adrenaline, effects of, on vitamin C in animals resistant to scurvy (Daoud and el Ayyadi) 1280
Adrenaline, so-called virtual, of the suprarenal cortex (Devine) 1768
Adsorption, chromatographic, isomerisation of carotene by (Gillam and el Ridi) 1735
Aerobic conditions, partial, effect of, on production of mucus during decomposition of plant materials (Shrikhande) 1789
AGAR, preparation of heptaacetyl-dl-galactose by acetylation of (Pirie) 369
Age, influence of, on mineral constituents of bones from kittens and pups (Burns and Henderson) 1207
AHMAD, B. Observations on the excretion of vitamin C in human urine 11
Albumin, crystalline, of hen's egg, hydrogen ion dissociation curve of (Kekwick and Cannan) 227
Albumin, egg, digestion products formed by action of papain on (Annetts) 1807
Albumin, egg, effect of formaldehyde on hydrogen ion dissociation curve of (Kekwick and Cannan) 235
Albumin, egg, ultrafiltration of, through graded colloidion membranes (Elford and Ferry) 84
Albumin, serum, separation of, into two fractions (Hewitt) 2229
Alcohol, production of citric acid from (Chrzaszcz and Leonhard) 1947
Alcoholic fermentation of sugars by brewer's yeast, kinetics of (Hopkins and Roberts) 76
Aldehydes, metabolism of (Edson) 1855
Aldoses, hyperacetylation of (Pirie) 374
Alkalinity, effect of, on action of hypochlorites on amino-acids and proteins (Wright) 1661
Alkylammonium compounds, possible lipotropic action of (Mawson and Welch) 417
ALLCHORNE, E. see BACHARACH, A. L.
Amide nitrogen of insulin (Harington and Mead) 1598
Amino-acid dehydrogenase (Das) 1080, 1617
Amino-acids, action of hypochlorites on (Wright) 1661
Amino-acids, coupled reactions produced by pairs of, induced by Cl. sporogenes (Woods) 1934
Amino-acids, essential, of pulses, partitioning of the nitrogen and determination of (Bhagvat and Sreemivasaya) 1416
Amino-acids of cockfoot protein with special reference to dicarboxylic acids and proline (Miller) 273
Amino-acids of plants (Virtanen and Laine) 1509
Amino-acids, oxidation of, by hypochlorite (Norman) 484
Amino-acids, potentiometric determination of (Balson and Lawson) 1257
α-Amino-acids, scheme relating (Hill and Robson) 248
Amino-acids, separation of, by means of their copper salts (Town) 1837
Aminoethyl phosphoric ester from tumours (Outhouse) 197

Biochem. 1936 xxx ( 2333 ) 151
INDEX

Amino-groups of proteins of human serum (Dulière) 770
Ammonia formation in irradiated tissues (Crabtree) 2140
Amylase during growth and ripening of grains (Chrzàœcz and Janicki) 1298
Amylase, free and bound, sulphurated hydrogen as a factor in determination of, in ungerminated cereals (Chrzàœcz and Janicki) 1298
Amylase, liver (Glock) 2313
Amylase, salivary and pancreatic, effect of halogen salts on (Clifford) 2049
Amylases, action of, on starches and glycogen (Glock) 1936
Amylases, mechanism of degradation of starch by (Freeman and Hopkins) 442, 446, 451
Anacardium occidentale, new globulin from (Nagasarkar, Deanesly, and Sylvester) 2140
Androsterone-testosterone (Anderson and Angell) 2 A. B. and S. 770
Animal carbonic anhydrase, tissues (Foote and Hopkins) 442, 446, 451
Animal and plant materials (Singh and Mathur) 321
Androsterone-testosterone series, comparative activities of compounds of (Deanesly and Parkes) 291
Anacardium occidentale, new globulin from (Nagasarkar, Deanesly, and Sylvester) 2140
Animal carbonic anhydrase, tissues (Foote and Hopkins) 442, 446, 451
Animal and plant materials (Singh and Mathur) 321
Anthers, strict (genus Clostridium), metabolism of (Woods) 1934
Anoxic conditions, partial, effect of, on growth (Davson) 773
Amylase, during growth and ripening of grains (Chrzàœcz and Janicki) 1298
Amylase, free and bound, sulphurated hydrogen as a factor in determination of, in ungerminated cereals (Chrzàœcz and Janicki) 1298
Amylase, liver (Glock) 2313
Amylase, salivary and pancreatic, effect of halogen salts on (Clifford) 2049
Amylases, action of, on starches and glycogen (Glock) 1936
Amylases, mechanism of degradation of starch by (Freeman and Hopkins) 442, 446, 451
Anacardium occidentale, new globulin from (Nagasarkar, Deanesly, and Sylvester) 2140
Androsterone-testosterone series, comparative activities of compounds of (Deanesly and Parkes) 291
Ansell, S. and Norris, F. W. Studies on hemicelluloses. V. Additional notes on the hemicelluloses of maize cobs 2155
Ansell, S. and Norris, F. W. Studies on hemicelluloses. VI. The hemicelluloses of the flower of the hop (Humulus lupulus) 2159
Ansell, S., Norris, F. W. and Resch, C. E. The analysis of carbohydrates of the cell wall of plants. II. The determination of pentoses as single substances and in mixtures containing uronic acids and hexoses 2146
Anagallis aucklandii, composition of oil of (Shorland and McIntosh) 1775
Anhydase, carbonic, modified colorimetric estimation of (Philpot and Philpot) 2191
Animal body, elimination of polycyclic hydrocarbons from (Chalmers and Peacock) 1242
Animal tissues, lactic dehydrogenase of (Green and Brosteaux) 1499
Animal tissues, malic dehydrogenase of (Green) 2095
Animal resistant to scurvy, role of vitamin C in (Daoud and el Ayyadi) 1280
Anion content of normal and anaemic bloods (Maizels) 821
Annett, M. The digestion products formed by the action of papain on egg albumin 1807
Anthracene, metabolic production of dihydroxy-dihydroanthracenoglycuronic acid from (Boyland and Levi) 728
Anthrylmercapturic acid (Boyland and Levi) 1225
Anti-carcinogenic substances, tumour metabolism in presence of (Berenblum, Kendal and Orr) 709
Antimony trichloride reaction for vitamin A, spectrographic studies on (Nottevarp and Weeden) 1705
Antiscorbutic activity of dehydroascorbic acid, experiments confirming (Fox and Levy) 211
Aorta, rabbit, influence of changes induced by cholesterol upon calcification in vitro of (Law and Robison) 69
Apple, biochemical studies in nitrogen metabolism of (Hulme) 258
Apple fruit, determination of starch in (Hanes) 168
Apple fruit, nitrogen metabolism of (Hulme and Roach) 1397
Aquatic plants, fats of (Chalmers and Richardson) 821
Aqueous solution of normal human serum and Levi) 728
Ascorbic acid, amount of, in blood and urine (van Eekelen) 2291
Ascorbic acid and glutathione, relations between (Hopkins and Morgan) 1446
Ascorbic acid content of plants, influence of fertilisers on (Tjóo) 2307
Ascorbic acid content of stored and sprouting potatoes, changes in (Pett) 1228
Ascorbic acid, daily human requirements for (van Eekelen) 2291
Ascorbic acid, effect of incomplete diets on concentration of, in the organs of the rat (Zilva) 857
Ascorbic acid, excretion of, in human urine (Ahmad) 11
Ascorbic acid, human requirements for (Heinemann) 2299
Ascorbic acid in the guinea-pig eye, cataract formation of, and (Johnson) 1430
Ascorbic acid oxidase from drumstick (Srivasan) 2077
Ascorbic acid, reduced, estimation of, in blood serum and plasma (Taylor, Chase and Faulkner) 1119
Ascorbic acid, reduction of iron by (McFarlane) 1472
Ascorbic acid, relation between diet and urinary output of (Heinemann) 2299
Ascorbic acid, reversible oxidation of, by means of norite charcoal (Fox and Levy) 208
Ascorbic acid, selective absorption of, by guinea-pig tumour tissue (Boyland) 1221
Ascorbic acid, storage of, by the guinea-pig at different levels of intake (Fox and Levy) 211
Ascorbic acid, tannin from the Indian gooseberry with protective action on (Damodaran and Nair) 1014
Ascorbic acid, use of phosphotungstic acid method of determining, in urines with low ascorbic acid content (Medes) 1733
Ash, English, relationship between chemical composition and mechanical strength in wood of (Bamford and van Rest) 1849
Ashford, C. A., Klein, L. and Wilkinson, J. P. Note on the non-identity of lactoflavin and the "extrinsic factor" in pernicious anaemia 218
Aspergillus terreus Thom, metabolic products of (Raistrick and Smith) 1315
Assay, line test, for vitamin D, technique of (Bacharach, Allchorne and Glynn) 2004
Assay methods, rat, use of, in comparing crystalline vitamin B₆ preparations (Heyroth) 645
Assay, vitamin A, accuracy of (Coward) 2009
Assay, vitamin B₁₂, influence of length of test period on accuracy obtainable in (Coward) 2012
Autoxidation of fatty acids (Ellis) 753
Avian organism, hypoxanthine as an intermediary metabolite in the synthesis of uric acid in (Edson, Krebs and Model) 1380
Ayward, F. X. and Blackwood, J. H. Fasting and realimentation in the ruminant. I. The effect of food and fasting on certain blood constituents. II. Calcium and phosphorus metabolism during fasting and during realimentation followed by fasting 1819
El Ayyadi, M. A. S. see Daoud, K. M.
B-vitamins, water-soluble (Copping) 845, 849
Bacharach, A. L., Allchorne, E. and Glynn, H. E. Technique of the line test assay for vitamin D 2004
B. dysenteriae (Shiga), preparation and properties of a specific polysaccharide from (Morgan) 909
Bacteria, decomposition of adenine compounds by (Luttwak-Mann) 1405
Bacteria, enzyme formation and polysaccharide synthesis by (Carruthers and Cooper) 1001
Bacteria, growth factors for (Tatum, Wood and Peterson) 1898
Bacteria, propionic acid, activation of the lower fatty acids by (Stone, Wood and Werkman) 624
Bacteria, propionic acid, mechanism of glucose dissimilation by (Wood and Werkman) 618
Bacteria, propionic acid, utilisation of CO₂ in dissimilation of glycerol by (Wood and Werkman) 48
Bacteria, propionic acid, vitamin B₁₂, a growth stimulant for (Tatum, Wood and Peterson) 1898
Bacteria, root nodule, of leguminous plants (Virtanen and Laine) 377
Bacteria, synthesis of formic acid by (Woods) 515
Bacterial enzymes, variability in activity of (Wooldridge, Knox and Glass) 926
Bacterium, soil, production of free sulphur from l-cystine by (Barber and Burrows) 609
Bacillus subtilis, aerobic breakdown of glucose by (Butlin) 1870
Balson, E. W. and Lawton, A. The potentiometric determination of polypeptides and amino-acids. II. The formaldehyde titration 1257
Bamford, K. F. and Campbell, W. G. The determination of lignin in the wood of Eucalyptus 419
Bamford, K. F. and van Rest, E. D. The relationship between chemical composition and mechanical strength in the wood of English ash (Fraxinus excelsior Linn.) 1849
Barber, H. H. Investigations of blood-serum lipoids in cancer and other cases. I. The mean molecular weight of the free and combined acids in the blood serum lipoids of cancer and other subjects 1463
Barber, H. H. and Burrows, R. B. The production of free sulphur from l-cystine by a soil bacterium 599
Barcroft differential manometer, accuracy of, in respiration studies (Corbet and Woolbridge) 132
Barcroft differential manometer, use of, in estimation of oxygen absorption of sewage (Wooldridge and Standfast) 141
Barcroft, J. see Roughton, F. J. W.
Barrett, J. see McKie, P.
Barrett, J. F. A simple micro-test for acetone in urine 888
Base, behaviour of kephalin from human brain towards (Spiegel-Adolf) 1536
Beall, D. and Edson, M. Some notes on the isolation of oestrone and equinín from the urine of pregnant mares 577
Bean, mung. Lipoid metabolism in, during germination (Kao) 202
Beattie, F. J. R. A colorimetric method for the determination of choline and acetylcholine in small amounts 1554
Beeston, A. W. and Channon, H. J. Cystine and the production of fatty livers 280
Beeston, A. W. and Wilkinson, H. The effect of liver feeding on the "fat" content of the liver 121
Beetle, death-watch, destruction of oak by (Norman) 1135
Bell, D. J. Liver glycogen. IV. Molecular structure of glycogen formed after ingestion of galactose by fasted rabbits 1612
Bell, D. J. The molecular structure of glycogen from the whole tissues of Mytilus edulis 2144
Benham, G. H. see Davson, H.
Benzidine sulphate, conditions necessary for precipitation of, with reference to estimation of sulphates in urine (Owen) 352
1:2-Benzpyrene, carcinogenic action and absorption and fluorescence spectra of (Sanné) 704
1:2-Benzpyrene, fluorescence spectrum of (Mayneord and Roe) 707

151–2
INDEX

BERENBLUM, I. and KENDAL, L. P. The destruction of 1:2:5:6-dibenzanthracene in the mouse 429
BERENBLUM, I. KENDAL, L. P. and ORR, J. W. Tumour metabolism in the presence of antitumorogenic substances 709
Bertosilva exselsa, constitution of seed-coat of (Boswell) 971
Beta vulgaris, estimation of sugars in the leaf of (van der Plank) 457
BHAGVAT, K. and SREENIVASAYA, M. The non-protein-nitrogen of pulses. II. Partitioning of the nitrogen and a determination of the essential amino-acids 1416
Bile acids, conjugated, biological splitting of (Frankel) 2111
Bile acids in bile, comparison of different methods for determination of (Josephson and Jungner) 1053
Bile acids, resorption of, from the intestines (Josephson and Rydin) 2224
Bile pigments (Naumann) 347, 762, 1021
Bilirubin, new test for, in urine (Naumann) 762
Bilirubin, reduction of bilirubin to, in tissues (Lemberg and Wyndham) 1147
Biliverdin, reduction of, to bilirubin in tissues (Lemberg and Wyndham) 1147
Biochemistry of micro-organisms (Anderson and Raistrick) 16; (Birkinshaw, Oxford and Raistrick) 394; (Birkinshaw and Raistrick) 801, 2194; (Raistrick, Robinson, and White) 1303; (Raistrick and Smith) 1315
Biological oxidation of carbohydrates (Jenkins) 457
Birns, T. W. and György, P. A study of the chemical nature of vitamin B, and methods for its preparation in a concentrated state 304
Birkinshaw, J. H. and Raistrick, H. Studies in the biochemistry of micro-organisms. III. Isolation, properties and constitution of terestric acid (ethylcarbinol acid), a metabolic product of Penicillium terrestre Jensen 2194
Blackwood, J. H. see Aylward, F. X.
Blood, action of certain reagents on "loosely bound" iron in (Shorland and Wall) 1049
Blood, alleged presence of dehydroascorbic acid in (Kellie and Zilva) 361
Blood, amount of ascorbic acid in (van Eekelen) 2291
Blood arginase, error due to, in urease method for determination of blood urea (Anderson and Tompsett) 1572
Blood constituents of ruminants, effect of food and fasting on (Aylward and Blackwood) 1819
Blood, haemoglobin and iron of (Coombs) 1588
Blood, micro-determination of bromide with application to, and observations on the normal human subject (Conway and Flood) 716
Blood of lactating cow, effect of oestrogenic hormones on phosphatase of (Folley) 2282
Blood of vitamin B,-deficient pigeons, isolation of pyruvic acid from (Johnson) 31
Blood, ox, fatty acids of (Parry and Smith) 592
Blood plasma of cats, ionic equilibrium between aqueous humour and (Davson, Duke-Elder and Benham) 773
Blood, rabbit’s, cation content of erythrocytes of, in hyper- and hypo-tonic sera (Davson) 391
Blood, rapid method for estimation of total iron in (Shorland and Wall) 1047
Blood serum, estimation of reduced ascorbic acid in (Taylor, Chase and Paulkner) 1119
Blood serum lipids in cancer and other cases (Barber) 1463; (Woodward) 1467
Blood, small amounts of, new iodimetric procedure for estimation of chloride in (Haalewood and King) 902
Blood urea, error due to blood arginase in urease method for determination of (Anderson and Tompsett) 1572
Bloods, normal and anaemic, anion and cation contents of (Maizels) 821
Bombus mori, tyrosine metabolism of (Holtzmann) 28
Bone, mineral constituents of (Burns and Henderson) 1207
Bones, human, distribution of lead in (Tompsett) 345
Bones of newly born pups and kittens, changes in growth and water content of (Burns and Henderson) 1202
Borneol, conjugation of, in man (Pring and Williams) 799
Bowell, J. G. Constitution of certain nutshells. I. The seed-coat of Bertolletia excelsa (Brazil-nut) 971
Bowes, J. H. and Murray, M. M. The chemical composition of teeth. III. The variations in chemical composition in relation to dental structure 977
Boyland, E. The selective absorption of ascorbic acid by guinea-pig tumour tissue 1221
Boyland, E. and Boyland, M. E. Studies in tissue metabolism. VIII. The effect of fumarate and succinate on tumour respiration 224

Boyland, E. and Levi, A. A. Metabolism of poly cyclic compounds. III. Anthrylmercapturic acid 1229
Boyland, E. and Levi, A. A. The isolation of methylmalonic acid from rat urine 2007
Boyland, M. E. see Boyland, E.
Brain cortex, respiratory quotient of (Dickens) 661
Brain, human, behaviour of kephalin from, towards acids and bases (Spiegel-Adolf) 1536
Brain metabolism (Weil-Malherbe) 665
INDEX

Cation content of erythrocytes of rabbit’s blood in hyper- and hypo-tonic sera (Davson) 391

Cation content of normal and anaemic bloods (Maizels) 821

Cats, ionic equilibrium between aqueous humour and blood plasma of (Davson, Duke-Elder and Benham) 773

Cattle of typical English breeds, variations in carotene and vitamin A values of milk fat (butter) of (Gillam, Heilbron, Ferguson and Watson) 1728

Cell division, effects of colchicine and related substances on (Brues and Cohen) 1383

Cell wall of plants, analysis of carbohydrates of (Angell, Norris and Reach) 2146

Cellular metabolism, effect of selenium on (Potter and Elvehjem) 189

Cellulose, association of xylan with, in certain structural celluloses (Norman) 2054

Cellulose, decomposition of, in the activated sludge process and in percolating filters (Jenkins) 497

Celluloses, structural, association of xylan with celluloses in (Norman) 2054

Centrifuge method, ultrafiltration and concentration by ultrafiltration by (Brinkman and van Steinfuorn) 1523

Cereal diets, role of inorganic phosphorus in calcification on (Lowe and Steenboek) 1126

Cereals and rickets (Lowe and Steenbock) 1126, 1991; (Thomas and Steenbock) 177

Cereals, flavin and vitamin B1 in (Copping) 849

Cereals, ungerminated, sulphurated hydrogen as a factor in determination of free and bound amylase in (Chrzascz and Janicki) 342

Cerebral cortex, carbohydrate catabolism in (Dixon) 1479, 1483

Chalmers, J. G. and Peacock, P. R. Further evidence regarding the elimination of certain poly cyclic hydrocarbons from the animal body 1242

Channon, H. J. and Smith, J. A. B. The dietary prevention of fatty livers. Triethyl-β-hydroxyethylammonium hydroxide 115

Channon, H. J. and Wilkinson, H. The effect of various fats in the production of dietary fatty livers 1033

Channon, H. J. see also Breston, A. W.

Charcoal, nortile, reversible oxidation of ascorbic acid by means of (Fox and Levy) 208

Charcoal, use of, in estimation of sugars in mangold leaf (van der Plank) 457

Charles, A. F. and Scott, D. A. Studies on heparin. IV. Observations on the chemistry of heparin 1927

Chase, D. see Taylor, F. H. L.

Chibnall, A. C., Pyzer, S. H. and Williams, E. F. The fatty acids of pheno sin and kerosin 100

Chick embryo, cathepsin in (Mystkowski) 765

Chicks, polyneuritic, lactic acid metabolism in tissues from (Sherman and Elvehjem) 785

Chloride in body fluids, determination of, by direct titration (Rose) 1140

Chloride, new iodimetric procedure for estimation of, in small amounts of blood (Haslewood and King) 902

Chlorine-containing mould metabolic products, geodin and erdin (Raistrick and Smith) 3115

“Cholesterol” fatty liver, respiration and ketogenesis in (Cook and Edson) 1637

Cholesterol feeding and fat metabolism (Cook) 1630

Cholesterol, influence of changes induced by, upon calcification in vitro of rabbit aorta (Law and Robison) 69

Choline, colorimetric method for determination of, in small amounts (Beattie) 1504

Choline ester formation in tissues in vitro (Quastel, Tenenbaum and Wheatley) 1668

Chondrus crispus, seasonal variations in (Butler) 1338

Chromatographic adsorption, isomerisation of carotenes by (Gillam and el Rid) 1735

Chronic acid under reduced pressure, determination of carbon and nitrogen by action of (Acharya) 241

Chronic oxidation of nitrogenous substances, structure in relation to (Acharya) 1026

Chromogenic function of ppocyanus-fluorescens group, in relation to classification (Turffitt) 1323

Chrzascz, T. and Janicki, J. Sulphurated hydrogen as a factor in the determination of free and bound amylase in ungerminated cereals 342

Chrzascz, T. and Janicki, J. Amylase during the growth and ripening of grains 1298

Giri, K. V. and Datta, N. C. Brain phosphatase 1089
Girsavieus, J. see Friedmann, E.
Gladiolus, floral parts of, relative distribution of phosphorus and phosphatase activity in (Ignatiou) 1815
Gland, active mammary, in vitro, lactose synthesis from a glucose-galactose mixture or phosphoric esters, by slices of (Grant) 2027
Gland, mammary, effect of prolactin on lactose synthesis by (Grant) 2027
Glass, pyrex, and stainless steel, filter of, for use with Seitz filter-pads (Knight and Fildes) 1138
Glass, V. see Wooldridge, W. R.
Glialin, yield of proline from (Town) 1837
Globulin, new, from the cashew nut (Damodaran and Sivaswamy) 604
Globulins, normal horse serum, micro-potentiometric titrations of (Ogston) 1845
Glock, G. E. An investigation of the rates of digestion of starches and glycogen and the bearing on the chemical constitution. I. Action of amylases on starches and glycogen 1386
Glock, G. E. An investigation of the rates of digestion of starches and glycogen and the bearing on the chemical constitution. II. Liver amylase 2313
d-Glucos-ascorbic acid, reversible enzyme oxidation of (Zilva) 1215
Glucose, aerobic breakdown of, by Bact. suboxydans (Butlin) 1870
Glucose dissimilation by propionic acid bacteria, manifolds of (Wood and Werkman) 618
Glucose-galactose mixture, lactose synthesis from, by slices of active mammary gland in vitro (Grant) 2027
Glucose, methods for estimation of, in the leaf of the mangel (van der Plank) 457
α- and β-Glucose, rates of fermentation of (Hopkins and Roberts) 76
β-Glucosides, sources of error in polarimetric examination of enzymic hydrolysis of (Veibel and Eriksen) 163
Glucuronic acid, biochemistry and physiology of (Pr defy and Williams) 794, 799
Glutamic acid, dissociation constants of (Neuberger) 2085
Glutamic acid in brain, metabolism of (Weil-Malherbe) 665
Glutamine, synthesis of peptides containing (Harlington and Mead) 1598
Glutathione content of stored and sprouting potatoes, changes in (Pett) 1228
Glutathione, oxidation of lecithin and other fatty substances, in presence of (Tait and King) 295
Glutathione, relations between ascorbic acid and (Hopkins and Morgan) 1446
Glycerol, utilisation of CO₂ in dissimilation of, by propionic acid bacteria (Wood and Werkman) 48
Glyceroxophosphates of human erythrocytes (Schonrover) 1097
α-Glyceroxophosphate dehydrogenase (Green) 629
α-Glyceroxophosphoric acid and brain metabolism (Johnson) 33
Glycine, micro-determination of, in protein hydrolysates (Town) 1833
Glycine, oxidation of, by hypochlorite (Norman) 484
Glycogen formed after ingestion of galactose by fasted rabbits, molecular structure of (Bell) 1612
Glycogen from whole tissues of Mytilus edulis, molecular structure of (Bell) 2144
Glycogen, liver (Bell) 1612
Glycogen, rate of digestion of (Glock) 1386, 2313
Glycogen solutions, osmotic pressure of (Oakley and Young) 868
Glycogen storage, importance of “pantothenic acid” in (Williams, Mosher and Rohman) 2036
Glycogenase, liver (Hodgson) 542
Glycolytic activity, separation of glycolalase activity and, by means of radium radiation (Crabtree) 1622
Glynn, H. E. see Bacharach, A. L.
Glyoxalase activity, separation of glycolalase activity and, by means of radium radiation (Crabtree) 1622
Goddy, H. K. and Stackey, R. S. On the action of parathormone. II 269
Godden, W. see Duckworth, J.
Goedbloed, J. The influence of concentrated potassium thiocyanate solutions on the structure and the volume of the vitreous body 2073
Goldschmidt, S. see Roughton, F. J. W.
Gonadectomised rats, male and female, effects of trenedehyandrosterone on (Korenchesky and Dennison) 1514
Gooseberry, Indian, tannin with protective action on ascorbic acid from (Damodaran and Nair) 1014
Gough, George Aleck Crocker, Obituary notice of 743
HAEMOGLOBIN

GRABAR, P. see ELFORD, W. J.
Grains, amylase during growth and ripening of
(Chrzaszcz and Janicki) 1298

ROBINSON, R. see also LAW, K. A. O.
ROBSON, W. see HILL, E. M.
ROE, E. see MAYNARD, W. V.
ROHRMAN, E. see WILLIAMS, R. J.
Root nodule bacteria of leguminous plants (Virtanen and Laime) 377
ROSCOE, M. H. The B-vitamins in human urine 1053
ROSE, C. F. M. The determination of chloride in body fluids by direct titration 1140
ROSENHEIM, A. H. see ROBINSON, R.
ROUGHTON, F. J. W., ADAIR, G. S., BARcroft, J., GOLDSCHMIDT, S., HERZEL, W., HILL, R. M., KEYS, A. B. and RAY, G. B. The thermochemistry of the oxygen-haemoglobin reaction. II. Comparison of the heat as measured directly on purified haemoglobin with that calculated indirectly by the Van’t Hoff isochore 2117
RUDRA, M. N. Distribution of vitamin C in different parts of common Indian food-stuffs 701
Ruminant, digestibility of dietary protein in (Hutchison and Morris) 1852; 1695
Ruminant, fasting and realimentation in (Aylward and Blackwood) 1819
RYDIN, A. see JOSEPHSON, B.
Rye grass, composition of (Norman) 1354
INDEX 2355

Salivary amylase, effect of halogen salts on (Clifford) 2049
Salmon eggs, ripening, changes in fat of (Lovern) 20
Salpinopsis, floral parts of, relative distribution of phosphorus and phosphatase activity in (Ignatoff) 1815
Salts, halogen, effect of, on salivary and pancreatic amylase (Clifford) 2049
SantÉ, C. Carcinogenic action and absorption and fluorescence spectra of I:2-benzpyrene 704
Sanson, F. W. and Zilva, S. S. Polyploidy and vitamin C 54
Sarcoma, Jensen rat, identity of indophenol-reducing substance in (Kellie and Zilva) 1216
Sastri, B. N. see Ranganathan, V.
Schlesinger's reaction for urobilin (Naumann) 347
Schenk, K. Studies on carotenoids. III. An isomeride of lutein isolated from the furze (Ulex europaeus) 1960
Schenk, K. and Mesquta, B. Studies on carotenoids. IV. The carotenoids of Genista tinctoria 1966
Schoenhieder, F. The quantitative determination of vitamin K. I 890
Schoenhieder, F. see also DAM, H.
Schoonover, J. W. Enzymes in cancer. II. The glycerophosphatases of human erythrocytes 1097
Scott, D. A. see Charles, A. F.
Scoury, role of vitamin C in animals resistant to (Daoud and el Ayyadi) 1280
Seed-cost of Bertolletia excelsa, constitution of (Noswell) 971
Seedling, pea, nitrogen metabolism of (McKie and Barnett) 1010
Seitz filter-pads, filter of pyrex glass and stainless steel for use with (Knight and Fildes) 1138
Selenite, sodium, rate of oxygen uptake in living yeast in presence of (Potter and Elvehjem) 189
Selenium, effect of, on cellular metabolism (Potter and Elvehjem) 189
Senior, B. J. see Gillam, A. E.
Sera, hyper- and hypo-tonic, cation content of erythrocytes of rabbit's blood in (Davson) 391
Serum albumin, separation of, into two fractions (Hewitt) 2229
Serum, blood, estimation of reduced ascorbic acid in (Taylor, Chase and Faulknor) 1119
Serum calcium of normal and adenectomised rats, effect of parathyroid hormone upon (Pugsley and Collip) 1274
Serum calcium, partition of (Duckworth and Godden) 1560
Serum globulins, normal horse, micro-potentiometric titrations of (Ogston) 1845
Serum, human, amino-groups of proteins of (Dullère) 770
Serum lipoids, blood, in cancer and other cases (Barber) 1463; (Woodward) 1467
Serum, normal horse, ultrafiltration studies with (Elford, Grabar and Fischer) 92
Serum proteins, compounds of, with polysaccharides (Janicki and Kasprzyk) 1526
Sewage oxidations, activated, factors influencing rate of (Wooldridge and Standfast) 155
Sewage oxidations, role of enzymes in (Wooldridge and Standfast) 1542
Sewage, use of Barcroft differential manometer in estimation of oxygen absorption of (Wooldridge and Standfast) 141
Sex hormones, male, activation of (Miescher, Wettstein and Tschopp) 1970, 1977
Sexual hormones, assay and effect of testosterone on rats compared with those of other (Korenchesky, Dennison and Bovain) 558
Sexual skin of monkeys, occurrence of an oestrogenic substance in (Fisher, Krohn and Zuckerman) 2219
Shackleton, L. and McCance, R. A. The ionisable iron in foods 582
Sherman, W. C. and Elvehjem, C. A. In vitro studies on lactic acid metabolism in tissues from polyneuritic chicks 785
Shorland, F. B. and McIntosh, I. G. New Zealand fish oils. I. The composition of eel oil (Anguilla aucklandi) 1775
Shorland, F. B. and Wall, E. M. A rapid method for the estimation of total iron in blood 1047
Shorland, F. B. and Wall, E. M. The action of certain reagents on the "loosely bound" iron in blood 1049
Shorthorn and Guernsey butter, comparison of vitamin D contents of (Kon and Henry) 776
Shrikhande, J. G. The production of mucus during the decomposition of plant materials. III. The effect of partially aerobic and anaerobic conditions 1789
Silk worm, tyrosine metabolism of (Holtzmann) 28
Singh, B. N. and Mathur, P. B. A constant-volume apparatus for gas analysis 321
Singh, B. N. and Mathur, P. B. A manometer for comparative study of physiological processes 323
Sivaswamy, T. G. see Damodaran, M.
Skim milk, ultracentrifugal and electrophoretic study of (Pedersen) 948
Skin lesion, two types of, occurring in vitamin B6, deficiency in the rat in relation to deficiency of flavin and vitamin B2, respectively (Copping) 845
Skin, sexual, of monkeys, occurrence of an oestrogenic substance in (Fisher, Krohn and Zuckerman) 2219
Sludge, activated, oxidations, role of enzymes in (Wooldridge and Standfast) 1542
Sludge, oxidation of (Wooldridge and Standfast) 149
Sludge oxidations, activated, factors influencing rate of (Wooldridge and Standfast) 155
Sludge process, activated, decomposition of cellulose in (Jenkins) 497
Sludge-sewage systems (Wooldridge and Standfast) 149
Smith, G. see Raisbeck, H.
Smith, J. A. B. see Channon, H. J. and Parry, T. W.
INDEX

Soil bacterium, production of free sulphur from L-cystine by (Barber and Burrows) 599
Spectra, absorption and fluorescence, of 1,2-benzpyrene (Sanné) 704
Spectra, absorption, of oestrone and related compounds in alkaline solution (Callow) 1975
Spectra, absorption, of sterols from various natural sources (Gillam and Heilbron) 1253
Spectra, absorption, of tyrosine, tryptophan and their mixtures (Holiday) 1795
Spectra, ultraviolet absorption, deductions as to chemical nature of vitamin B₁ from (Heyroth and Loofbourrow) 651
Spectra, ultraviolet absorption, of guanine hydrolytic products (McFarlane) 1189
Spectral absorption of the blue solution, relation between tintometer readings and, in the antimony trichloride reaction for vitamin A (Notevarp and Weeden) 1705
Spectrophotometry of proteins (Holiday) 1795
Spectrum, fluorescence, of 1,2-benzpyrene (Mayeord and Roe) 707
Spectrum, ultraviolet, of haemoglobin and its derivatives (Adams) 2016
SPIEGEL-ADOLF, M. Physical chemistry of lipoids. V. Behaviour of kephalin from human brain towards acids and bases 1536
Sprouted wheat, proteolytic enzymes of (Mounfield) 1778
Sreesivasay, M. see BHAGVAT, K.
SRINIVASAN, M. Ascorbic acid oxidase from drumstick, Moringa pterygosperma 2077
Stacey, R. S. see GOADBY, H. K.
STANDFAST, A. F. B. see WOODRIDGE, W. R.
Staphylococcus aureus, S. see SYLVESTER, N. D.
Starch, determination of, in plant tissue, with particular reference to the apple fruit (Hanes) 168
Starch, kinetics of action of α- and β-amylases on (Freeman and Hopkins) 446
Starch, mechanism of degradation of, by amylases (Freeman and Hopkins) 442, 446, 451
Starches, rates of digestion of (Glock) 1386, 2313
Stark, F. J. The effect of fumarate on the respiration of liver and kidney tissue 2257
Starvation, endogenous nitrogen excretion in, in the ruminant (Hutchinson and Morris) 1682
Steel, stainless, filter of pyrex glass and, for use with Seitz filter-pads (Knight and Fildes) 1138
STEEBROOK, H. see LOWE, J. T. and Thomas, B. H.
van Steinhoorn, J. see BRINKMAN, R.
Stephenson, M. and Yudkin, J. Galactomannan considered as an adaptive enzyme 506
Sterols from various natural sources, absorption spectra of (Gillam and Heilbron) 1253
Sterols, isolation of, from unsaponifiable matter of cocksfoot (Pollard) 382
Stewart, C. P. see DAVIDSON, J. N.
Stone, R. W., Wood, H. G. and WERKMAN, C. H. Activation of the lower fatty acids by propionic acid bacteria 624
Strontium salts, deposition of, in hypertrophic cartilage in vitro (Robison, Law and Rosenheim) 66
Substrate competition in liver (Edson) 1862
Sucinate, effect of, on tumour respiration (Boyland and Boyland) 224
Sucrose, methods for estimation of, in the leaf of the mangold (van der Plank) 457
Sugar analysis, use of some micro-organisms in (Nicholson) 1804
Sugars, hydrolysable, in urine, effect of certain "type meals" on (Harding, Nicholson and Jackson) 338
Sugars, estimation of, in the leaf of the mangold (van der Plank) 457
Sugars, fermentable "free", and fermentable sugars produced on hydrolysis in "fasting" urines, nature of (Harding, Nicholson and Archibald) 326
Sugars, kinetics of alcoholic fermentation of, by brewer's yeast (Hopkins and Roberts) 76
Suphate, determination of (Owen) 352
 Sulphate, ethereal, excretion of, by the rabbit following administration of phenylglucosides (Pryde and Williams) 794
 Sulphide as factor in determination of free and bound amylose in ungerminated cereals (Chrzascz and Janicki) 342
 Sulphur, free, production of, from L-cystine by a soil bacterium (Barber and Burrows) 599
 Sulphur metabolism (Medes) 1293; (Medes and Padis) 941
 Suprarenal cortex, so-called virtual adrenaline of (Devine) 1768
 SYLVESTER, N. D. see LAMPITT, L. H.
 SYM, E. A. Action of esterase in the presence of organic solvents 609
 Synthesis by urease, structure of urea with reference to its (Fearn) 1652
 TAGE-HANSEN, E. see DAM, H.
 TAIT, H. and King, E. J. The oxidation of lecithin and other fatty substances in the presence of glutathione 285
 Tankó, B. Hexosephosphates produced by higher plants 692
 Tannin from the Indian gooseberry with a protective action on ascorbic acid (Damodaran and Nair) 1014
 TANSLY, K. The effect of vitamin A deficiency on the development of the retina and on the first appearance of visual purple 889
 TASMAN, A. and BRANDWYNE, A. C. Experiments on metabolism with C. diptheriae 1756
 TATUM, E. L., PETERSON, W. H. and Freed, E. B. Enzymic racemisation of optically active lactic acid 1892
 Teeth, chemical composition of (Bowes and Murray) 977; (Murray) 1567
 Temperature, effect of rise in, on carbohydrate catabolism of cerebral cortex (Dixon) 1483
INDEX

Ultracentrifugal studies on milk proteins (Pedersen) 945, 961
Ultracentrifugal separation and concentration by ultracentrifugal analysis (Brinkman and van Steinhoorn) 1523
Ultraviolet absorption spectra, deductions as to chemical nature of vitamin B₁₂ from (Heylroth and Lootsbourrow) 651
Ultraviolet absorption spectra of guanine hydrolytic products (McFarlane) 1189
Ultraviolet spectrum of haemoglobin and its derivatives (Adams) 2184
Urea, blood, error due to blood arginase in urease method for determination of (Anderson and Tomsett) 1572
Urea, conductometric method for micro-determination of (Ranganathan and Sastri) 2135
Urea, structure of, with reference to its deamination and synthesis by urease (Fearon) 1652
Urea method for determination of blood urea, error due to blood arginase in (Anderson and Tomsett) 1572
Urea, structure of urea with reference to its deamination and synthesis by (Fearon) 1652
Uric acid in the avian organism, hypoxanthine as an intermediary metabolite in synthesis of (Edson, Krebs and Model) 1386
Uric acid, micro-determination of (Edson and Krebs) 732
Urinary output of thioupsate and ascorbic acid, relation between diet and (Heinemann) 2299
Urine, amount of ascorbic acid in (van Eekelen) 2291
Urine, human, B-vitamins in (Roscoe) 1053
Urine, human, excretion of vitamin C in (Ahmad) 11
Urine, human pregnancy, isolation and identification of a combined form of oestriol in (Cohen and Marrian) 87
Urine, human pregnancy, presence of an acid-hydrolysable combined form of pregnadiol in (Odell and Marrian) 1653
Urine, micro-determination of bromide with application to, and observations on the normal human subject (Conway and Flood) 716
Urine, new test for bilirubin in (Naumann) 762
Urine, normal, quantitative determination of cystine in (Medes) 1293
Urine of lactating rats, effect of weaning upon excretion of calcium in (Pugley) 1271
Urine of pregnant mares, isolation of oestrone and equin from (Beall and Edson) 577
Urine, quantitative determination of cystine in (Medes and Pachis) 941
Urine, quantitative determination of uroboil and uroboiligen in (Naumann) 1021
Urine, rat, isolation of methylmalonic acid from (Boyland and Levi) 2007
Urine, simple micro-test for acetone in (Barrett) 888
Urine, sulphates in, conditions necessary for precipitation of benzidine sulphate, with reference to estimation of (Owen) 352
Urine, "fasting", nature of "free" fermentable sugars and fermentable sugars produced on hydrolysis in (Harding, Nicholson and Archibald) 326
Urine, normal, properties of reducing material in certain fractions of (Harding, Nicholson and Archibald) 326; (Harding, Nicholson and Jackson) 335
Urine with low acetic acid content, use of phosphenugastic acid method of determining acetic acid in (Medes) 1753
Urobilin, quantitative determination of, in urine and faeces (Naumann) 1021
Urobilin, Schlesinger's reaction for (Naumann) 347
Urobiligenin, Ehrlich's test for (Naumann) 347
Urobiligenin, quantitative determination of, in urine and faeces (Naumann) 1021
Uronic acids, determination of pentoses in mixtures containing (Angell, Barcroft, Goldschmidt, Herkel, Hill, Keys and Ray) 2117
Vegetable fibres, composition of (Norman) 831
Virtanen, A. I. and Laane, T. Investigations on the root nodule bacteria of leguminous plants. XVIII. Breakdown of proteins by the root nodule bacteria 377
Virtanen, A. I. and Laane, T. Investigations on the amino-acids of plants. I. Tryptophan content of leguminous plants at different stages of growth 1509
Visual purple, effect of vitamin A deficiency on first appearance of (Tansey) 839
Vitamin A and carotene administered in different media, utilisation of, by the rat (Coward) 1878
Vitamin A content of human colostrum and milk (Dann) 1644
Vitamin A deficiency, effect of, on development of the ratina and on first appearance of visual purple (Tansey) 839
Vitamin A, determination of, by means of its influence on vaginal contents of the rat (Hohlweg and Dohn) 932
Vitamin A determinations, accuracy of (Coward) 2009
Vitamin A, distribution of, between light petroleum and aqueous methyl alcohol (Gillam and Senior) 1249
Vitamin A, spectrographic studies on the antimony trichloride reaction for (Note and Weeden) 1705
Vitamin A, transmission of, from parents to young in mammals (Dann) 1644
woods, determination of lignin in analysis of (bamford and campbell) 419
woodward, l. a. investigations of blood-serum lipoids in cancer and other cases. ii. ultraviolet absorption measurements 1467
wooldridge, w. r., knox, r. and glass, v. variability in the activity of bacterial enzymes. i. the effect of the age of the culture 926
wooldridge, w. r. and standfast, a. f. b. the use of the barcroft differential manometer in the estimation of the oxygen absorption of sewage 141
wooldridge, w. r. and standfast, a. f. b. some experiments on the oxidation of sludge and sludge-sewage systems 149
wooldridge, w. r. and standfast, a. f. b. certain factors that influence the rate of activated sludge and sewage oxidations 156
wooldridge, w. r. and standfast, a. f. b. the role of enzymes in activated sludge and sewage oxidations 1542
wooldridge, w. r. see also corbet, a. s.
woormall, a. see gaunt, w. e.
wright, n. c. the action of hypochlorites on amino-acids and proteins. the effect of acidity and alkalinity 1661
wright, n. c. see also howat, g. r.
wyndham, r. see lembert, r.

xanthine oxidase, liver (roberts) 2166
xylan, association of, with cellulose in certain structural cellulosces (norman) 2054

yeast, brewer's, kinetics of alcoholic fermentation of sugars by (hopkins and roberts) 78
yeast grown in cyanide (pett) 1438
yeast, living, phosphorylation in (macfarlane) 1369
yeast, living, rate of oxygen uptake by, in presence of sodium selenite (potter and elvehjem) 189
yeast, use of, in estimation of sugars in mangold leaf (van der plank) 457
yellow respiratory enzyme, some physico-chemical characteristics of (kekwick and pedersen) 2201
young, f. g. a note on the identity of the indophenol-reducing substances in brain tissue 1883
young, f. g. see also oakley, h. b.
young, l. the determination of phytic acid 252
yudkin, j. see stephenson, m.

zilva, s. s. the effect of incomplete diets on the concentration of ascorbic acid in the organs of the rat 857
zilva, s. s. a note on the reversible enzymic oxidation of d-glucos-ascorbic acid 1215
zilva, s. s. vitamin c requirements of the guinea-pig 1419
zilva, s. s. see also kellie, a. e. and sansome, f. w.
zuckerman, s. see fisher, r. b.
zwemer, r. l. see truszkowski, r.
