CAMBRIDGE, ENGLAND
SIR WILLIAM BATE HARDY

COLLECTED SCIENTIFIC PAPERS

PUBLISHED UNDER THE AUSPICES OF THE COLLOID COMMITTEE OF THE FARADAY SOCIETY

20 plates. 63s. net

Of Hardy the late Sir Hugh Anderson said “Hardy once observed a cell divide under a microscope, and wondered why.” This is the Key to the investigations on physico-chemical properties of the proteins and the behaviour of matter in the boundary state, which formed his scientific life-work.

ANAHÆMIN
The active hæmatopoietic principle of liver

The hæmatopoietic activity of Anahæmin, as first described by Dakin and West (Journ. Biol. Chem. 1935, cix., 489) is considerably greater than that of any previously described principle of liver.

Evidence to this effect has been furnished recently in the report of the clinical trial arranged by the Medical Research Council (Lancet, February 15th, 1936, p. 349).

Anahæmin B.D.H. is available for clinical use, and is issued in solution in ampoules (100 mgm. per c.c.) for intramuscular and for intravenous injection.

The Institute of Chemistry of Great Britain and Ireland

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with definite authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar.

All communications to be addressed to the Registrar

NUTRITION ABSTRACTS & REVIEWS
ISSUED UNDER THE DIRECTION OF
THE IMPERIAL AGRICULTURAL BUREAUX COUNCIL, THE MEDICAL
RESEARCH COUNCIL AND THE REID LIBRARY

JOHN BOYD ORR
Imperial Bureau of Animal Nutrition,
Aberdeen

HARRIETTE CHICK
Lister Institute,
London

The Editors, in co-operation with Corresponding Editors abroad, scrutinize upwards of 550 periodicals and, with the assistance of a competent panel of abstractors, issue abstracts of papers published throughout the world dealing with the subject of Nutrition in all its aspects.

The abstracts are conveniently arranged in three main sections: (1) Chemistry and Physiology of Nutrition, (2) Human Diet in Relation to Health and Disease, and (3) Feeding of Domestic Animals. These sections are designed to meet the requirements respectively of the research worker, the medical practitioner and dietician, and the practical farmer.

Four numbers appearing in July, October, January and April of each year constitute a Volume, the subscription price for which is at present 21s. Volume VI, appearing in July, 1936, will, however, be issued at £2. 2s. od., and from June 1, 1936, this price will apply to all Volumes, including back numbers.

Subscriptions may be paid through any bookseller or direct to
