

**Review**

Nucleocytoplasmic transport  
by P.S. Agutter and D. Prochnow

609–618

**Research Communications**

The localization of phospholipase A<sub>2</sub> in the secretory granule

S.P. Chock, E.A. Schmauder-Chock, E. Cordella-Miele,  
L. Miele and A.B. Mukherjee **619–622**

Evidence for two distinct  $\alpha(1,2)$ -fucosyltransferase genes  
differentially expressed throughout the rat colon

J.-P. Piau, N. Labarriere, G. Dabouis and M.G. Denis **623–626**

Differences in methotrexate and 7-hydroxymethotrexate inhibition of  
folate-dependent enzymes of purine nucleotide biosynthesis

J.E. Baggott, S.L. Morgan and W.H. Vaughn **627–629**

Inhibition of the translocation of GLUT1 and GLUT4 in 3T3-L1 cells  
by the phosphatidylinositol 3-kinase inhibitor, wortmannin

J.F. Clarke, P.W. Young, K. Yonezawa, M. Kasuga and  
G.D. Holman **631–635**

Heterogeneity of caffeine- and bradykinin-sensitive Ca<sup>2+</sup> stores in  
vascular endothelial cells

W.F. Graier, S. Simecek, D.K. Bowles and M. Sturek **637–641**

**Research Papers****Proteins**

Controlling the speed of hirudin folding

J.-Y. Chang **643–650**

Affinity of chaperonin-60 for a protein substrate and its modulation  
by nucleotides and chaperonin-10

R.A. Staniforth, S.G. Burston, T. Atkinson and A.R. Clarke **651–657**

Refolding of denatured lactate dehydrogenase by *Escherichia coli*  
ribosomes

S. Chattopadhyay, B. Das, A.K. Bera, D. Dasgupta and  
C. Dasgupta **717–721**

Modulation of crystal formation by bone phosphoproteins:  
structural specificity of the osteopontin-mediated inhibition of  
hydroxyapatite formation

G.K. Hunter, C.L. Kyle and H.A. Goldberg **723–728**

Characterization of binding and structural properties of rat liver  
fatty-acid-binding protein using tryptophan mutants

A.E.A. Thumser and D.C. Wilton **827–833**

M1 protein and Protein H: IgGFc- and albumin-binding streptococcal  
surface proteins encoded by adjacent genes

P.Åkesson, K.-H. Schmidt, J. Cooney and L. Björck **877–886**

**Enzymes**

Cloning of a 72 kDa matrix metalloproteinase (gelatinase) from  
chicken embryo fibroblasts using gene family PCR: expression of  
the gelatinase increases upon malignant transformation

R.T. Aimes, D.L. French and J.P. Quigley **729–736**

The role of Glu-60 in the specificity of the recombinant ribonuclease  
from *Bacillus amyloliquefaciens* (barnase) towards dinucleotides,  
poly(A) and RNA

K. Bastyns, M. Froeyer, G. Volckaert and Y. Engelborghs **737–742**

The effect of replacing the conserved active-site residues His-264,  
Asp-312 and Arg-314 on the binding and catalytic properties of  
*Escherichia coli* citrate synthase

W.-J. Man, Y. Li, C.D. O'Connor and D.C. Wilton **765–770**

Substrate- and species-specific processing enzymes for chloroplast  
precursor proteins

Q. Su and A. Boschetti **787–792**

Structure of chymopapain M the late-eluted chymopapain deduced  
by comparative modelling techniques and active-centre  
characteristics determined by pH-dependent kinetics of catalysis  
and reactions with time-dependent inhibitors: the Cys-25/His-159  
ion-pair is insufficient for catalytic competence in both  
chymopapain M and papain

M.P. Thomas, C.M. Topham, D. Kowlessur, G.W. Mellor,  
E.W. Thomas, D. Whitford and K. Brocklehurst **805–820**

Peptidyl prolyl *cis*–*trans*-isomerase activity associated with the  
lumen of the endoplasmic reticulum

S. Bose and R.B. Freedman **865–870**

The characterization of a cyclophilin-type peptidyl prolyl *cis*–*trans*-  
isomerase from the endoplasmic-reticulum lumen

S. Bose, M. Mücke and R.B. Freedman **871–875**

**Carbohydrates and lipids**

The effect of iron overload on rat plasma and liver oxidant status  
*in vivo*

A.J. Dabbagh, T. Mannion, S.M. Lynch and B. Frei **799–803**

Synthetic glycosylation of proteins using <i>N</i> -( $\beta$ -saccharide) iodoacetamides: applications in site-specific glycosylation and solid-phase enzymic oligosaccharide synthesis	S.Y.C. Wong, G.R. Guile, R.A. Dwek and G. Arsequell	843–850
<b>Gene structure and expression</b>		
Interactions between the <i>Escherichia coli</i> MelR transcription activator protein and operator sequences at the <i>melAB</i> promoter	J. Williams, C. Michan, C. Webster and S. Busby	757–763
Identification of a second protein product of the gene encoding a human epidermal autoantigen	S.B. Hopkinson and J.C.R. Jones	851–857
<b>Regulation of metabolism</b>		
Role of protein synthesis and of fatty acid metabolism in the longer-term regulation of pyruvate dehydrogenase kinase	D.A. Priestman, S.C. Mistry, A. Halsall and P.J. Randle	659–664
Evidence against direct involvement of phosphorylation in the activation of carnitine palmitoyltransferase by okadaic acid in rat hepatocytes	M. Guzman, M.P. Kolodziej, A. Caldwell, C.G. Corstorphine and V.A. Zammit	693–699
Regulation of oxidative degradation of L-lysine in rat liver mitochondria	P.W.D. Scislawski, A.R. Foster and M.F. Fuller	887–891
<b>Membranes and bioenergetics</b>		
Ca <sup>2+</sup> release by inositol 1,4,5-trisphosphate is blocked by the K <sup>+</sup> -channel blockers apamin and tetrapentylammonium ion, and a monoclonal antibody to a 63 kDa membrane protein: reversal of blockage by K <sup>+</sup> ionophores nigericin and valinomycin and purification of the 63 kDa antibody-binding protein	F. O'Rourke, K. Soons, R. Flaumenhaft, J. Watras, C. Baio-Larue, E. Matthews and M.B. Feinstein	673–683
Analysis of the co-localization of the insulin-responsive glucose transporter (GLUT4) and the <i>trans</i> Golgi network marker TGN38 within 3T3-L1 adipocytes	S. Martin, B. Reaves, G. Banting and G.W. Gould	743–749
Functional characterization and chromosomal localization of a cloned taurine transporter from human placenta	S. Ramamoorthy, F.H. Leibach, V.B. Mahesh, H. Han, T. Yang-Feng, R.D. Blakely and V. Ganapathy	893–900
The kinetics of the oxidation of cytochrome <i>c</i> by <i>Paracoccus</i> cytochrome <i>c</i> peroxidase	R. Gilmour, C.F. Goodhew, G.W. Pettigrew, S. Prazeres, J.J.G. Moura and I. Moura	907–914
<b>Receptors and signal transduction</b>		
Ionomycin enhances Ca <sup>2+</sup> influx by stimulating store-regulated cation entry and not by a direct action at the plasma membrane	A.J. Morgan and R. Jacob	665–672
Decreased arachidonic acid metabolism in human platelets by autologous neutrophils: possible role of cell adhesion	B. Chabannes, P. Molière, Y. Pacheco and M. Lagarde	685–691
Agonist regulation of cellular G <sub>s</sub> $\alpha$ -subunit levels in neuroblastoma $\times$ glioma hybrid NG108-15 cells transfected to express different levels of the human $\beta$ 2 adrenoceptor	E.J. Adie and G. Milligan	709–715
Selective down-regulation of protein kinase C- $\epsilon$ by carcinogens does not prevent stimulation of phospholipase D by phorbol ester and platelet-derived growth factor	Z. Kiss and W.H. Anderson	751–756
Stimulation of glucose uptake by insulin-like growth factor II in human muscle is not mediated by the insulin-like growth factor II/mannose 6-phosphate receptor	B. Burguera, C.W. Elton, E.B. Tapscott, W.J. Pories, R. Dimarchi, K-i. Sakano and G.L. Dohm	781–785
Analysis of the adenylate cyclase signalling system, and alterations induced by culture with insulin, in a novel SV40-DNA-immortalized hepatocyte cell line (P9 cells)	C. Livingstone, C. MacDonald, B. Willett and M.D. Houslay	835–842
Aberrant <sup>3</sup> H labelling of ATP during <i>in vivo</i> labelling of Ehrlich mouse ascites tumour cells with [2- <sup>3</sup> H]inositol is significant in the study of isomers of InsP <sub>3</sub> and InsP <sub>4</sub>	S. Christensen, H. Harbak and L.O. Simonsen	859–863
Inhibition of calmodulin-dependent myosin light-chain kinase by growth-hormone-releasing factor and vasoactive intestinal peptide	H. Shiraga, D. Stallwood, M. Ebadi, R. Pfeiffer, D. Landers and S. Paul	901–905
<b>Cell biology and development</b>		
Nuclear localization of the ubiquitin-activating enzyme, E1, is cell-cycle-dependent	S.J. Grenfell, J.S. Trausch-Azar, P.M. Handley-Gearhart, A. Ciechanover and A.L. Schwartz	701–708

---

The size of the intracellular $\beta$ 1-integrin precursor pool regulates maturation of $\beta$ 1-integrin subunit and associated $\alpha$ -subunits	L. Koivisto, J. Heino, L. Häkkinen and H. Larjava	<b>771–779</b>
Characterization of liver stellate cell retinyl ester storage	G. Trøen, A. Nilsson, K.R. Norum and R. Blomhoff	<b>793–798</b>
Brefeldin A inhibits transport of the glycoporphin-binding protein from <i>Plasmodium falciparum</i> into the host erythrocyte	J. Benting, D. Mattei and K. Lingelbach	<b>821–826</b>
<b>BJ Letters</b>		
<i>Drosophila</i> xanthine dehydrogenase variants re-visited	W.A. Doyle and R.C. Bray	<b>915–916</b>
<i>Drosophila</i> xanthine dehydrogenase variants re-visited: a reply	R.K. Hughes	<b>917</b>
<b>Corrections</b>		
The steady-state rate equation for the general modifier mechanism of Botts and Morales when the quasi-equilibrium assumption for the binding of the modifier is made by R. Varón, M. García-Moreno, C. Garrido and F. García-Cánovas (volume 288, pages 1072–1073, 1992)		<b>919</b>
Met-8 of the $\beta$ <sub>1</sub> -bungarotoxin phospholipase A <sub>2</sub> subunit is essential for the phospholipase A <sub>2</sub> -independent neurotoxic effect by S.-T. Chu, C.-C. Chu, C.-C. Tseng and Y.-H. Chen (volume 295, pages 713–718, 1993)		<b>919</b>
Localization of the protein 4.1-binding site on human erythrocyte glycoporphins C and D by N.J. Hemming, D.J. Anstee, W.J. Mawby, M.E. Reid and M.J.A. Tanner (volume 299, pages 191–196, 1994)		<b>920</b>
