
ReviewNAD⁺-dependent formate dehydrogenase
by V.O. Popov and V.S. Lamzin

625–643

Research Communication

Reaction of peroxyntirite with oxyhaemoglobin: interference with photometrical determination of nitric oxide

K. Schmidt, P. Klatt and B. Mayer

645–647

Inhibition of the differentiation of human myeloid cell lines by redox changes induced through glutathione depletion

F. Esposito, V. Agosti, G. Morrone, F. Morra, C. Cuomo, T. Russo, S. Venuta and F. Cimino

649–653

Research Papers**Proteins**

Conformation and self-association of the peptide hormone substance P: Fourier-transform infrared spectroscopic study

L.-P. Choo, M. Jackson and H.H. Mantsch

667–670

Isolation and characterization of fibronectin- α_1 -microglobulin complex in rat plasma

C. Falkenberg, J.J. Enghild, I.B. Thøgersen, G. Salvesen and B. Åkerström

745–751

Enzymes

Multiple binding sites involved in the effect of choline esters on decarbamylation of monomethylcarbamoyl- or dimethylcarbamoyl-acetylcholinesterase

D.-E. Sok, Y.-B. Kim, S.-J. Choi, C.-H. Jung and S.-H. Cha

713–720

Fatty acid and phospholipid selectivity of different phospholipase A₂ enzymes studied by using a mammalian membrane as substrate

E. Diez, F.H. Chilton, G. Stroup, R.J. Mayer, J.D. Winkler and A.N. Fonteh

721–726

Purification and characterization of multiple forms of the pineapple-stem-derived cysteine proteinases ananain and comosain

A.D. Napper, S.P. Bennett, M. Borowski, M.B. Holdridge, M.J.C. Leonard, E.E. Rogers, Y. Duan, R.A. Laursen, B. Reinhold and S.L. Shames

727–736

Freeze-stable sialidase activity in human leucocytes: substrate specificity, inhibitor susceptibility, detergent requirements and subcellular localization

P.J. Waters, A.P. Corfield, R. Eisenthal and C.A. Pennock

777–784

Interactions of plant acetohydroxy acid isomeroreductase with reaction intermediate analogues: correlation of the slow, competitive, inhibition kinetics of enzyme activity and herbicidal effects

R. Dumas, C. Cornillon-Bertrand, P. Guigue-Talet, P. Genix, R. Douce and D. Job

813–820

Biochemical properties of recombinant human β -glucuronidase synthesized in baby hamster kidney cells

M.C. Gehrman, M. Opper, H.H. Sedlacek, K. Bosslet and J. Czech

821–828

Strategic manipulation of the substrate specificity of *Saccharomyces cerevisiae* flavocytochrome *b*₂

S. Daff, F.D.C. Manson, G.A. Reid and S.K. Chapman

829–834

Investigation of antigen–antibody interactions using a soluble, non-support-bound synthetic decapeptide library composed of four trillion (4×10^{12}) sequences

C. Pinilla, J.R. Appel and R.A. Houghten

847–853

Occurrence of two molecular forms of human acid sphingomyelinase

K. Ferlinz, R. Hurwitz, G. Vielhaber, K. Suzuki and K. Sandhoff

855–862

Antagonistic binding of substrates to 3-phosphoglycerate kinase monitored by the fluorescent analogue 2'(3')-O-(2,4,6-trinitrophenyl)adenosine 5'-triphosphate

M. Vas, A. Merli and G.L. Rossi

885–891

Drosophila melanogaster alcohol dehydrogenase: product-inhibition studies

J.-O. Winberg and J.S. McKinley-McKee

901–909

Carbohydrates and lipids

Properties of phosphatidate phosphohydrolase in rat adipose tissue

S.C. Jamdar and W.F. Cao

793–799

Gene structure and expression

- Dehydroepiandrosterone 3 β -sulphate is an endogenous activator of the peroxisome-proliferation pathway: induction of cytochrome *P*-450 4A and acyl-CoA oxidase mRNAs in primary rat hepatocyte culture and inhibitory effects of Ca²⁺-channel blockers P.A. Ram and D.J. Waxman **753–758**
- Genomic organization and chromosomal localization of the mouse synexin gene Z.-Y. Zhang-Keck, M. Srivastava, C.A. Kozak, H. Caohuy, A. Shirvan, A.L. Burns and H.B. Pollard **835–845**
- Glucocorticoids activate somatostatin gene transcription through co-operative interaction with the cyclic AMP signalling pathway J.-L. Liu, D.N. Papachristou and Y.C. Patel **863–869**
- Development and hormonal modulation of postnatal expression of intestinal alkaline phosphatase mRNA species and their encoded isoenzymes K.-Y. Yeh, M. Yeh, P.R. Holt and D.H. Alpers **893–899**
- Agonist-induced down-regulation of platelet-activating factor receptor gene expression in U937 cells L.-Y. Chau, K. Peck, H.-H. Yen and J.-Y. Wang **911–916**

Regulation of metabolism

- Regulation of the metabolism of lipoprotein–proteoglycan complexes in human monocyte-derived macrophages P. Vijayagopal **675–681**
- Enhancement of thrombin–thrombomodulin-catalysed protein C activation by phosphatidylethanolamine containing unsaturated fatty acids: possible physiological significance of phosphatidylethanolamine in anticoagulant activity of thrombomodulin S. Horie, H. Ishii, H. Hara and M. Kazama **683–691**
- Ascorbic acid increases drug accumulation and reverses vincristine resistance of human non-small-cell lung-cancer cells C.D. Chiang, E.-J. Song, V.C. Yang and C.C.-K. Chao **759–764**
- Effects of insulin and insulin-like growth factors on protein and energy metabolism in tumour-bearing rats F.M. Tomas, C.S. Chandler, P. Coyle, C.S. Bourgeois, J.L. Burgoyne and A.M. Rofe **769–775**
- The binding of lysophospholipids to rat liver fatty acid-binding protein and albumin A.E.A. Thumser, J.E. Voysey and D.C. Wilton **801–806**

Receptors and signal transduction

- Alteration of intracellular Ca²⁺ transients in COS-7 cells transfected with the cDNA encoding skeletal-muscle ryanodine receptor carrying a mutation associated with malignant hyperthermia S. Treves, F. Larini, P. Menegazzi, T.H. Steinberg, M. Koval, B. Vilsen, J.P. Andersen and F. Zorzato **661–665**
- Multi-site phosphorylation of the inhibitory guanine nucleotide regulatory protein G_i-2 occurs in intact rat hepatocytes N.J. Morris, M. Bushfield, B.E. Lavan and M.D. Houslay **693–702**
- The catalytic subunit of phosphatidylinositol 3-kinase is a substrate for the activated platelet-derived growth factor receptor, but not for middle-T antigen–pp60^{c-src} complexes S. Roche, R. Dhand, M.D. Waterfield and S.A. Courtneidge **703–711**
- Caffeine inhibits cytosolic calcium oscillations induced by noradrenaline and vasopressin in rat hepatocytes L. Combettes, B. Berthon and M. Claret **737–744**
- Phosphorylation of the human-transforming-growth-factor- β -binding protein endoglin P. Lastres, J. Martín-Perez, C. Langa and C. Bernabéu **765–768**
- Tetra fibrin, a novel non-peptide fibrinogen receptor antagonist, induces conformational changes in glycoprotein IIb/IIIa T. Satoh, W.C. Kouns, Y. Yamashita, T. Kamiyama and B. Steiner **785–791**
- Quantal Ca²⁺ mobilization by ryanodine receptors is due to all-or-none release from functionally discrete intracellular stores T.R. Cheek, M.J. Berridge, R.B. Moreton, K.A. Stauderman, M.M. Murawsky and M.D. Bootman **879–883**

Cell biology and development

- Expression of the calcium-binding proteins MRP8 and MRP14 in monocytes is regulated by a calcium-induced suppressor mechanism J. Roth, M. Goebeler, V. Wrocklage, C. van den Bos and C. Sorg **655–660**
- Ontogeny and plasma-membrane domain localization of amino acid transport system L in rat liver D.A. Novak, M.S. Kilberg and M.J. Beveridge **671–674**
- Cyclic AMP-dependent protein kinase in rat mammary tissue: expression of catalytic and regulatory subunits throughout pregnancy and lactation R.A. Gardner, M.T. Travers, M.C. Barber, W.R. Miller and R.A. Clegg **807–812**
- Epitope mapping of monoclonal antibodies to the paired helical filaments of Alzheimer's disease: identification of phosphorylation sites in tau protein M. Goedert, R. Jakes, R.A. Crowther, P. Cohen, E. Vanmechelen, M. Vandermeeren and P. Cras **871–877**

BJ Letters

Tumour rejection antigens of the hsp90 family (gp96) closely resemble tumour-associated heparanase enzymes	L.D. Graham	917–918
Tumour rejection antigens of the hsp90 family (gp96) closely resemble tumour-associated heparanase enzymes: Reply	G.L. Nicolson and M. Nakajima	918
Endo- β -D-glucuronidase (heparanase) activity of heat-shock protein/tumour rejection antigen gp96	P.K. Srivastava	919
