Research Communications

N-terminal fatty acylation of the α-subunit of the G-protein G1: only the myristilated protein is a substrate for palmitoylation

Mitogen inactivation of glycogen synthase kinase-3β in intact cells via serine 9 phosphorylation

Induction of the FK506-binding protein, FKBP13, under conditions which misfold proteins in the endoplasmic reticulum

Identification and characterization of ATPase activity associated with maize (Zea mays) annexins

Research Papers

Proteins

Role of N-glycosylation in the synthesis, dimerization and secretion of human interferon-γ

Complementary DNA sequencing of canine tissue factor pathway inhibitor reveals a unique nanomeric repetitive sequence between the second and third Kunitz domains

Enzymes

Properties of the yeast nuclear histone deacetylase

Purification and molecular characterization of the NAD+-dependent acetaldehyde/alcohol dehydrogenase from Entamoeba histolytica

Cellulose hydrolysis by the cellulases from Trichoderma reesei: adsorptions of two celllobiohydrolases, two endocellulases and their core proteins on filter paper and their relation to hydrolysis

Kinetic and physical studies of β-lactamase inhibition by a novel penem, BRL 42715

Changing the substrate specificity of penicillin G acylase from Klyvera citrophila through selective pressure

Identification of a region in protein C involved in thrombomodulin-stimulated activation by thrombin: potential repulsion at anion-binding site I in thrombin

Carbohydrates and lipids

Vesicle–micelle structural transition of phosphatidylinositol bisphosphoglycerol bilayers and Triton X-100

Erythrocyte catalase inactivation (H2O2 production) by ascorbic acid and glucose in the presence of aminotriazole: role of transition metals and relevance to diabetes

Mechanisms of hepatic phosphatidylinositol synthesis in adult rat: effects of pregnancy

β1-4N-Acetylgalactosaminyltransferase can synthesize both asialo-glycosphingolipid Galβ1-4Glc and glycosphingolipid Galβ1-4Glc in vitro and in vivo: isolation and characterization of a β1-4N-acetylgalactosaminyltransferase cDNA clone from rat ascites hepatoma cell line AH7974F

Gene structure and expression

Cloning and initial characterization of the promoter region of the rat cysteine-rich intestinal protein gene

Comparison of the effects of insulin and okadaic acid on phosphoenolpyruvate carboxykinase gene expression
Expression of ricin B chain in *Spodoptera frugiperda* | A. Frankel, H. Roberts, L. Atrin, J. Vesely and M. Willingham | 787–794

**Regulation of metabolism**

Hexokinase and glucokinase binding in permeabilized guinea-pig hepatocytes | L. Agius | 841–846

A 13C isotopomer n.m.r. method for monitoring incomplete a-oxidation of fatty acids in intact tissue | S.R. Gavva, A.J. Wiethoff, P. Zhao, C.R. Malloy and A.D. Sherry | 847–853

Protein kinase C phosphorylation of rat liver S-adenosylmethionine synthetase: dissociation and production of an active monomer | M.A. Pajares, C. Durán, F. Corrales and J.M. Mato | 949–955

**Membranes and bioenergetics**

N-Terminal protein sequence analysis of the rabbit erythrocyte lactate transporter suggests identity with the cloned monocarboxylate transport protein MCT1 | R.C. Poole and A.P. Halestrap | 755–759

Mechanism of interaction between actin and membrane lipids: a pressure-tuning infrared spectroscopy study | C. Ginquaud and P. Wong | 769–774

Characterization of a sodium-dependent concentrative nucleobase-transport system in guinea-pig kidney cortex brush-border membrane vesicles | D.A. Griffith and S.M. Jarvis | 901–905

The functional importance of the extreme C-terminal tail in the gene 2 organellar Ca**2+**-transport ATPase (SERCA2a/b) | H. Verboom, F. Wuytack, L. van den Bosch, L. Mertens and R. Casteels | 979–984

**Receptor and signal transduction**

Palmitoylation of multiple Src-family kinases at a homologous N-terminal motif | M. Koepl, P. Zlatkine, S.C. Ley, S.A. Courtneidge and A.I. Magee | 749–753

SmgGDS stabilizes nucleotide-bound and -free forms of the Rac1 GTP-binding protein and stimulates GTP/GDP exchange through a substituted enzyme mechanism | T.-H. Chuang, X. Xu, L.A. Quilliam and G.M. Bokoch | 761–767

Regulation of basal adenylate cyclase activity in neuroblastoma x glioma hybrid, NG108-15, cells transfected to express the human beta2 adrenoceptor: evidence for empty receptor stimulation of the adenylate cyclase cascade | E.J. Adie and G. Milligan | 803–808

Different zonal distribution of the asialoglycoprotein receptor, the alpha2-macroglobulin receptor/lown-density-lipoprotein receptor-related protein and the lipoprotein-remnant receptor of rat liver parenchymal cells | A.H. Voorschuur, J. Kuiper, J.A.M. Neelissen, W. Boers and T.J.C. Van Berkel | 809–816

Regulation of cytosolic calcium and insulin secretion by galanin and ATP receptors: interactions of pertussis-toxin-sensitive and -insensitive signalling pathways | J. Lang, F. Boulay, P. Parker, P. Gierschik and C.B. Wollelm | 885–891

**Cell biology and development**

Serum factors, growth factors and UDP-sugar metabolism in bovine articular cartilage chondrocytes | G.E. Ysart and R.M. Mason | 713–721
