
ReviewChemical nucleases as probes for studying DNA-protein interactions
by A.G. Papavassiliou**345-357****Biochemical Journal****Volume 305, part 2****15 January 1995**

Research Communications

Expression and DNA binding of the human 52 kDa Ro/SSA autoantigen

M.B. Frank, V.R. McCubbin and C. Heldermon

359-362Partial sequence of the purified protein confirms the identity of cDNA coding for human lysosomal α -mannosidase B

C. Emiliani, S. Martino, J.L. Stirling, B. Maras and A. Orlicchio

363-366**Research Papers****Proteins**

Non-enzymic glycation of fibrous collagen: reaction products of glucose and ribose

A.J. Bailey, T.J. Sims, N.C. Avery and E.P. Halligan

385-390

Effect of retinoic acid on protein synthesis by foetal bovine chondrocytes in high-density culture: down-regulation of the glucose-regulated protein, GRP-78, and type II collagen

A.-M. Freyria, M.-C. Ronzière, M.-M. Boutillon and D. Herbage

391-396

Identification of candidate residues for interaction of protein S with C4b binding protein and activated protein C

J.S. Greengard, J.A. Fernandez, K.-P. Radtke and J.H. Griffin

397-403

Kinetics of the cooperative binding of glucose to dimeric yeast hexokinase P-I

J.G. Hoggett and G.L. Kellett

405-410

Determination of the structure of two novel echistatin variants and comparison of the ability of echistatin variants to inhibit aggregation of platelets from different species

Y.-L. Chen, T.-F. Huang, S.-W. Chen and I.-H. Tsai

513-520

Spontaneous dissociation-association of monomers of the human stem-cell-factor dimer

H.S. Lu, W.-C. Chang, E.A. Mendiaz, M.B. Mann, K.E. Langley and Y.-R. Hsu

563-568

Protein hydroperoxides can give rise to reactive free radicals

M.J. Davies, S. Fu and R.T. Dean

643-649**Enzymes**

Inactivation during denaturation of ribonuclease A by guanidinium chloride is accompanied by unfolding at the active site

H.-J. Yang and C.-L. Tsou

379-384

Expression and selective inhibition of the constitutive and inducible forms of human cyclo-oxygenase

J.K. Gierse, S.D. Hauser, D.P. Creely, C. Koboldt, S.H. Rangwala, P.C. Isakson and K. Seibert

479-484

Comparison of the activities of a multiple inositol polyphosphate phosphatase obtained from several sources: a search for heterogeneity in this enzyme

A. Craxton, N. Ali and S.B. Shears

491-498*Escherichia coli* dihydrodipicolinate synthase: characterization of the imine intermediate and the product of bromopyruvate treatment by electrospray mass spectrometry

E.B. Borthwick, S.J. Connell, D.W. Tudor, D.J. Robins, A. Shneier, C. Abell and J.R. Coggins

521-524

Catalytic-rate improvement of a thermostable malate dehydrogenase by a subtle alteration in cofactor binding

R.M. Alldread, D.M. Halsall, A.R. Clarke, T.K. Sundaram, T. Atkinson, M.D. Scawen and D.J. Nicholls

539-548

Trypanosomatid cysteine protease activity may be enhanced by a kininogen-like moiety from host serum

J.D. Lonsdale-Eccles, G.W.N. Mpimbaza, Z.R.M. Nkhungulu, J. Olobo, L. Smith, O.M. Tosomba and D.J. Grab

549-556

Effects of aluminium on the hepatic inositol polyphosphate phosphatase

N. Ali, A. Craxton, M. Sumner and S.B. Shears

557-561**Carbohydrates and lipids**

Comparative studies on bile flow and biliary lipid excretion after bile-acid loading in normal and partially hepatectomized rats

M. Hoshino, A. Hirano, T. Hayakawa, Y. Kamiya, T. Ohiwa, A. Tanaka, T. Kumai, K. Katagiri, M. Miyaji and T. Takeuchi

367-371

Effects of tetradecylthiopropionic acid and tetradecylthioacrylic acid on rat liver lipid metabolism

S. Skrede, P. Wu and H. Osmundsen

591-597Human plasma phospholipid transfer protein accelerates exchange/transfer of α -tocopherol between lipoproteins and cells

G.M. Kostner, K. Oettl, M. Jauhainen, C. Ehnholm, H. Esterbauer and H. Dieplinger

659-667

Gene structure and expression

- Cloning, sequencing and heterologous expression of a cDNA encoding pigeon liver carnitine acetyltransferase **439–444**
 T.M. Johnson, H.P. Kocher, R.C. Anderson and G.M. Nemecek
- Caldesmon mRNA splicing and isoform expression in mammalian smooth-muscle and non-muscle tissues **445–450**
 A.M. Payne, P. Yue, K. Pritchard and S.B. Marston
- Post-transcriptional regulation of the content of spermidine/spermine *N*¹-acetyltransferase by *N*¹*N*¹²-bis(ethyl)spermine **451–458**
 L. Parry, R. Balaña Fouce and A.E. Pegg
- Dinucleotide repeats in the human surfactant protein-B gene and respiratory-distress syndrome **583–590**
 J. Floros, S.V. Veletza, P. Kotikalapudi, L. Krizkova, A.M. Karinch, C. Friedman, S. Buchter and K. Marks
- The independent gene amplification of electrophoretically indistinguishable B esterases from the insecticide-resistant mosquito *Culex quinquefasciatus* **651–658**
 A. Vaughan, M. Rodriguez and J. Hemingway

Regulation of metabolism

- Evidence for a free *N*-acetylneuraminic acid-hydroxylating enzyme in pig mandibular gland soluble fraction **459–464**
 C.J. Mukuria, W.D. Mwangi, A. Noguchi, G.P. Waiyaki, T. Asano and M. Naiki
- Glucose-transporter (GLUT4) protein content in oxidative and glycolytic skeletal muscles from calf and goat **465–470**
 J.-F. Hocquette, F. Bornes, M. Balage, P. Ferré, J. Grizard and M. Vermorel
- Suppression of sterol 27-hydroxylase mRNA and transcriptional activity by bile acids in cultured rat hepatocytes **505–511**
 J. Twisk, E.C.M. de Wit and H.M.G. Princen
- Phorbol ester stimulates choline uptake in Swiss 3T3 fibroblasts following introduction of the gene encoding protein kinase *C* α **621–626**
 B.E. Slack, J. Breu, E. Livneh, H. Eldar and R.J. Wurtman
- A novel isoenzyme of aldehyde dehydrogenase specifically involved in the biosynthesis of 9-*cis* and all-*trans* retinoic acid **681–684**
 J. Labrecque, F. Dumas, A. Lacroix and P.V. Bhat

Membranes and bioenergetics

- Thapsigargin inhibits Ca²⁺ entry into human neutrophil granulocytes **525–528**
 M. Geiszt, K. Káldi, J.B. Szeberényi and E. Ligeti
- Streptolysin-O induces release of glycosylphosphatidylinositol-anchored alkaline phosphatase from ROS cells by vesiculation independently of phospholipase action **529–537**
 M. Xie and M.G. Low

Receptors and signal transduction

- Tissue-specific and developmentally regulated alternative splicing in mouse skeletal muscle ryanodine receptor mRNA **373–378**
 A. Futatsugi, G. Kuwajima and K. Mikoshiba
- Identification of the *in vitro* phosphorylation sites on G_{s α} mediated by pp60^{c-src} **411–417**
 J.S. Moyers, M.E. Linder, J.D. Shannon and S.J. Parsons
- Tissue distribution of the receptor for plasma retinol-binding protein **419–424**
 S. Smeland, T. Bjerknes, L. Malaba, W. Eskild, K.R. Norum and R. Blomhoff
- Role of protein kinase C activation in synthesis of complement components C2 and factor B in interferon- γ -stimulated human fibroblasts, glioblastoma cell line A172 and monocytes **425–431**
 I. Watanabe, T. Horiuchi and S. Fujita
- Role of tyrosine kinase and protein kinase C in the steroidogenic actions of angiotensin II, α -melanocyte-stimulating hormone and corticotropin in the rat adrenal cortex **433–438**
 S. Kapas, A. Purbrick and J.P. Hinson
- Ultraviolet radiation stimulates a biphasic pattern of 1,2-diacylglycerol formation in cultured human melanocytes and keratinocytes by activation of phospholipases C and D **471–477**
 C.J. Carsberg, J. Ohanian and P.S. Friedmann
- A novel receptor-type protein tyrosine phosphatase with a single catalytic domain is specifically expressed in mouse brain **499–504**
 W. Hendriks, J. Schepens, C. Brugman, P. Zeeuwen and B. Wieringa
- The site of action of Ca²⁺ in the activation of steroidogenesis: studies in Ca²⁺-clamped bovine adrenal zona-glomerulosa cells **569–576**
 C.P. Python, O.P. Laban, M.F. Rossier, M.B. Vallotton and A.M. Capponi
- μ -Opioids activate phospholipase C in SH-SY5Y human neuroblastoma cells via calcium-channel opening **577–582**
 D. Smart, G. Smith and D.G. Lambert
- An extracellular domain of the β subunit is essential for processing, transport and kinase activity of insulin receptor **599–604**
 T. Haruta, T. Sawa, Y. Takata, T. Imamura, Y. Takada, H. Morioka, G.H. Yang and M. Kobayashi
- Receptor-mediated activation of recombinant Trp1 expressed in Sf9 insect cells **605–611**
 Y. Hu and W.P. Schilling

Nitric oxide stimulates tyrosine phosphorylation in murine fibroblasts in the absence and presence of epidermal growth factor	T.M.S. Peranovich, A.M. da Silva, D.M. Fries, A. Stern and H.P. Monteiro	613–619
Role of phosphodiesterase isoenzymes in regulating intracellular cyclic AMP in adenosine-stimulated smooth muscle cells	Y. Xiong, E.W. Westhead and L.L. Slakey	627–633
Thrombin interaction with a recombinant N-terminal extracellular domain of the thrombin receptor in an acellular system	M.-C. Bouton, M. Jandrot-Perrus, S. Moog, J.-P. Cazenave, M.-C. Guillin and F. Lanza	635–641
Tyrosine phosphorylation and association of Syk with Fc γ RII in monocytic THP-1 cells	S. Ghazizadeh, J.B. Bolen and H.B. Fleit	669–674
Cell biology and development		
Regulation of membrane-associated tyrosine phosphatases in UMR 106.06 osteoblast-like cells	M.C. Southey, D.M. Findlay and B.E. Kemp	485–490
Perinatal maturation of rat kidney mitochondria	B. Prieur, L. Cordeau-Lossouarn, A. Rotig, J. Bismuth, J.-P. Geloso and E. Delaval	675–680
BJ Letters		
Characteristic differences in the primary structure allow discrimination of cyclodextrin glucanotransferases from α -amylases	Š. Janeček, E.A. MacGregor and B. Svensson	685–687
Neuronal nitric oxide synthase contains a discs-large homologous region (DHR) sequence motif	W. Hendriks	687–688
