

Review

Regulation of ribosomal gene transcription
by S.T. Jacob

617–626

Research Communication

Formation *in vitro* of the 3,4,6-trihydroxyphenylalanine quinone cofactor

S.P. Hanlon, K. Carpenter, A. Hassan and R.A. Cooper

627–630

Proteins

Detection of acyl-CoA-binding protein in human red blood cells and investigation of its role in membrane phospholipid renewal

H. Fyrst, J. Knudsen, M.A. Schott, B.H. Lubin and F.A. Kuypers

793–799

In vitro fibrillogenesis of collagen II from pig vitreous humour

C. Yang, H. Notbohm, Y. Açil, R. Heifeng, S. Bierbaum and P.K. Müller

871–875

Enzymes

Recombinant 10-formyltetrahydrofolate dehydrogenase catalyses both dehydrogenase and hydrolase reactions utilizing the synthetic substrate 10-formyl-5,8-dideazafofate

S.A. Krupenko, C. Wagner and R.J. Cook

651–655

Inhibition of specific binding of okadaic acid to protein phosphatase 2A by microcystin-LR, calyculin-A and tautomycin: method of analysis of interactions of tight-binding ligands with target protein

A. Takai, K. Sasaki, H. Nagai, G. Mieskes, M. Isobe, K. Isono and T. Yasumoto

657–665

Solubilization, molecular forms, purification and substrate specificity of two acetylcholinesterases in the medicinal leech (*Hirudo medicinalis*)

V. Talesa, M. Grauso, E. Giovannini, G. Rosi and J.-P. Toutant

687–692

Stability of Japanese-lacquer-tree (*Rhus vernicifera*) laccase to thermal and chemical denaturation: comparison with ascorbate oxidase

E. Agostinelli, L. Cervoni, A. Giartosio and L. Morpurgo

697–702

Interaction of component enzymes with the peripheral subunit-binding domain of the pyruvate dehydrogenase multienzyme complex of *Bacillus stearothermophilus*: stoichiometry and specificity in self-assembly

I.A.D. Lessard and R.N. Perham

727–733

Irreversible inactivation of lactoperoxidase by mercaptomethylimidazole through generation of a thiyl radical: its use as a probe to study the active site

U. Bandyopadhyay, D.Kr. Bhattacharyya, R. Chatterjee and R.K. Banerjee

751–757

A stopped-flow apparatus for infrared spectroscopy of aqueous solutions

A.J. White, K. Drabble and C.W. Wharton

843–849

The properties of a cloned human high-molecular-mass cytosolic phospholipase A₂ investigated using a continuous fluorescence displacement assay: evidence for enzyme clustering on phospholipid vesicles

A. Creaney, D.J. Masters, M.B. Needham, R.D. Gordon, R. Mott and D.C. Wilton

857–864

Carbohydrates and lipids

Decrease in cardiac phosphatidylglycerol in streptozotocin-induced diabetic rats does not affect cardiolipin biosynthesis: evidence for distinct pools of phosphatidylglycerol in the heart

G.M. Hatch, S.G. Cao and A. Angel

759–764

Occurrence of a novel fucose-containing pentaglycosylceramide with blood-group-B active determinant in *Xenopus* blastula cells: its possible involvement in cell–cell adhesion

K. Nomura, N. Nakajo, K.I.-P.J. Hidari, H. Nomura, M. Murata, M. Suzuki, K. Yamana and Y. Hirabayashi

821–827

Gene structure and expression

Cholinergic regulation of amylase gene expression in the rat parotid gland. Inhibition by two distinct post-transcriptional mechanisms

Y. Liu, P.Y. Woon, S.C. Lim, K. Jeyaseelan and P. Thiagarajah

637–642

Regulation of metabolism

- Microcystin-LR induced an inhibition of protein synthesis in isolated rat hepatocytes S. Claeysens, A. Francois, A. Chedeville and A. Lavoine **693–696**
- Glutamine metabolism in chick enterocytes: absence of pyrroline-5-carboxylase synthase and citrulline synthesis G. Wu, N.E. Flynn, W. Yan and D.G. Barstow, Jr. **717–721**
- Cell wall polysaccharide biosynthesis and related metabolism in elicitor-stressed cells of French bean (*Phaseolus vulgaris* L.) D. Robertson, B.A. McCormack and G.P. Bolwell **745–750**
- Differential selenium-dependent expression of type I 5'-deiodinase and glutathione peroxidase in the porcine epithelial kidney cell line LLC-PK₁ M. Gross, M. Oertel and J. Köhrle **851–856**

Membranes and bioenergetics

- Primary structure of rat plasma membrane Ca²⁺-ATPase isoform 4 and analysis of alternative splicing patterns at splice site A T.P. Keeton and G.E. Shull **779–785**
- Localization and identification of Ca²⁺ATPases in highly purified human platelet plasma and intracellular membranes. Evidence that the monoclonal antibody PL/IM 430 recognizes the SERCA 3 Ca²⁺ATPase in human platelets S. Bokkala, S.S. El-Daher, V.V. Kakkar, F. Wuytack and K.S. Authi **837–842**

Receptors and signal transduction

- Receptor for *myo*-inositol trisphosphate from the microsomal fraction of *Vigna radiata* S. Biswas, B. Dalal, M. Sen and B.B. Biswas **631–636**
- Physicochemical characterization of the cytoplasmic domain of the epidermal growth factor receptor and evidence for conformational changes associated with its activation by ammonium sulphate M. Gregoriou, P.F. Jones, J.F. Timms, J.J. Yang, S.E. Radford and A.R. Rees **667–678**
- Effects of caffeine on cytoplasmic free Ca²⁺ concentration in pancreatic β -cells are mediated by interaction with ATP-sensitive K⁺ channels and L-type voltage-gated Ca²⁺ channels but not the ryanodine receptor Md.S. Islam, O. Larsson, T. Nilsson and P.-O. Berggren **679–686**
- Effects of CoA and acyl-CoA on Ca²⁺-permeability of endoplasmic-reticulum membranes from rat liver G.T. Rich, J.G. Comerford, S. Graham and A.P. Dawson **703–708**
- Intracellular cross-talk between thyrotropin receptor and A₁ adenosine receptor in regulation of phospholipase C and adenylate cyclase in COS-7 cells transfected with their receptor genes F. Okajima, H. Tomura, K. Sho, M. Akbar, M.A. Majid and Y. Kondo **709–715**
- Adenylate cyclase, cyclic AMP and extracellular-signal-regulated kinase-2 in airway smooth muscle: modulation by protein kinase C and growth serum N. Moughal, P.A. Stevens, D. Kong, S. Pyne and N.J. Pyne **723–726**
- The cross-regulation of G_i-protein by cholera toxin involves a phosphorylation by protein kinase A R. Levistre, M. Berguerand, G. Berezziat and J. Masliah **765–769**
- Identification and characterization of the type-IVA cyclic AMP-specific phosphodiesterase RD1 as a membrane-bound protein expressed in cerebellum Y. Shakur, M. Wilson, L. Pooley, M. Lobban, S.L. Griffiths, A.M. Campbell, J. Beattie, C. Daly and M.D. Houslay **801–809**
- Mutagenic structure/function analysis of the cytoplasmic cysteines of the insulin receptor S.L. Macaulay, M. Polites, M.J. Frenkel, D.R. Hewish and C.W. Ward **811–820**
- Glucan receptor and zymosan-induced lysosomal enzyme secretion in macrophages H. Tapper and R. Sundler **829–835**
- Free calcium transients in chemotactic and non-chemotactic strains of *Escherichia coli* determined by using recombinant aequorin N.J. Watkins, M.R. Knight, A.J. Trewavas and A.K. Campbell **865–869**

Cell biology and development

- Lack of glycosyl-phosphatidylinositol anchoring leads to precursor retention by a unique mechanism in *Dictyostelium discoideum* P.C. Pauly and C. Klein **643–650**
- The proximal pathway of metabolism of the chlorinated signal molecule differentiation-induced factor-1 (DIF-1) in the cellular slime mould *Dictyostelium* P. Morandini, J. Offer, D. Traynor, O. Nayler, D. Neuhaus, G.W. Taylor and R.R. Kay **735–743**
- Nitron spin traps and a nitroxide antioxidant inhibit a common pathway of thymocyte apoptosis A.F.G. Slater, C.S.I. Nobel, E. Maellaro, J. Bustamante, M. Kimland and S. Orrenius **771–778**

Mechanism of anti-proliferation caused by YC-1, an indazole derivative, in cultured rat A10 vascular smooth-muscle cells	S.M. Yu, Z.J. Cheng, J.H. Guh, F.Y. Lee and S.C. Kuo	787–792
BJ Letters		
The two-gene model of the RH blood-group locus	J.-P. Cartron, C. Le Van Kim, B. Cherif-Zahar, I. Mouro, C. Rouillac and Y. Colin	877–878
Corrections		
Regulation of <i>fos-lacZ</i> fusion gene expression in primary mouse epidermal keratinocytes isolated from transgenic mice by W.B. Bollag, Y. Xiong, J. Ducote and C.S. Harmon (volume 300, pages 263–270, 1994)		879
Multiple effects of haemin binding on protease susceptibility of bovine serum albumin and a novel isolation procedure for its large fragment by W.-S. Shin, H. Yamashita and M. Hirose (volume 304, pages 81–86, 1994)		879
Characterization of cDNA for murine tripeptidyl-peptidase II reveals alternative splicing by B. Tomkinson (volume 304, pages 517–523, 1994)		880
