

Review

Physiological functions of endosomal proteolysis
by T. Berg, T. Gjøen and O. Bakke

313–326

Research Communications

Translation *in vivo* of 5' untranslated-region splice variants of human surfactant protein-A

A.M. Karinch and J. Floros

327–330

Levels of pyrroloquinoline quinone in various foods

T. Kumazawa, K. Sato, H. Seno, A. Ishii and O. Suzuki

331–333

Proteins

Two site-directed mutations abrogate enzyme activity but have different effects on the conformation and cellular content of the *N*-acetylgalactosamine 4-sulphatase protein

D.A. Brooks, D.A. Robertson, C. Bindloss, T. Litjens, D.S. Anson, C. Peters, C.P. Morris and J.J. Hopwood

457–463

Expression of active recombinant pallidipin, a novel platelet aggregation inhibitor, in the periplasm of *Escherichia coli*

B. Haendler, A. Becker, C. Noeske-Jungblut, J. Krätzschar, P. Donner and W.-D. Schleuning

465–470

Long-range conformational effects of proteolytic removal of the last three residues of actin

H. Strzelecka-Golaszewska, M. Mossakowska, A. Woźniak, J. Moraczewska and H. Nakayama

527–534

Secondary structure and biophysical activity of synthetic analogues of the pulmonary surfactant polypeptide SP-C

J. Johansson, G. Nilsson, R. Strömberg, B. Robertson, H. Jörnvall and T. Curstedt

535–541

Enzymes

Streptomyces K15 active-site serine DD-transpeptidase: specificity profile for peptide, thiol ester and ester carbonyl donors and pathways of the transfer reactions

J. Grandchamps, M. Nguyen-Distèche, C. Dambon, J.-M. Frère and J.-M. Ghuyssen

335–349

Human mast cell tryptase isoforms: separation and examination of substrate-specificity differences

S.S. Little and D.A. Johnson

341–346

A study of the stabilization of the oxyanion of tetrahedral adducts by trypsin, chymotrypsin and subtilisin

T.P. O'Connell and J.P.G. Malthouse

353–359

Rabbit α -1-antiproteinase E: a novel recombinant serpin which does not inhibit proteinases

A. Saito and H. Sinohara

369–375

Determination of the structure of an *N*-substituted protoporphyrin isolated from the livers of griseofulvin-fed mice

R.M.A. Bellingham, A.H. Gibbs, F. de Matteis, L.-Y. Lian and G.C.K. Roberts

505–512

Kinetic characterization of enzyme forms involved in metal ion activation and inhibition of *myo*-inositol monophosphatase

F. Strasser, P.D. Pelton and A.J. Ganzhorn

585–593

Tropine dehydrogenase: purification, some properties and an evaluation of its role in the bacterial metabolism of tropine

B.A. Bartholomew, M.J. Smith, M.T. Long, P.J. Darcy, P.W. Trudgill and D.J. Hopper

603–608

Carbohydrates and lipids

Glycosphingolipid composition of rat placenta: changes associated with stage of pregnancy

S. Itonori, T. Shirai, Y. Kiso, Y. Ohashi, K. Shiota and T. Ogawa

399–405

Evidence of a defined spatial arrangement of hyaluronate in the central filament of cartilage proteoglycan aggregates

M. Mörgelin, M. Paulsson, D. Heinegård, U. Aebi and J. Engel

595–601

Gene structure and expression

Rapid activation of the heat shock transcription factor, HSF1, by hypo-osmotic stress in mammalian cells

L.E. Huang, L. Caruccio, A.Y.-C. Liu and K.Y. Chen

347–352

Mammalian antioxidant protein complements alkylhydroperoxide reductase (*ahpC*) mutation in *Escherichia coli*

K. Tsuji, N.G. Copeland, N.A. Jenkins and M. Obinata

377–381

The complete sequence of human lens γ S-crystallin

J.B. Smith, Z. Yang, P. Lin, Z. Zaidi, A. Abbasi and P. Russell

407–410

Molecular cloning and expression of catrocollastatin, a snake-venom protein from *Crotalus atrox* (western diamondback rattlesnake) which inhibits platelet adhesion to collagen

Q. Zhou, J.B. Smith and M.H. Grossman

411–417

Isolation and characterization of the chicken trypsinogen gene family

K. Wang, L. Gan, I. Lee and L. Hood

471–479

Molecular cloning, purification and <i>in situ</i> localization of human colon kallikrein	L.-M. Chen, P. Richards, L. Chao and J. Chao	481–486
Activity of the herpes simplex virus immediate-early gene promoters by neuronally expressed POU family transcription factors	K.A. Lillycrop, Y.-Z. Liu, T. Theil, T. Mörröy and D.S. Latchman	581–584
Regulation of metabolism		
Stimulation of NADH-dependent microsomal DNA strand cleavage by rifamycin SV	E. Kukielka and A.I. Cederbaum	361–367
Fatty acyl-CoA esters inhibit glucose-6-phosphatase in rat liver microsomes	R. Fulceri, A. Gamberucci, H.M. Scott, R. Giunti, A. Burchell and A. Benedetti	391–397
Analysis of carbohydrate transport across the envelope of isolated cauliflower-bud amyloplasts	T. Möhlmann, O. Batz, U. Maaß and H.-E. Neuhaus	521–526
Membranes and bioenergetics		
Aberrant mitochondrial respiration in the livers of rats infected with <i>Fasciola hepatica</i> : the role of elevated non-esterified fatty acids and altered phospholipid composition	L.M. Lenton, C.A. Behm and F.L. Bygrave	425–431
Methane-induced haemolysis of human erythrocytes	H. Battliwala, T. Somasundaram, E.E. Uzgiris and L. Makowski	433–438
Ca ²⁺ -independent fusion of secretory granules with phospholipase A ₂ -treated plasma membranes <i>in vitro</i>	T. Nagao, T. Kubo, R. Fujimoto, H. Nishio, T. Takeuchi and F. Hata	563–569
Mechanism of inhibition of Ca ²⁺ -ATPase by myotoxin a	K.J. Baker, J.M. East and A.G. Lee	571–579
Receptors and signal transduction		
Cytoskeletal reorganization of human platelets induced by the protein phosphatase 1/2A inhibitors okadaic acid and calyculin A	Y. Yano, M. Sakon, J. Kambayashi, T. Kawasaki, T. Senda, K. Tanaka, F. Yamada and N. Shibata	439–449
Phospholipase D-induced phosphatidate production in intact small arteries during noradrenaline stimulation: involvement of both G-protein and tyrosine-phosphorylation-linked pathways	D.T. Ward, J. Ohanian, A.M. Heagerty and V. Ohanian	451–456
Mutation-deletion analysis of a Ca ²⁺ -dependent phospholipid binding (CaLB) domain within p120 GAP, a GTPase-activating protein for p21 <i>ras</i>	D.J. Gawler, L.-J.W. Zhang and M.F. Moran	487–491
Expression and site-directed mutagenesis of mouse prostaglandin E ₂ receptor EP ₃ subtype in insect cells	C. Huang and H.-H. Tai	493–498
Dexamethasone down-regulates the 85 kDa phospholipase A ₂ in mouse macrophages and suppresses its activation	K. Gewert and R. Sundler	499–504
Nerve growth factor stimulates a novel protein kinase in PC-12 cells that phosphorylates and activates mitogen-activated protein kinase (MEK)	L. Pang, C.-F. Zheng, K.-L. Guan and A.R. Saltiel	513–519
The stimulus-sensitive H ₂ O ₂ -generating system present in human fat-cell plasma membranes is multireceptor-linked and under antagonistic control by hormones and cytokines	H.I. Krieger-Brauer and H. Kather	543–548
Antagonistic effects of different members of the fibroblast and platelet-derived growth factor families on adipose conversion and NADPH-dependent H ₂ O ₂ generation in 3T3 L1-cells	H.I. Krieger-Brauer and H. Kather	549–556
Involvement of the Ca ²⁺ -dependent phosphorylation of a 20 kDa protein in the proliferative effect of high-density lipoproteins (subclass 3) on the adenocarcinoma cell line A549	K.A. Tazi, M. Bonnafous, G. Favre, G. Soula and F. Le Gaillard	557–561
Lysophosphatidic acid-induced Ca ²⁺ mobilization in human A431 cells: structure–activity analysis	K. Jalink, T. Hengeveld, S. Mulder, F.R. Postma, M.-F. Simon, H. Chap, G.A. van der Marel, J.H. van Boom, W.J. van Blitterswijk and W.H. Moolenaar	609–616
Cell biology and development		
Comparison of glucose-transporter-containing vesicles from rat fat and muscle tissues: evidence for a unique endosomal compartment	K.V. Kandror, L. Coderre, A.V. Pushkin and P.F. Pilch	383–390
Influence of phosphorylation on isoform composition and function of a microtubule-associated protein from developing <i>Artemia</i>	J. Zhang and T.H. Macrae	419–424
