

Review

Acyl-lipid desaturases and their importance in the tolerance and acclimatization to cold of cyanobacteria

by N. Murata and H. Wada

1-8

Proteins

N-glycosylation of human interferon- γ : glycans at Asn-25 are critical for protease resistance

T. Sareneva, J. Pirhonen, K. Cantell and I. Julkunen 9-14

Mass spectrometric analysis of rat liver cytosolic glutathione S-transferases: modifications are limited to N-terminal processing

H.-I. Yeh, C.-H. Hsieh, L.-Y. Wang, S.-P. Tsai, H.-Y. Hsu and M.F. Tam 69-75

Identification of a new surfactant protein A binding protein at the cell membrane of rat type II pneumocytes

P.A. Stevens, H. Wissel, D. Sieger, V. Meienreis-Sudau and B. Rüstow 77-81

Immunochemical characterization of two thyroid-stimulating hormone β -subunit epitopes

W.D. Fairlie, P.G. Stanton and M.T.W. Hearn 203-210

Purification and characterization of prolixin S (nitrophorin 2), the salivary anticoagulant of the blood-sucking bug *Rhodnius prolixus*

J.M.C. Ribeiro, M. Schneider and J.A. Guimarães 243-249

Photoaffinity labelling of cyanomethaemoglobin with derivatives of tryptophan and 5-bromotryptophan

M. Li, Z. Lin and M.E. Johnson 251-260

Enzymes

Specific degradation of troponin T and I by μ -calpain and its modulation by substrate phosphorylation

F. Di Lisa, R. De Tullio, F. Salamino, R. Barbato, E. Melloni, N. Siliprandi, S. Schiaffino and S. Pontremoli 57-61

Characterization of a cDNA clone for human NAD⁺-specific isocitrate dehydrogenase α -subunit and structural comparison with its isoenzymes from different species

Y.-O. Kim, I.-U. Oh, H.-S. Park, J. Jeng, B.J. Song and T.-L. Huh 63-68

In *Dictyostelium discoideum* inositol 1,3,4,5-tetrakisphosphate is dephosphorylated by a 3-phosphatase and a 1-phosphatase

P. Van Dijken, A.A. Lammers and P.J.M. van Haastert 127-130

Thimet oligopeptidase specificity: evidence of preferential cleavage near the C-terminus and product inhibition from kinetic analysis of peptide hydrolysis

C.G. Knight, P.M. Dando and A.J. Barrett 145-150

Inhibition of bone resorption *in vitro* by selective inhibitors of gelatinase and collagenase

P.A. Hill, A.J.P. Docherty, K.M.K. Bottomley, J.P. O'Connell, J.R. Morphy, J.J. Reynolds and M.C. Meikle 167-175

Identification of transient intermediates in the bisphosphatase reaction of rat liver 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase by ³¹P-NMR spectroscopy

D.A. Okar, L.T. Kakalis, S.S. Narula, I.M. Armitage and S.J. Pilkis 189-195

Glutathione analogues as novel inhibitors of rat and human glutathione S-transferase isoenzymes, as well as of glutathione conjugation in isolated rat hepatocytes and in the rat *in vivo*

S. Ouwerkerk-Mahadevan, J.H. van Boom, M.C. Dreef-Tromp, J.H.T.M. Ploemen, D.J. Meyer and G.J. Mulder 283-290

Chemical modification and inactivation of phospholipases A₂ by a manoalide analogue

S. Fujii, Y. Tahara, M. Toyomoto, S. Hada, H. Nishimura, S. Inoue, K. Ikeda, Y. Inagaki, S. Katsumura, Y. Samejima, T. Omori-Satoh, C. Takasaki and K. Hayashi 297-304

Enzyme kinetics based on free-energy profiles

S. Yagisawa 305-311

Prephenate dehydratase of the actinomycete *Amycolatopsis methanolica*: purification and characterization of wild-type and deregulated mutant proteins

G.J.W. Euverink, D.J. Wolters and L. Dijkhuizen 313-320

Endoproteolytic processing of recombinant proalbumin variants by the yeast Kex2 protease

E.C. Ledgerwood, P.M. George, R.J. Peach and S.O. Brennan 321-325

Human acetyl-coenzyme A: α -glucosaminide N-acetyltransferase. Kinetic characterization and mechanistic interpretation

P.J. Meikle, A.M. Whittle and J.J. Hopwood 327-333

Carbohydrates and lipids

Effects of an azasterol inhibitor of sterol 24-transmethylation on sterol biosynthesis and growth of *Leishmania donovani* promastigotes

P.A. Haughan, M.L. Chance and L.J. Goad 31-38

Oxidation of *cis*-5-unsaturated fatty acids in intact rat liver mitochondria: the operation of reduction pathways

K.-Y. Tserng and S.-J. Jin 39-44

Biosynthesis of the glycolipid anchor of lipophosphoglycan and the structurally related glycoinositolphospholipids from <i>Leishmania major</i>	L. Proudfoot, P. Schneider, M.A.J. Ferguson and M.J. McConville	45–55
Time-course changes in content and fatty acid composition of phosphatidic acid from rat thymocytes during concanavalin A stimulation	S. El Bawab, O. Macovschi, M. Lagarde and A.-F. Prigent	113–118
Use of 'soluble lipids' for biochemical processes: linoleic acid–cyclodextrin inclusion complexes in aqueous solutions	J.M. López-Nicolás, R. Bru, A. Sánchez-Ferrer and F. García-Carmona	151–154
A direct role for serum albumin in the cellular uptake of long-chain fatty acids	B.L. Trigatti and G.E. Gerber	155–159
Energetics of carbohydrate binding by a 14 kDa S-type mammalian lectin	R. Ramkumar, A. Surolia and S.K. Podder	237–241
Gene structure and expression		
Isolation and characterization of cDNA clones encoding pig gastric mucin	B.S. Turner, K.R. Bhaskar, M. Hadzopoulou-Cladaras, R.D. Specian and J.T. LaMont	89–96
Identification of cytochrome <i>P</i> -450 1A (CYP1A) genes from two teleost fish, toadfish (<i>Opsanus tau</i>) and scup (<i>Stenotomus chrysops</i>), and phylogenetic analysis of CYP1A genes	H.G. Morrison, M.F. Oleksiak, N.W. Cornell, M.L. Sogin and J.J. Stegeman	97–104
Functional synergism in the carbohydrate-induced activation of liver-type pyruvate kinase gene expression	Z. Liu and H.C. Towle	105–111
Effects of glucose refeeding and glibenclamide treatment on glucokinase and GLUT2 gene expression in pancreatic B-cells and liver from rats	M. Tiedge and S. Lenzen	139–144
Differential transcription and expression of ornithine decarboxylase in embryos of replicated mouse lines divergently selected for lean body mass	A. Gray, A. Tait and G. Bulfield	161–166
Role of hepatocyte nuclear factor-3 α and hepatocyte nuclear factor-3 β in Clara cell secretory protein gene expression in the bronchiolar epithelium	C.D. Bingle, B.P. Hackett, M. Moxley, W. Longmore and J.D. Gitlin	197–202
Structural organization and chromosomal localization of the mouse collagenase type I gene	M. Schorpp, M.-G. Mattei, I. Herr, S. Gack, J. Schaper and P. Angel	211–217
Regulation of metabolism		
Glucosamine-sensitive and -insensitive detritiation of [2- ³ H]glucose in isolated rat hepatocytes: a study of the contributions of glucokinase and glucose-6-phosphatase	E. Van Schaftingen	23–29
Ethanol potentiates interleukin-1 β -stimulated inducible nitric oxide synthase expression in cultured vascular smooth muscle cells	W. Durante, K. Cheng, R.K. Sunahara and A.I. Schafer	231–236
Membranes and bioenergetics		
Increased expression of procoagulant activity on the surface of human platelets exposed to heavy-metal compounds	C.A. Goodwin, C.P.D. Wheeler-Jones, S. Namiranian, S. Bokkala, V.V. Kakkar, K.S. Authi and M.F. Scully	15–21
Activation and labelling of the purified skeletal muscle ryanodine receptor by an oxidized ATP analogue	M. Hohenegger, A. Herrmann-Frank, M. Richter and F. Lehmann-Horn	119–125
Kinetics and thermodynamics of the binding of forskolin to the galactose–H ⁺ transport protein, GalP, of <i>Escherichia coli</i>	G.E.M. Martin, N.G. Rutherford, P.J.F. Henderson and A.R. Walmsley	261–268
Localization of cholesterol in sphingomyelinase-treated fibroblasts	M.I. Pörn and J.P. Slotte	269–274
Evidence that the effects of phospholipids on the activity of the Ca ²⁺ -ATPase do not involve aggregation	A.P. Starling, J.M. East and A.G. Lee	343–346
Receptors and signal transduction		
The calmodulin-binding domain in the mouse type 1 inositol 1,4,5-trisphosphate receptor	M. Yamada, A. Miyawaki, K. Saito, T. Nakajima, M. Yamamoto-Hino, Y. Ryo, T. Furuichi and K. Mikoshiba	83–88
Effects of insulin on the translocation of protein kinase C- θ and other protein kinase C isoforms in rat skeletal muscles	K. Yamada, A. Avignon, M.L. Standaert, D.R. Cooper, B. Spencer and R.V. Farese	177–180
Insulin increase mRNA levels of protein kinase C- α and - β in rat adipocytes and protein kinase C- α , - β and - θ in rat skeletal muscle	A. Avignon, M.L. Standaert, K. Yamada, H. Mischak, B. Spencer and R.V. Farese	181–187

An investigation of the role of Glu-842, Glu-844 and His-846 in the function of the cytoplasmic domain of the epidermal growth factor receptor	J.F. Timms, M.E.M. Noble and M. Gregoriou	219–229
Detection and analysis of agonist-induced formation of the complex of the stimulatory guanine nucleotide-binding protein with adenylate cyclase in intact wild-type and β 2-adrenoceptor-expressing NG108-15 cells	G.-D. Kim, I.C. Carr and G. Milligan	275–281
Effects of lactation on the signal transduction systems regulating lipolysis in sheep subcutaneous and omental adipose tissue	R.G. Vernon, R. Doris, E. Finley, M.D. Houslay, E. Kilgour and S. Lindsay-Watt	291–296
Activation and tyrosine phosphorylation of p72 ^{syk} as well as calcium mobilization after hydrogen peroxide stimulation in peripheral blood lymphocytes	S. Qin, T. Inazu and H. Yamamura	347–352
Expression of human <i>all-trans</i> -retinoic acid receptor β and its ligand-binding domain in <i>Escherichia coli</i>	M. Berggren Söderlund, G. Johannesson and G. Fex	353–359
Cell biology and development		
Modulation of poly(ADP-ribose) polymerase during neutrophilic and monocytic differentiation of promyelocytic (NB4) and myelocytic (HL-60) leukaemia cells	M. Bhatia, J.B. Kirkland and K.A. Meckling-Gill	131–137
<i>Plasmodium falciparum</i> -infected erythrocytes utilize a synthetic truncated ceramide precursor for synthesis and secretion of truncated sphingomyelin	I. Ansorge, D. Jeckel, F. Wieland and K. Lingelbach	335–341
