

Research Communications

Phosphatidylinositol 3-kinase and the actin network are not required for the stimulation of glucose transport caused by mitochondrial uncoupling: comparison with insulin action

T. Tsakiridis, M. Vranic and A. Klip 1–5

The GLUT5 hexose transporter is also localized to the basolateral membrane of the human jejunum

S.J. Blakemore, J.C. Aledo, J. James, F.C. Campbell, J.M. Lucocq and H.S. Hundal 7–12

Research Papers

Proteins

Modulation of the phosphorylation state of tau *in situ*: the roles of calcium and cyclic AMP

L.M. Fleming and G.V.W. Johnson 41–47

Kinetic properties of the *Bacillus licheniformis* penicillin-binding proteins

S. Lepage, M. Galleni, B. Lakaye, B. Joris, I. Thamm and J.-M. Frere 49–53

Human ciliary neurotrophic factor: a structure–function analysis

A. Krüttgen, J. Grötzing, G. Kurapkat, J. Weis, R. Simon, M. Thier, M. Schröer, P. Heinrich, A. Wollmer, M. Comeau, J. Müllberg and S. Rose-John 215–220

Biosynthesis of rat MUC2 in colon and its analogy with human MUC2

K.M.A.J. Tytgat, F.-J. Bovelander, F.J.M. Opdam, A.W.C. Einerhand, H.A. Büller and J. Dekker 221–229

Studies on crystal structures, active-centre geometry and depurinating mechanism of two ribosome-inactivating proteins

Q. Huang, S. Liu, Y. Tang, S. Jin and Y. Wang 285–298

Specificity and V_H sequence of two monoclonal antibodies against the N-terminus of dystrophin

G.E. Morris, C. Nguyen and Nguyen thi Man 355–359

Enzymes

Direct role of furin in mammalian prosomatostatin processing

A.S. Galanopoulou, N.G. Seidah and Y.C. Patel 33–40

Different properties of the mitochondrial and cytosolic hexokinases in maize roots

A. Galina, M. Reis, M.C. Albuquerque, A.G. Puyou, M.T.G. Puyou and L. de Meis 105–112

Isolation and enzymic properties of levansucrase secreted by *Acetobacter diazotrophicus* SRT4, a bacterium associated with sugar cane

L. Hernandez, J. Arrieta, C. Menendez, R. Vazquez, A. Coego, V. Suarez, G. Selman, M.-F. Petit-Glatron and R. Chambert 113–118

Role of the N-terminal region in covalent modification of 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase: comparison of phosphorylation and ADP-ribosylation

J.L. Rosa, J.X. Pérez, F. Ventura, A. Tauler, J. Gil, M. Shimoyama, S.J. Pilakis and R. Bartrons 119–125

Glyoxalase I in detoxification: studies using a glyoxalase I transfectant cell line

S. Ranganathan, E.S. Walsh and K.D. Tew 127–131

Isolation and some properties of glycated D-glyceraldehyde-3-phosphate dehydrogenase from rabbit muscle

R.-Q. He, M.-D. Yang, X. Zheng and J.-X. Zhou 133–139

Presence in human eosinophils of a lysophospholipase similar to that found in the pancreas

F.W. Hultsberg, L.E. Ozgur, D.E. Garsetti, J. Myers, R.W. Egan and M.A. Clark 141–144

Variable effects of maturity-onset-diabetes-of-youth (MODY)-associated glucokinase mutations on substrate interactions and stability of the enzyme

Y. Liang, P. Kesavan, L.-q. Wang, K. Niswender, Y. Tanizawa, M.A. Permutt, M.A. Magnuson and F.M. Matschinsky 167–173

Kinetic study of an enzymic cycling system coupled to an enzymic step: determination of alkaline phosphatase activity

E. Valero, R. Varón and F. García-Carmona 181–185

Glutamic acid 327 in the sheep α 1 isoform of Na⁺,K⁺-ATPase is a pivotal residue for cation-induced conformational changes

C.L. Johnson, T.A. Kuntzweiler, J.B. Lingrel, C.G. Johnson and E.T. Wallick 187–194

Studies on the activation by ATP of the 26 S proteasome complex from rat skeletal muscle

B. Dahlmann, L. Kuehn and H. Reinauer 195–202

Rat thimet oligopeptidase: large-scale expression in *Escherichia coli* and characterization of the recombinant enzyme

N. McKie, P.M. Dando, M.A. Brown and A.J. Barrett 203–207

Characterization of an exocellular serine-thiol proteinase activity in *Paracoccidioides brasiliensis*

A.K. Carmona, R. Puccia, M.C.F. Oliveira, E.G. Rodrigues, L. Juliano and L.R. Travassos 209–214

Binding of gelatinases A and B to type-I collagen and other matrix components	J.A. Allan, A.J.P. Docherty, P.J. Barker, N.S. Huskisson J.J. Reynolds and G. Murphy	299–306
Reactions of glutamate semialdehyde aminotransferase (glutamate-1-semialdehyde 2,1 aminomutase) with vinyl and acetylenic substrate analogues analysed by rapid scanning spectrophotometry	R.J. Tyacke, R. Contestabile, B. Grimm, J.L. Harwood and R.A. John	307–313
Aminoacyl-tRNA synthetase complex in <i>Saccharomyces cerevisiae</i>	C.L. Harris and C.J. Kolanko	321–324
Study of the roles of Arg-104 and Arg-225 in the 2-kinase domain of 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase by site-directed mutagenesis	M.H. Rider, K.M. Crepin, M. De Cloedt, L. Bertrand, D. Vertommen and L. Hue	341–346
Steady-state kinetics and chemical mechanism of octopus hepatopancreatic glutathione transferase	S.-S. Tang and G.-G. Chang	347–353
Carbohydrates and Lipids		
Secretion of active human lecithin-cholesterol acyltransferase by insect cells infected with a recombinant baculovirus	D. Chawla and J.S. Owen	249–253
Gene structure and expression		
Hormonal regulation of the zonated expression of cytochrome P-450 3A in rat liver	T. Oinonen and K.O. Lindros	55–61
Activation of the rat serine proteinase inhibitor 3 gene by interferon γ via the interleukin 6-responsive element	T. Kordula and J. Travis	63–67
Expression of a <i>Xenopus</i> counterpart of mammalian syndecan 2 during embryogenesis	N.D. Rosenblum, B.B. Botelho and M. Bernfield	69–76
Transcription activation at <i>Escherichia coli</i> promoters dependent on the cyclic AMP receptor protein: effects of binding sequences for the RNA polymerase α -subunit	N.J. Savery, V.A. Rhodius, H.J. Wing and S.J.W. Busby	77–83
The insulin enhancer binding site 2 (IEB2; FAR) box of the insulin gene regulatory region binds at least three factors that can be distinguished by their DNA binding characteristics	M.L. Read, S.B. Smith and K. Docherty	231–236
Characterization of three types of human α_{s1} -casein mRNA transcripts	L.B. Johnsen, L.K. Rasmussen, T.E. Petersen and L. Berglund	237–242
Vitamin B ₆ modulates expression of albumin gene by inactivating tissue-specific DNA-binding protein in rat liver	T. Oka, N. Komori, M. Kuwahata, M. Okada and Y. Natori	243–248
Regulation of metabolism		
Stimulation of creatine kinase activity in rat skeletal tissue <i>in vivo</i> and <i>in vitro</i> by protease-resistant variants of parathyroid hormone fragments	D. Sömjen, V. Vargas, A. Waisman, E. Wingender, W. Tegge and A.M. Kaye	85–90
Regulation of GLUT5 gene expression in rat intestinal mucosa: regional distribution, circadian rhythm, perinatal development and effect of diabetes	A. Castelló, A. Gumá, L. Sevilla, M. Furriols, X. Testar, M. Palacín and A. Zorzano	271–277
Membranes and bioenergetics		
Characterization of the swelling-induced alkalinization of endocytotic vesicles in fluorescein isothiocyanate-dextran-loaded rat hepatocytes	R. Schreiber and D. Häussinger	19–24
Re-evaluation of the structure and physiological function of guanidino kinases in fruitfly (<i>Drosophila</i>), sea urchin (<i>Psammechinus miliaris</i>) and man	M. Wyss, D. Maughan and T. Wallimann	255–261
High-yield purification of cytochrome aa_3 and cytochrome caa_3 oxidases from <i>Bacillus subtilis</i> plasma membranes	W. Henning, L. Vo, J. Albanese and B.C. Hill	279–283
Receptors and signal transduction		
Activation of extracellular signal-regulated kinases Erk-1 and Erk-2 by cell swelling in H4IIE hepatoma cells	F. Schliess, R. Schreiber and D. Häussinger	13–17
Arachidonic acid mobilization is suppressed during mitosis: role of cytosolic phospholipase A ₂ activation	R.D. Berlin and S.F. Preston	91–97

Effect of propranolol on platelet signal transduction	D. Dash and K. Rao	99–104
Oscillations in cytosolic free Ca ²⁺ induced by ADP and ATP in single rat hepatocytes display differential sensitivity to application of phorbol ester	C.J. Dixon, P.H. Cobbold and A.K. Green	145–149
Ligation of the α_2 -macroglobulin signalling receptor on macrophages induces protein phosphorylation and an increase in cytosolic pH	U.K. Misra, G. Gawdi and S.V. Pizzo	151–158
Regulation of the induction of ornithine decarboxylase in keratinocytes by retinoids	Z.S. Zheng, G.Z. Xue and J.H. Prystowsky	159–165
Interferon- α down-regulates the interleukin-6 receptor in a human multiple myeloma cell line, U266	J.C. Anthes, Z. Zhan, H. Gilchrest, R.W. Egan, M.I. Siegel and M.M. Billah	175–180
Expression, purification and characterization of the ubiquitous protein kinase C-related kinase 1	R.H. Palmer and P.J. Parker	315–320
Mechanism of action of gonadotropin-releasing hormone upon gonadotropin α -subunit mRNA levels in the α T3-1 cell line: role of Ca ²⁺ and protein kinase C	D. Ben-Menahem, Z. Shraga-Levine, P.L. Mellon and Z. Naor	325–329
Differential coupling of the formyl peptide receptor to adenylate cyclase and phospholipase C by the pertussis toxin-insensitive G ₂ protein	R.C. Tsu, H.W.L. Lai, R.A. Allen and Y.H. Wong	331–339
Cell biology and development		
Hepatic zinc in metallothionein-null mice following zinc challenge: <i>in vivo</i> and <i>in vitro</i> studies	P. Coyle, J.C. Philcox and A.M. Rofe	25–31
Differential expression of prostaglandin-H synthase isoenzymes in normal and activated keratinocytes <i>in vivo</i> and <i>in vitro</i>	K. Scholz, G. Fürstenberger, K. Müller-Decker and F. Marks	263–269
