

QUICKFIT

LABORATORY
GLASSWARE

SHORT NECKED RB FLASK WITH
ROLLED FLANGE

EXTRACTION FLASK

SMALL RB FLASK

**WITH STANDARD
INTERCHANGEABLE
GROUND GLASS
JOINTS**

Flasks of any size or shape with different neck dimensions are available. The accuracy of the ground joints ensures purity of product with the minimum loss of material. These are two of the characteristic advantages of "Quickfit" Laboratory Glassware.

Works: Triplex Works, King's Norton, Birmingham.

IONS

IN SOLUTION

Theory of their Properties

By R. W. GURNEY 10s. 6d. net

A text-book for students of physics, chemistry, and biology alike. The first four chapters summarise the knowledge gained during the last twenty years about ions *in vacuo* and their electronic energies, about liquid solvents and the polar molecules of which they are composed, and about the structure of metallic and ionic crystals. The succeeding chapters show the power of the new methods in the detailed handling of various problems.

CAMBRIDGE UNIVERSITY PRESS

The METABOLISM OF LIVING TISSUES

By E. HOLMES

7s. 6d. net

With a Foreword by Professor Sir F. Gowland Hopkins who writes: "The primary aim of this highly original book is to provide an adequate survey of all that is most significant in our present knowledge of the dynamic side of biochemistry. Read as a whole its wide survey of what we know about biochemical events prepares the mind of the student to appreciate the biological significance of the more purely chemical and physical knowledge which he may possess, or later acquire."

An Introduction to COMPARATIVE BIOCHEMISTRY

By E. BALDWIN

With a Foreword by Professor Sir Frederick G. Hopkins

11 text-figures, 9 tables. 5s. net

Dr Baldwin makes clear by a selection of examples the aims and possibilities of Biochemistry, not merely as a study in the service of human physiology and medicine, but as a science concerned with the history, conditions, and achievements of the living things of water, land, and air.

CAMBRIDGE UNIVERSITY PRESS

APPARATUS for Micro-Chemical Analysis

DETERMINATION OF NITROGEN

MICRO-KJELDAHL METHOD

Distillation Apparatus with Parnos Wagner Automatic Discharge arrangement. The design of this apparatus renders it a great time saver which is important when a series of determinations have to be made.

Apparatus No. 4614, £5.0.0

Full details in List No. 103 A.

SEX HORMONE PREPARATIONS

GONAN

The gonadotropic substance from the urine of pregnancy, standardised biologically in rat units.

ŒSTROFORM

The Œstrogonic hormone available as sterile solutions of an ester of the hormone and standardised biologically in terms of international benzoate units.

PROGESTIN

The hormone of the corpus luteum standardised for its proliferational activity in the immature rabbit uterus which has been previously treated with œstrin.

The Institute of Chemistry of Great Britain and Ireland

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar.

*All communications to be addressed
to the Registrar*

THE LONDON (G.L.) STRAIN OF WISTAR RAT

Increasing demand necessitates larger premises—and earlier orders

Less than 18 months ago the Glaxo Laboratories biochemical laboratory was newly housed at Greenford, Middlesex. Yet already it has become inadequate in size for the three main purposes to which it is devoted, namely:

- (1) The maintenance and distribution of the London strain of Wistar rat, for use in the Glaxo Laboratories themselves and in biochemical and physiological laboratories throughout the world.
- (2) The biological standardisation of the vitamin and other products of Glaxo Laboratories Ltd.
- (3) The pursuit of biochemical investigations.

A larger biochemical laboratory is now being erected in a new separate building, and it

will be ready for occupation in the near future.

The Biochemical Laboratory from its new home will continue to place its services at the disposal of biochemists in this country and abroad, and especially will it endeavour to maintain adequate supplies of the now widely appreciated London strain of Wistar rat.

Removal to the new building may, however, involve some slight temporary dislocation. May we therefore urge biochemists to examine their needs well ahead, and to place their orders for rats as soon as possible.

HEFFER'S BOOKSHOP

BULLETIN DE L'INSTITUT PASTEUR. *Revue et Analyses des Travaux de Bactériologie etc., dans leurs rapports avec la Microbiologie, from the commencement in 1903 to 1921 (Tomes 1-19), Vol. 1, 8vo., half cloth, remainder in parts as issued, very scarce, Paris.* £30

CHEMICAL REVIEWS. Complete set, from the commencement in 1925 to Dec., 1934 (Vols. 1 to 15), with collective Index to Vols. 1 to 10, bound in Vol. 10, 13 Vols., roy. 8vo., cloth, remainder in parts as issued, Baltimore, 1925-34. £17. 17. 0

JAHRESBERICHT ÜBER DIE FORTSCHRITTE DER TIER-CHEMIE. Begründet von R. Maly, hrsg. von R. Andreasch, K. Spiro u.a., 1871-1919. Complete set, from the commencement till its amalgamation with the Hermann-Weiss Jahresbericht, Band 1-49 und Register zu Band 1-30, 8vo., cloth and half cloth, a rare set, Wiesbaden, 1873-1922. £45

ZEITSCHRIFT FÜR ANALYTISCHE CHEMIE. Hrsg. von C. R. Fresenius. Complete set, from the commencement in 1862 to 1923 (Band 1-62) and Register to Band 1-20 and 41-50, together 65 Vols, boards and half cloth, Wiesbaden. £45
Portions of a few early volumes are in reprint.

The above are a few items from our large stock of Scientific Books and Journals.
Now ready: Supplement No. 3 of New Scientific Books and additions to our second-hand stock.
