Price Seven Shillings and Sixpence net

PRINTED IN GREAT BRITAIN

The *Biochemical Journal* is conducted by the Biochemical Society and is published by the Cambridge University Press.

This Society has been instituted solely for the advancement of the Science of Biochemistry. Persons interested in Biochemistry are eligible for election.

Meetings are held at different centres for the communication of papers to the Society.

Members are entitled to receive a copy of the Journal. Further information as to the conditions of membership may be obtained on application to the Hon. Sec., Prof. A. C. Chibnall, Imperial College of Science and Technology, South Kensington, S.W. 7, or to the Hon. Treas., Mr J. Addyman Gardner, 24 Palace Mansions, Kensington, W. 14, to whom subscriptions should be sent.

Papers for publication should be sent to Sir A. Harden, F.R.S., Sunnyholme, Bourne End, Bucks. Communications respecting the printing of the articles, or respecting the purchase of offprints should be addressed to the University Press, Cambridge.

The Journal is issued in monthly numbers and the date at which each paper is received by the editors is printed at the beginning of the paper.

All communications respecting the purchase of copies of the parts or volumes, whether current or back issues, or respecting subscriptions in the case of non-members of the Biochemical Society (£3. 10s. 0d. net per volume (post free) payable in advance) should be addressed to The Cambridge University Press, Fetter Lane, London, E.C. 4, or to the Hon. Treas., Mr J. Addyman Gardner, 24 Palace Mansions, Kensington, W. 14. For prices of back numbers and volumes see list on p. 4 of Wrapper.

Quotations can be given for Buckram binding cases and for binding Subscribers' Sets.

The Cambridge University Press has appointed the University of Chicago Press agent for the sale of the *Biochemical Journal* in the United States of America.

Notice to Contributors

1. Contributors who are members of the Biochemical Society receive 25 copies (without covers) of their papers free and can purchase additional copies if notice be given when their proofs are returned. Other contributors may purchase reprints but receive no free copies.

2. Papers forwarded to the Editors for publication are understood not to be offered to any other Journal for prior or simultaneous publication.

3. All communications intended for publication must be type-written.

4. Contributors residing outside Europe are requested to nominate someone resident in Great Britain to be responsible for the correction of the proofs of their papers. Papers from such contributors should be accompanied by a statement of the number of reprints required.

5. **References.** References to literature should be arranged alphabetically according to authors' names at the end of the communication, each accompanied by the date, title of Journal, volume and page, thus: Ackermann (1912), *Z. Biol.* **59**, 17. In the text the reference should be indicated by the author's name and the date, enclosed in brackets, thus [Ackermann, 1912]. If reference is made to several papers published by one author in a single year, these should be numbered in sequence and the number quoted along with the year both in the text and in the collected references.

6. Chemical formulae should be written, as far as possible, in a single horizontal line.

7. Illustrations and curves accompanying the papers must be carefully drawn, about twice the size of the finished block, on smooth white Bristol boards or ordinary curve paper in Indian ink. Any lettering on these drawings should be lightly inserted in pencil. Further information can be obtained from the Editors.

During 1937 the Journal will be issued in monthly numbers. MSS. for the successive numbers of Vol. 31 should be in the hands of the Editors by the first of each month. Contributors are specially requested to arrange references in the manner uniformly adopted in this Journal. The abbreviations used for the Titles of Journals are those of the "World List of Scientific Periodicals".

CONTENTS

	PAGE
LXXXVI. Polysaccharides synthesised by micro-organisms. III. The molecular structure of galactocarolose produced from glucose by <i>Penicillium Charlesii</i> G. Smith. By W. N. HAWORTH, H. RAISTRICK and M. STACEY	640
LXXXVII. Metabolism of ketonic acids in animal tissues. By H. A. KREBS and W. A. JOHNSON	645
LXXXVIII. Dismutation of pyruvic acid in <i>Gonococcus</i> and <i>Staphylococcus</i> . By H. A. KREBS. (With two figures)	661
LXXXIX. Antineuritic potency of synthetic and natural crystalline vitamin B ₁ as determined by the "bradycardia" method. With a statistical study of the degree of accuracy of the "bradycardia" method. By P. C. LEONG and L. J. HARRIS. (With three figures)	672
XC. A study of the effect of overfeeding on the protein metabolism of man. I. The effect of superimposing raw and boiled milks on a diet adequate for maintenance. II. The superimposition, on a diet adequate for maintenance, of beef (or soya flour) + lactose + butter, equivalent in protein, carbohydrate and fat content to a litre of milk. By D. P. CUTHBERTSON, A. McCUTCHEON and H. N. MUNRO. (With three figures)	681
XCI. A study of the effect of overfeeding on the protein metabolism of man. III. The protein-saving effect of carbohydrate and fat when superimposed on a diet adequate for maintenance. By D. P. CUTHBERTSON and H. N. MUNRO. (With three figures)	694
XCII. Manometric studies on the effect of tissue extract upon calcium precipitation. By A. LASNITZKI. (With three figures)	706
