

Review

Multiple steps in the regulation of transcription-factor level and activity

by C.F. Calkhoven and G. AB

329–342

Research Communications

Phosphatidylserine-mediated adhesion of T-cells to endothelial cells

J. Qu, L.A. Conroy, J.H. Walker, F.B.P. Wooding and J.A. Lucy

343–346

Thrombin receptors modulate insulin-stimulated phosphatidylinositol 3,4,5-trisphosphate accumulation in 1321N1 astrocytoma cells

I.H. Batty and C.P. Downes

347–351

Research Papers

Proteins

Characterization of calf liver Cu,Zn-metallothionein: naturally variable Cu and Zn stoichiometries

P. Chen, P. Onana, C.F. Shaw, III and D.H. Petering

389–394

Stoichiometry and cluster specificity of copper binding to metallothionein: homogeneous metal clusters

P. Chen, A. Munoz, D. Nettesheim, C.F. Shaw, III and D.H. Petering

395–402

Interaction of dibutyltin-3-hydroxyflavone bromide with the 16 kDa proteolipid indicates the disposition of proton translocation sites of the vacuolar ATPase

G. Hughes, M.A. Harrison, Y.-I. Kim, D.E. Griffiths, M.E. Finbow and J.B.C. Findlay

425–431

Evidence that residues exposed on the three-fold channels have active roles in the mechanism of ferritin iron incorporation

S. Levi, P. Santambrogio, B. Corsi, A. Cozzi and P. Arosio

467–473

Structural changes in subdomain 2 of G-actin observed by fluorescence spectroscopy

J. Moraczewska, H. Strzelecka-Golaszewska, P.D.J. Moens and C.G. dos Remedios

605–611

Enzymes

Activation by phosphorylation of phosphofructokinase from the annelid *Lumbricus terrestris* and comparison of phosphorylated sites in invertebrate phosphofructokinases

R. Schaloske, M. Biethinger, L.A. Fothergill-Gilmore and H.W. Hofer

377–383

Magnetic and optical properties of copper-substituted alcohol dehydrogenase: a bithiolate copper(II) complex

J.A. Farrar, G. Formicka, M. Zeppezauer and A.J. Thomson

447–456

Evidence for the presence of essential histidine and cysteine residues in platelet cGMP-inhibited phosphodiesterase

F.A. Ghazaleh, G.A. Omburo and R.L. Colman

495–501

Characterization of a platelet-activating factor acetylhydrolase secreted by the nematode parasite *Nippostrongylus brasiliensis*

M.E. Grigg, K. Gounaris and M.E. Selkirk

541–547

Secondary structure of NADPH:protochlorophyllide oxidoreductase examined by circular dichroism and prediction methods

S.J. Birve, E. Selstam and L.B.-Å. Johansson

549–555

Structural investigation of the molybdenum site of the periplasmic nitrate reductase from *Thiosphaera pantotropha* by X-ray absorption spectroscopy

B. Bennett, J.M. Charnock, H.J. Sears, B.C. Berks, A.J. Thomson, S.J. Ferguson, C.D. Garner and D.J. Richardson

557–563

Carbohydrates and lipids

Activation of protein kinase C by lysophosphatidic acid: dependence on composition of phospholipid vesicles

J.J. Sando and O.I. Chertihin

583–588

Synthesis of non-hydroxy-galactosylceramides and galactosyldiglycerides by hydroxy-ceramide galactosyltransferase

P. van der Bijl, G.J. Strous, M. Lopes-Cardozo, J. Thomas-Oates and G. van Meer

589–597

Molecular characterization of quail apolipoprotein very-low-density lipoprotein II: disulphide-bond-mediated dimerization is not essential for inhibition of lipoprotein lipase

I. MacLachlan, E. Steyrer, A. Hermetter, J. Nimpf and W.J. Schneider

599–604

Gene structure and expression

Effect of dietary protein restriction on liver transcription factors

N.W. Marten, F.M. Sladek and D.S. Straus

361–370

Alteration in gene expression of branched-chain keto acid dehydrogenase kinase but not in gene expression of its substrate in the liver of clofibrate-treated rats

H.S. Paul, W.-Q. Liu and S.A. Adibi

411–417

Differential regulation of neuronal nicotinic acetylcholine receptor subunit gene promoters by Brn-3 POU family transcription factors	N.G.N. Milton, A. Bessis, J.-P. Changeux and D.S. Latchman	419–423
Genetic analysis of the phenobarbital regulation of the cytochrome <i>P</i> -450 2b-9 and aldehyde dehydrogenase type 2 mRNAs in mouse liver	M. Damon, A. Fautrel, A. Guillouzo and L. Corcos	481–486
Role of interleukin 6 and corticosteroids in the regulation of expression of glutathione S-transferases in primary cultures of rat hepatocytes	S.H. Voss, Y. Park, S.-O. Kwon, R. Whalen and T.D. Boyer	627–632
Regulation of metabolism		
Effect of multiple cytokines plus bacterial endotoxin on glucose and nitric oxide production by cultured hepatocytes	E.D. Ceppi, F.S. Smith and M.A. Titheradge	503–507
Measurement of the turnover of glycogen phosphorylase by GC/MS using stable isotope derivatives of pyridoxine (vitamin B ₆)	R.J. Beynon, D.M. Leyland, R.P. Evershed, R.H.T. Edwards and S.P. Coburn	613–619
11 β -Hydroxysteroid dehydrogenase type 1 expression in 2S FAZA hepatoma cells is hormonally regulated: a model system for the study of hepatic glucocorticoid metabolism	M.W. Voice, J.R. Seckl, C.R.W. Edwards and K.E. Chapman	621–625
Membranes and bioenergetics		
Hexose uptake in <i>Trypanosoma cruzi</i> : structure–activity relationship between substrate and transporter	E. Tetaud, S. Chabas, C. Giroud, M.P. Barrett and T. Baltz	353–359
Labelling the Ca ²⁺ -ATPase of skeletal-muscle sarcoplasmic reticulum with the cross-linker <i>o</i> -phthalaldehyde	Y.M. Khan, M. Wictome, J.M. East and A.G. Lee	433–437
The mechanism of inhibition of the Ca ²⁺ -ATPase of skeletal-muscle sarcoplasmic reticulum by the cross-linker <i>o</i> -phthalaldehyde	Y.M. Khan, A.P. Starling, J.M. East and A.G. Lee	439–445
Functional characterization of a recombinant sodium-dependent nucleoside transporter with selectivity for pyrimidine nucleosides (cNT1 _{rat}) by transient expression in cultured mammalian cells	X. Fang, F.E. Parkinson, D.A. Mowles, J.D. Young and C.E. Cass	457–465
Characterization of the stilbenedisulphonate binding site on band 3 Memphis variant II (Pro-854 → Leu)	J.M. Salhany, R.L. Sloan and L.M. Schopfer	509–514
Effects of steroids and verapamil on P-glycoprotein ATPase activity: progesterone, desoxycorticosterone, corticosterone and verapamil are mutually non-exclusive modulators	S. Orłowski, L.M. Mir, J. Belehradek Jr. and M. Garrigos	515–522
Receptors and signal transduction		
Ca ²⁺ -signalling mechanisms of the β_2 integrin on neutrophils: involvement of phospholipase C γ 2 and Ins(1,4,5)P ₃	C. Hellberg, L. Molony, L. Zheng and T. Andersson	403–409
Synergistic activation of PtdIns 3-kinase by tyrosine-phosphorylated peptide and $\beta\gamma$ -subunits of GTP-binding proteins	T. Okada, O. Hazeki, M. Ui and T. Katada	475–480
Cyclophilin B mediates cyclosporin A incorporation in human blood T-lymphocytes through the specific binding of complexed drug to the cell surface	F. Allain, A. Denys and G. Spik	565–570
Involvement of the N-terminal part of cyclophilin B in the interaction with specific Jurkat T-cell binding sites	C. Mariller, B. Haendler, F. Allain, A. Denys and G. Spik	571–576
Molecular recognition of peptide and non-peptide ligands by the extracellular domains of neurohypophysial hormone receptors	J. Howl and M. Wheatley	577–582
Cell biology and development		
The respiratory-chain poison antimycin A promotes the formation of DNA single-strand breaks and reduces toxicity in U937 cells exposed to t-butylhydroperoxide	A. Guidarelli, L. Brambilla, C. Rota, A. Tomasi, F. Cattabeni and O. Cantoni	371–375
Apoptosis induction resulting from proteasome inhibition	K. Shinohara, M. Tomioka, H. Nakano, S. Toné, H. Ito and S. Kawashima	385–388
Characterization of the effects of Ca ²⁺ depletion on the synthesis, phosphorylation and secretion of caseins in lactating mammary epithelial cells	J.S. Duncan and R.D. Burgoyne	487–493

Affinity for the nuclear compartment and expression during cell differentiation implicate phosphorylated Groucho/TLE1 forms of higher molecular mass in nuclear functions	J. Husain, R. Lo, D. Grbavec and S. Stifani	523–531
An uncleaved glycosylphosphatidylinositol signal mediates Ca^{2+} -sensitive protein degradation	P.C. Pauly and C. Klein	533–540
