Cambridge University Press
Perspectives in Biochemistry

Thirty-one Essays presented to
SIR FREDERICK GOWLAND HOPKINS
by past and present members of his Laboratory

Edited by JOSEPH NEEDHAM and DAVID E. GREEN
15s. net

These thirty-one essays touch on many aspects of the science of life, with all its great bearing on human welfare; physiology and zoology, embryology and genetics, medicine, bacteriology and nutrition. The aim of the writers has been to indicate the most promising lines of advance in the various fields which they survey, and while maintaining a due standard of criticism, to speculate a little on the likely paths of future thought and discovery. The volume commemorates the 75th birthday of Sir Frederick Gowland Hopkins.

CAMBRIDGE UNIVERSITY PRESS

Second Edition

VITAMINS
in Theory and Practice
By Dr Leslie HARRIS

Based on a Series of Lectures given at The Royal Institution
66 illustrations. 8s. 6d. net

Contains some astonishing data on the improvement in nutritional condition of school children...should hearten all who desire to see progress in this direction go still further.

Up-to-date, delightfully written, authoritative, a most valuable addition to current vitamin literature; of value to every biochemist.

Informative, meticulous accurate...an undoubted success.

Gives all the essential facts, and many interesting sidelights, numerous striking and unusual illustrations.

An excellent survey, the best at present available, should have a wide appeal: a standard text book which is destined to become a classic.

CAMBRIDGE UNIVERSITY PRESS
NICOTINIC ACID
B.D.H.

The results of recent investigation suggest that nicotinic acid is a precursor of the pellagra-preventing factor of the vitamin B complex. Research workers are advised that pure nicotinic acid made in the B.D.H. laboratories can be supplied from stock.

Other biological products available:
Ergosterol, Calciferol, Carotene,
Digitonin, Distilled Vitamin A,
Vitamin-free Diet (for rats)
