A NEW STIRRER GLAND FITTING. One of the many fittings in the "Quickfit" range, this stirrer replaces the mercury seal. It consists of a soundly constructed brass packing gland, on which a pulley on a ball-bearing is mounted. Any desired form of stirrer may be used, and it will be noticed that the construction is such that the strain of the drive is taken on the body of the gland and not on the glass itself. Incorporated in the fitting, as shown in the illustration, is a "Quickfit" gas-tight standard conical joint which may be used for vacuum work. A representative display of "Quickfit" apparatus is always on view at our offices, 1 Albemarle Street, W.1.

The Institute of Chemistry of Great Britain and Ireland

**THE INSTITUTE OF CHEMISTRY** was established in 1877 to provide the Government and the public with the means of recognizing those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar.

*All communications to be addressed to the Registrar*

**B.D.H. BIOLOGICAL PRODUCTS**

Among the chemicals manufactured in the B.D.H. Laboratories which are of special interest to Biochemists are

NICOTINIC ACID
ERGOSTEROL
CALCIFEROL
CAROTENE
DIGITONIN
VITAMIN A

Applications are invited for a copy of the current B.D.H. Price List

GRAHAM STREET LONDON N.1
Recent investigations have brought steroids into great prominence, both in the research laboratory and in the chemical works. Their relationship not only with the bile acids, but also with hormones, vitamins and glucosides, makes them increasingly important to biochemical workers.
