QUICKFIT
LABORATORY GLASSWARE
WITH STANDARD INTERCHANGEABLE
GROUND GLASS JOINTS
STEAM DISTILLATION ASSEMBLY
This assembly illustrates very well the unrivalled simplicity and convenience of "Quickfit" apparatus. Notice particularly the compact combined splashhead and steam-lead. "Quickfit" ground glass joints as standard equipment ensures work of the highest accuracy, through absence of quantitative losses, and greater purity of product.

A representative display of "Quickfit" apparatus is always on view at our offices, 1 Albemarle Street, W.1

NICOTINIC ACID
B.D.H.
Recent investigation has shown that nicotinic acid has a curative action in human pellagra and canine black-tongue, thus having the physiological properties of the 'P.P.' factor. Nicotinic acid can be supplied in the pure crystalline form, or in tablets containing 30 mg. of pure acid.

Other biological products available:
Calciferol, Carotene, Cholesterol,
Ergosterol, Digitonin,
Distilled Vitamin A,
Vitamin-free Diet (for feeding rats).
Prices on application

The Institute of Chemistry of Great Britain and Ireland

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar.

All communications to be addressed to the Registrar

Inbred Rats
FOR RESEARCH WORKERS

Fifteen albino rats were brought to the Glaxo Laboratories in 1924 from the Wistar Institute, Philadelphia.

They were destined to supply the Old World.

Today, in the Glaxo Laboratories alone, there are 4,000 descendants of the original fifteen. In the last fourteen years 38,000 have been used here for research, for standardisation work, and for further breeding. Almost as many have been supplied to meet the needs of other laboratories.

Six strains have been maintained by continuous brother-sister mating for some 30 generations, giving a genetic make-up as nearly homozygous as can be achieved. For the purity and the viability of the stock, Wistar Albinos of the London Strain are in demand for biochemical research throughout Europe, Asia, Africa and Australasia.

Young rats are available from this stock to investigators at very short notice, as well as breeding pairs about three months old. If adult rats are needed, however, it is wise to give at least two months notice, as it is not possible, owing to our own research needs, to maintain a stock of adults for supply to outside workers.

HEFFER'S BOOKSHOP

The items below are from our large stock of Scientific Books and Journals. Catalogues will be sent on application, and correspondence is invited.

ANALYST (The). The Organ of the Society of Public Analysts and other Analytical Chemists, from Jan. 1880 to Dec. 1936 (Vols. 5–61), 19 vols. cloth, 3 vols. half roan, rest in parts as issued, roy. 8vo. £55

JOURNAL OF HYGIENE (The). Edited by G. H. F. Nuttall, from the commencement in January 1901 to December 1935 (Vols. 1–35), with Plague Supplements Nos. 1–5 and General Index to Vols. 1–10, roy. 8vo., in parts as issued. £45

With General Index to Vols. 1–10.

Many of the volumes have the bookplates of G. H. F. Nuttall, the founder and editor of this important journal.

We have great experience in supplying English and Foreign Scientific and other Periodicals to all parts of the world, and shall be pleased to give quotations.
