

**Review**

Regulatory mechanisms that modulate signalling by G-protein-coupled receptors

by S. Böhm, E.F. Grady and N.W. Bunnett

1–18

**Research Communications**

Activation of CPP32 and Mch3 $\alpha$  in wild-type p53-induced apoptosis

J.M. Chandler, E.S. Alnemri, G.M. Cohen and M. MacFarlane

19–23

Electrospray mass-spectrometric, spectrophotometric and electrochemical methods do not provide evidence for the binding of nitric oxide by pyocyanine at pH 7

D.V. Vukomanovic, D.E. Zoutman, J.A. Stone, G.S. Marks, J.F. Brien and K. Nakatsu

25–29

Diphospho-*myo*-inositol phosphates from *Dictyostelium* identified as D-6-diphospho-*myo*-inositol pentakisphosphate and D-5,6-bisdiphospho-*myo*-inositol tetrakisphosphate

T. Laussmann, K.M. Reddy, K.K. Reddy, J.R. Falck and G. Vogel

31–33

**Research Papers****Proteins**

Expression and characterization of *Pseudomonas aeruginosa* cytochrome c-551 and two site-directed mutants: role of tryptophan 56 in the modulation of redox properties

F. Cutruzzolà, I. Ciabatti, G. Rolli, S. Falcinelli, M. Arese, G. Raghino, A. Anselmino, E. Zennaro and M.C. Silvestrini

35–42

The variant-specific surface protein of *Giardia*, VSP4A1, is a glycosylated and palmitoylated protein

P. Papanastasiou, M.J. McConville, J. Ralton and P. Köhler

49–56

Difference in hepatic metallothionein content in Antarctic red-blooded and haemoglobinless fish: undetectable metallothionein levels in haemoglobinless fish is accompanied by accumulation of untranslated metallothionein mRNA

R. Scudiero, V. Carginale, M. Riggio, C. Capasso, A. Capasso, P. Kille, G. di Prisco and E. Parisi

207–211

Biosynthesis of 'essential' amino acids by scleractinian corals

L.M. FitzGerald and A.M. Szmant

213–221

Identification of an N-capping box that affects the  $\alpha$ 6-helix propensity in glutathione S-transferase superfamily proteins: a role for an invariant aspartic residue

A. Aceto, B. Dragani, S. Melino, N. Allocati, M. Masulli, C. Di Ilio and R. Petruzzelli

229–234

Highly conserved residue arginine-15 is required for the Ca<sup>2+</sup>-dependent properties of the  $\gamma$ -carboxyglutamic acid domain of human anticoagulation Protein C and activated Protein C

A. Thariath and F.J. Castellino

309–315

Quantification of malondialdehyde and 4-hydroxynonenal adducts to lysine residues in native and oxidized human low-density lipoprotein

J.R. Requena, M.X. Fu, M.U. Ahmed, A.J. Jenkins, T.J. Lyons, J.W. Baynes and S.R. Thorpe

317–325

Secretion of a type II integral membrane protein induced by mutation of the transmembrane segment

I. Lemire, C. Lazure, P. Crine and G. Boileau

335–342

**Enzymes**

Glutathione-dependent activities of *Trypanosoma cruzi* p52 makes it a new member of the thiol:disulphide oxidoreductase family

M. Moutiez, E. Québécois, C. Sergheraert, V. Lucas, A. Tartar and E. Davioud-Charvet

43–48

Structural instability of mutant  $\beta$ -cell glucokinase: implications for the molecular pathogenesis of maturity-onset diabetes of the young (type-2)

P. Kesavan, L. Wang, E. Davis, A. Cuesta, I. Sweet, K. Niswender, M.A. Magnuson and F.M. Matschinsky

57–63

Telokin (kinase-related protein) modulates the oligomeric state of smooth-muscle myosin light-chain kinase and its interaction with myosin filaments

K. Nieznanski and A. Sobieszek

65–71

Involvement of two basic residues (Lys-270 and Arg-276) of human liver 3 $\alpha$ -hydroxysteroid dehydrogenase in NADP(H) binding and activation by sulphobromophthalein: site-directed mutagenesis and kinetic analysis

K. Matsuura, Y. Tamada, K. Sato, H. Iwasa, G. Miwa, Y. Deyashiki and A. Hara

89–93

Epoxyethylglycyl peptides as inhibitors of oligosaccharyltransferase: double-labelling of the active site

E. Bause, M. Wesemann, A. Bartoschek and W. Breuer

95–102

Identification of a putative flexible loop in <i>Arabidopsis</i> glutathione synthetase	C.-L. Wang and D.J. Oliver	241–244
<b>Carbohydrates and lipids</b>		
Effects of charged lipids on the interaction of cholesteryl ester transfer protein with lipid microemulsions	O.V. Rajaram and W.H. Sawyer	159–165
Metabolism of 27-, 25- and 24-hydroxycholesterol in rat glial cells and neurons	J. Zhang, Y. Akwa, M. El-Etr, E.-E. Baulieu and J. Sjövall	175–184
<b>Gene structure and expression</b>		
The octamer-binding proteins Oct-1 and Oct-2 repress the HIV long terminal repeat promoter and its transactivation by Tat	Y.-Z. Liu and D.S. Latchman	155–158
Regulation of the human $\alpha 2(1)$ procollagen gene by sequences adjacent to the CCAAT box	M. Collins, V.D. Leaner, M. Madikizela and M.I. Parker	199–206
Regulation by fatty acids of angiotensinogen gene expression in preadipose cells	I. Safonova, J. Aubert, R. Negrel and G. Ailhaud	235–239
Structure of active chromatin: isolation and characterization of transcriptionally active chromatin from rat liver	K. Tikoo, S. Gupta, A.A. Hamid, V. Shah, B. Chatterjee and Z. Ali	273–279
Structure of active chromatin: covalent modifications of histones in active and inactive genes of control and hypothyroid rat liver	K. Tikoo and Z. Ali	281–287
Structure of active chromatin: higher-order folding of transcriptionally active chromatin in control and hypothyroid rat liver	K. Tikoo, Q.A. Hamid and Z. Ali	289–296
CCAAT-enhancer-binding protein $\alpha$ (C/EBP $\alpha$ ) is required for the thyroid hormone but not the retinoic acid induction of phosphoenolpyruvate carboxykinase (PEPCK) gene transcription	E.A. Park, S. Song, M. Olive and W.J. Roesler	343–349
<b>Regulation of metabolism</b>		
Mitochondrial creatine kinase isoform expression does not correlate with its mode of action	K. Anflous, V. Veksler, P. Mateo, F. Samson, V. Saks and R. Ventura-Clapier	73–78
Finite change analysis of glycolytic intermediates in tuber tissue of lines of transgenic potato ( <i>Solanum tuberosum</i> ) overexpressing phosphofructokinase	S. Thomas, P.J.F. Mooney, M.M. Burrell and D.A. Fell	111–117
Metabolic Control Analysis of glycolysis in tuber tissue of potato ( <i>Solanum tuberosum</i> ): explanation for the low control coefficient of phosphofructokinase over respiratory flux	S. Thomas, P.J.F. Mooney, M.M. Burrell and D.A. Fell	119–127
Transient inactivation of phosphatidylethanolamine <i>N</i> -methyltransferase-2 and activation of cytidine triphosphate:phosphocholine cytidyltransferase during non-neoplastic liver growth	L. Tessitore, Z. Cui and D.E. Vance	151–154
Pathways of peroxyxynitrite oxidation of thiol groups	C. Quijano, B. Alvarez, R.M. Gatti, O. Augusto and R. Radi	167–173
Nitric oxide stimulates glucose transport and metabolism in rat skeletal muscle <i>in vitro</i>	M.E. Young, G.K. Radda and B. Leighton	223–228
CGP 48664, a potent and specific <i>S</i> -adenosylmethionine decarboxylase inhibitor: effects on regulation and stability of the enzyme	F. Svensson, H. Mett and L. Persson	297–302
Regulation of glycogen synthase and phosphorylase during recovery from high-intensity exercise in the rat	L. Bräu, L.D.M.C.B. Ferreira, S. Nikolovski, G. Raja, T.N. Palmer and P.A. Fournier	303–308
<b>Membranes and bioenergetics</b>		
Calcium-dependence of synexin binding may determine aggregation and fusion of lamellar bodies	N. Sen, A.R. Spitzer and A. Chander	103–109
Evidence for $P_2$ -purinoceptor-mediated uptake of $Ca^{2+}$ across a fish ( <i>Oreochromis mossambicus</i> ) intestinal brush border membrane	P.H.M. Klaren, S.E. Wendelaar Bonga and G. Flik	129–134
The plasma-membrane $Ca^{2+}$ -ATPase of <i>Leishmania donovani</i> is an extrusion pump for $Ca^{2+}$	D. Mandal, T. Mukherjee, S. Sarkar, S. Majumdar and A. Bhaduri	251–257

Functional expression and apical localization of the cystic fibrosis transmembrane conductance regulator in MDCK I cells	A. Mohamed, D. Ferguson, F.S. Seibert, H.-M. Cai, N. Kartner, S. Grinstein, J.R. Riordan and G.L. Lukacs	<b>259–265</b>
<b>Receptors and signal transduction</b>		
cAMP suppresses p21 <sup>ras</sup> and Raf-1 responses but not the Erk-1 response to granulocyte-colony-stimulating factor: possible Raf-1-independent activation of Erk-1	X.F. Csar, A.C. Ward, B.W. Hoffmann, G.G. Guy and J.A. Hamilton	<b>79–87</b>
Expression of leptin and $\beta_3$ -adrenergic receptors in rat adipose tissue in altered thyroid states	J.N. Fain, E.C. Coronel, M.J. Beauchamp and S.W. Bahouth	<b>145–150</b>
Regulation of the activity of MEK kinase (MEKK1) by autophosphorylation within the kinase activation domain	J.C. Deak and D.J. Templeton	<b>185–192</b>
Analysis of mitogen-activated protein kinase activation by naturally occurring splice variants of TrkC, the receptor for neurotrophin-3	F.J. Gunn-Moore, A.G. Williams and J.M. Tavaré	<b>192–198</b>
Involvement of the Ca <sup>2+</sup> /calmodulin-dependent protein kinase II pathway in the Ca <sup>2+</sup> -mediated regulation of the capacitative Ca <sup>2+</sup> entry in <i>Xenopus</i> oocytes	F. Matifat, F. Fournier, T. Lorca, J. P. Capony, G. Brûlé and T. Collin	<b>267–272</b>
Sphingosylphosphocholine modulates the ryanodine receptor/calcium-release channel of cardiac sarcoplasmic reticulum membranes	R. Betto, A. Teresi, F. Turcato, G. Salviati, R.A. Sabbadini, K. Krown, C.C. Glembotski, L.A. Kindman, C. Dettbarn, Y. Pereon, K. Yasui and P.T. Palade	<b>327–333</b>
The CD46 transmembrane domain is required for efficient formation of measles-virus-mediated syncytium	T. Seya, M. Kurita, K. Iwata, Y. Yanagi, K. Tanaka, K. Shida, M. Hatanaka, M. Matsumoto, S. Jun, A. Hirano, S. Ueda and S. Nagasawa	<b>135–144</b>
Chick osteocyte-derived protein inhibits osteoclastic bone resorption	A. Maejima-Ikeda, M. Aoki, K. Tsuritani, K. Kamioka, K. Hiura, T. Miyoshi, H. Hara, T. Takano-Yamamoto and M. Kumegawa	<b>245–250</b>
<b>BJ Letters</b>		
Enzyme–substrate interaction in the catalytic triad of serine proteases: increase in the $pK_a$ of Asp <sup>102</sup>	H. Neuvonen	<b>351–352</b>
