

## Review

- Structure and physiological function of calpains** **721–732**  
 by H. Sorimachi, S. Ishiura and K. Suzuki

## Research Communications

- Endothelin attenuates apoptosis in human smooth muscle cells **733–737**  
 J.R. Wu-Wong, W.J. Chiou, R. Dickinson and T.J. Opgenorth
- Molecular cloning and characterization of a nitrobenzylthioinosine-insensitive (*ei*) equilibrative nucleoside transporter from human placenta **739–743**  
 M. Griffiths, S.Y.M. Yao, F. Abidi, S.E.V. Phillips, C.E. Cass, J.D. Young and S.A. Baldwin

## Research Papers

### Proteins

- Nuclear localization domain of thyroid transcription factor-1 in respiratory epithelial cells **757–761**  
 M. Ghaffari, X. Zeng, J.A. Whitsett and C. Yan
- Effect of aging on the chaperone-like function of human  $\alpha$ -crystallin assessed by three methods **763–768**  
 B.K. Derham and J.J. Harding
- Metal-ion-binding properties of synthetic conantokin-G **777–783**  
 T. Blandl, J. Zajicek, M. Prorok and F.J. Castellino
- Reconstitution, morphology and crystallization of a fatty acid  $\beta$ -oxidation multienzyme complex from *Pseudomonas fragi* **815–820**  
 M. Ishikawa, Y. Mikami, J. Usukura, H. Iwasaki, H. Shinagawa and K. Morikawa
- Covalent complex of microperoxidase with a 21-residue synthetic peptide as a maquette for low-molecular-mass redox proteins **833–840**  
 R. Ippoliti, A. Picciau, R. Santucci, G. Antonini, M. Brunori and G. Raghino

### Enzymes

- Separate bisphosphatase domain of chicken liver 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase: the role of the C-terminal tail in modulating enzyme activity **751–756**  
 L. Li, S. Ling, C.-l. Wu, W.-z. Yao and G.-j. Xu
- Dependence of the anti-chaperone activity of protein disulphide isomerase on its chaperone activity **841–846**  
 J.-l. Song, H. Quan and C.-c. Wang
- Mechanism of acylphosphatase inactivation by Woodward's reagent K **855–861**  
 P. Paoli, T. Fiaschi, P. Cirri, G. Camici, G. Manao, G. Cappugi, G. Raugei, G. Moneti and G. Ramponi
- Purification of feline lysosomal  $\alpha$ -mannosidase, determination of its cDNA sequence and identification of a mutation causing  $\alpha$ -mannosidosis in Persian cats **863–870**  
 T. Berg, O.K. Tollersrud, S.U. Walkley, D. Siegel and Ø. Nilssen
- Human endothelin-converting enzyme (ECE-1): three isoforms with distinct subcellular localizations **871–877**  
 A. Schweizer, O. Valdenaire, P. Nelböck, U. Deuschle, J.-B. Dumas Milne Edwards, J.G. Stumpf and B.-M. Löffler
- Zeta, a novel class of glutathione transferases in a range of species from plants to humans **929–935**  
 P.G. Board, R.T. Baker, G. Chelvanayagam and L.S. Jermini
- Serratia marcescens* chitobiase is a retaining glycosidase utilizing substrate acetamido group participation **945–949**  
 S. Drouillard, S. Armand, G.J. Davies, C.E. Vorgias and B. Henrissat

### Carbohydrates and lipids

- Nascent very-low-density lipoprotein triacylglycerol hydrolysis by lipoprotein lipase is inhibited by apolipoprotein E in a dose-dependent manner **745–750**  
 M.C. Jong, V.E.H. Dahlmans, M.H. Hofker and L.M. Havekes
- Glycosylphosphatidylinositols of *Plasmodium chabaudi chabaudi*: a basis for the study of malarial glycolipid toxins in a rodent model **905–911**  
 P. Gerold, L. Vivas, S.A. Ogun, N. Azzouz, K.N. Brown, A.A. Holder and R.T. Schwarz

## Gene structure and expression

- Alternative mRNA splicing of 3'-terminal exons generates ascorbate peroxidase isoenzymes in spinach (*Spinacia oleracea*) chloroplasts  
T. Ishikawa, K. Yoshimura, M. Tamoi, T. Takeda and S. Shigeoka **795–800**
- Mammalian cells express two differently localized Bag-1 isoforms generated by alternative translation initiation  
G. Packham, M. Brimmell and J.L. Cleveland **807–813**
- Structure of the mouse leukaemia inhibitory factor receptor gene: regulated expression of mRNA encoding a soluble receptor isoform from an alternative 5' untranslated region  
I. Chambers, A. Cozens, J. Broadbent, M. Robertson, M. Lee, M. Li and A. Smith **879–888**

## Regulation of metabolism

- Mechanism of the antimycin A-mediated enhancement of t-butylhydroperoxide-induced single-strand breakage in DNA  
A. Guidarelli, E. Clementi, L. Brambilla and O. Cantoni **801–806**
- Haem precursor  $\delta$ -aminolaevulinic acid induces activation of the cytosolic iron regulatory protein 1  
H. Carvalho, E.J.H. Bechara, R. Meneghini and M. Demasi **827–832**
- Excess putrescine accumulation inhibits the formation of modified eukaryotic initiation factor 5A (eIF-5A) and induces apoptosis  
M.E. Tome, S.M. Fiser, C.M. Payne and E.W. Gerner **847–854**
- Effects of adrenaline on triacylglycerol synthesis and turnover in ventricular myocytes from adult rats  
E.M.S. Swanton and E.D. Saggerson **913–922**

## Membranes and bioenergetics

- Conformational changes of P-glycoprotein by nucleotide binding  
G. Wang, R. Pincheira, M. Zhang and J.-T. Zhang **897–904**

## Receptors and signal transduction

- Differential regulation of types-1 and -3 inositol trisphosphate receptors by cytosolic  $Ca^{2+}$   
T.J.A. Cardy, D. Traynor and C.W. Taylor **785–793**
- Selective labelling of cell-surface polyamine-binding proteins on leukaemic and solid-tumour cell types using a new polyamine photoprobe  
D.M. Felschow, Z. Mi, J. Stanek, J. Frei and C.W. Porter **889–895**

## Cell biology and development

- Integrin-dependent translocation of p160<sup>ROCK</sup> to cytoskeletal complex in thrombin-stimulated human platelets  
A. Fujita, Y. Saito, T. Ishizaki, M. Maekawa, K. Fujisawa, F. Ushikubi and S. Narumiya **769–775**
- Characterization of a *Drosophila* phosphorylation-dependent nuclear-localization-signal-binding protein  
I. Cserpán, E. Máthé, A. Patthy and A. Udvardy **821–826**
- Role of membrane-anchored heparin-binding epidermal growth factor-like growth factor and CD9 on macrophages  
N. Ouchi, S. Kihara, S. Yamashita, S. Higashiyama, T. Nakagawa, I. Shimomura, T. Funahashi, K. Kameda-Takemura, S. Kawata, N. Taniguchi and Y. Matsuzawa **923–928**
- Temperature-sensitive mRNA degradation is an early event in hepatocyte de-differentiation  
X.-J. Wang, C.P. Hodgkinson, M.C. Wright and A.J. Paine **937–944**

## Correction

- Co-oxidation of NADH and NADPH by a mammalian 15-lipoxygenase: inhibition of lipoxygenase activity at near-physiological NADH concentrations  
by V.B. O'Donnell and H. Kühn (volume 327, pages 203–208, 1997) **951**
