Third Edition

VITAMINS
in Theory and Practice

By Dr Leslie HARRIS

Based on a Series of Lectures given at The Royal Institution
66 illustrations. 8s. 6d. net

Contains some astonishing data on the improvement in nutritional condition of school children...should hearten all who desire to see progress in this direction go still further. Lancet
Up-to-date, delightfully written, authoritative, a most valuable addition to current vitamin literature; of value to every biochemist. Science
Informative, meticulously accurate...an undoubted success. Nature
Gives all the essential facts, and many interesting sidelights, numerous striking and unusual illustrations. Science News Letter
An excellent survey, the best at present available, should have a wide appeal: a standard text book which is destined to become a classic. Medical Times

CAMBRIDGE UNIVERSITY PRESS
BACTERIAL METABOLISM

By MARJORY STEPHENSON, Sc.D.

Second Edition, Rewritten and Enlarged
With Diagrams. 21s. net

This book, originally one of the series of Monographs on Biochemistry, has now been completely revised and brought up to date, and has been developed beyond the compass of a monograph, so that it is now published independently of the Series. It will be found indispensable to bacteriologists, pathologists, botanists and soil chemists.

ORGANIC
AND
BIOCHEMISTRY

By R. H. A. PLIMMER, D.Sc.

Sixth Edition, with Coloured Plate and other Illustrations in the Text. 21s. net

It has not been found necessary to make major alterations to this edition, but such changes have been made as were needed, and new matter has been added, without making a large increase in size.
The B.D.H. CAPILLATOR
for pH determinations in pathological and biological work when only small quantities of fluid are available, and for turbid or dark coloured liquids.

A Capillator consists of a series of sealed capillary tubes containing mixed buffer solutions and an indicator, fastened in groups of three to a 3" by 4½" card. The groups on each card exhibit the complete colour changes of the indicator. Tests are made by mixing indicator and fluid in a similar capillary tube used as a micro-pipette, for comparison with the Capillator Standards.

Capillator cards and outfits are illustrated in the B.D.H. indicator price list.

CAMBRIDGE UNIVERSITY PRESS

The Institute of Chemistry of Great Britain and Ireland

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar.

All communications to be addressed to the Registrar

THE INSTITUTE OF CHEMISTRY
30 Russell Square, London, W.C. 1
DIETARY NITROGEN

The Glaxo Laboratories have now specialised for several years in the preparation of various grades of caseinogen and its products, for use in the stock and “basal” diets required in biochemical investigations.

A certificate of analysis is available for every batch prepared. The grades suitable for use in vitamin work have been proved by animal test to be free from the individual vitamins indicated.

All “extracted” Casein is tested for the amount of ether-soluble matter still extractable after complete acid hydrolysis. The “ashless” variety is assayed for its calcium content. Nitrogen contents are determined on all grades by the Kjeldahl process.

The grades described are available in quantities from 1 kg. upwards. Special prices will be quoted for contracts or bulk orders (50 kg. or over). Enquiries are invited for other varieties of casein and also for pure amino-acids.

Prices and all further particulars from:
BIOCHEMICAL DEPARTMENT, GLAXO LABORATORIES LTD., GREENFORD, MIDDLESEX

HEFFER’S BOOKSHOP

The items below are from our large stock of Scientific Books and Journals. Catalogues will be sent on application, and correspondence is invited.

ANALYST (The). The Organ of the Society of Public Analysts and other Analytical Chemists, from Jan. 1878 to Dec. 1936 (Vols. 3–61), 19 vols. cloth, 3 vols. half roan, rest in parts as issued, roy. 8vo. £55

JOURNAL OF HYGIENE (The). Edited by G. H. F. Nuttall, from the commencement in January 1901 to December 1935 (Vols. 1–35), with Plague Supplements Nos. 1–5 and General Index to Vols. 1–10, roy. 8vo., in parts as issued. £45

NUTRITIONAL ABSTRACTS AND REVIEWS, issued under the direction of the Imperial Agricultural Bureaux Council, the Medical Research Council, and the Reid Library; from the commencement in October 1931 to April 1938 (Vols. 1 to 7), 7 vols. roy. 8vo., in parts as issued. £9. 9s.

From Band 3 onwards “Die Tierernährung” forms Abteilung B of “Biedermanns Zentralblatt für Agriculturchemie.”

We have great experience in supplying English and Foreign Scientific and other Periodicals to all parts of the world, and shall be pleased to give quotations.
