

Review Articles

- Chemokines: understanding their role in T-lymphocyte biology** 457–470
 by S.G. Ward and J. Westwick
- Phosphoinositide 3-kinase: the key switch mechanism in insulin signalling** 471–490
 by P.R. Shepherd, D.J. Withers and K. Siddle

Research Communication

- Characterization of human and rat brain myristoyl-CoA:protein N-myristoyltransferase: evidence for an alternative splice variant of the enzyme 491–496
 R.A.J. McIlhinney, K. Young, M. Egerton, R. Camble, A. White and M. Soloviev

Research Papers

Proteins

- Prenylation of Rab8 GTPase by type I and type II geranylgeranyl transferases 497–504
 A.L. Wilson, R.A. Erdman, F. Castellano and W.A. Maltese
- Evidence for roles of radicals in protein oxidation in advanced human atherosclerotic plaque 519–525
 S. Fu, M.J. Davies, R. Stocker and R.T. Dean
- Evaluation of the stoichiometry and energetics of carbohydrate binding to *Ricinus communis* agglutinin: a calorimetric study 539–542
 S. Sharma, S. Bharadwaj, A. Suroliya and S.K. Podder
- Orientation of sugars bound to the principal C-type carbohydrate-recognition domain of the macrophage mannose receptor 601–608
 P.G. Hitchen, N.P. Mullin and M.E. Taylor

Enzymes

- CD23 (FcεRII) release from cell membranes is mediated by a membrane-bound metalloprotease 573–579
 A.E. Marolewski, D.R. Buckle, G. Christie, D.L. Earnshaw, P.L. Flamberg, L.A. Marshall, D.G. Smith and R.J. Mayer
- Mutational analysis of the two ATP-binding sites in ClpB, a heat shock protein with protein-activated ATPase activity in *Escherichia coli* 671–676
 K.I. Kim, K.M. Woo, I.S. Seong, Z.-W. Lee, S.H. Baek and C.H. Chung
- Tyrosinase kinetics: failure of the auto-activation mechanism of monohydric phenol oxidation by rapid formation of a quinomethane intermediate 685–691
 C.J. Cooksey, P.J. Garratt, E.J. Land, C.A. Ramsden and P.A. Riley
- Amino acid sequence of glutathione S-transferase rGSTM5* from rat testis 735–739
 M.F. Tam, C.-H. Hsieh, S.-P. Tsai and T.-C.S. Tam
- Purification and characterization of catechol 1,2-dioxygenase from *Rhodococcus rhodochrous* NCIMB 13259 and cloning and sequencing of its *catA* gene 741–747
 P.D. Strachan, A.A. Freer and C.A. Fewson
- Herbicide-resistant forms of *Arabidopsis thaliana* acetohydroxyacid synthase: characterization of the catalytic properties and sensitivity to inhibitors of four defined mutants 765–777
 A.K. Chang and R.G. Duggleby
- Sheep mast-cell proteinases-1 and -3: cDNA cloning, primary structure and molecular modelling of the enzymes and further studies on substrate specificity 801–809
 S.M. McAleese, A.D. Pemberton, M.E. McGrath, J.F. Huntley and H.R.P. Miller
- The three-dimensional structure of a class-Pi glutathione S-transferase complexed with glutathione: the active-site hydration provides insights into the reaction mechanism 811–816
 A. Párraga, I. García-Sáez, S.B. Walsh, T.J. Mantle and M. Coll
- Glutathione S-transferases of the yeast *Yarrowia lipolytica* have unusually large molecular mass 839–845
 V. Foley and D. Sheehan

Carbohydrates and lipids

- Identification of endoplasmic reticulum proteins involved in glycan assembly: synthesis and characterization of P^3 -(4-azidoanilido)uridine 5'-triphosphate, a membrane-topological photoaffinity probe for uridine diphosphate-sugar binding proteins D.M. Rancour and A.K. Menon **661–669**
- Glycosylation pattern of human inter- α -inhibitor heavy chains C. Flahaut, C. Capon, M. Balduyck, G. Ricart, P. Sautiere and J. Mizon **749–756**
- Ceramide transport from endoplasmic reticulum to Golgi apparatus is not vesicle-mediated J.W. Kok, T. Babia, K. Klappe, G. Egea and D. Hoekstra **779–786**

Gene structure and expression

- Different Sp1 family members differentially affect transcription from the human elongation factor 1 A-1 gene promoter S.J. Nielsen, M. Præstegaard, H.F. Jørgensen and B.F.C. Clark **511–517**
- Trypanosoma cruzi* has not lost its S-adenosylmethionine decarboxylase: characterization of the gene and the encoded enzyme K. Persson, L. Åslund, B. Grahn, J. Hanke and O. Heby **527–537**
- Identification of upstream stimulatory factor as transcriptional activator of the liver promoter of the glucokinase gene P.B. Iynedjian **705–712**
- Molecular cloning and characterization of Ca^{2+} -dependent inducible nitric oxide synthase from guinea-pig lung M. Shirato, T. Sakamoto, Y. Uchida, A. Nomura, Y. Ishii, H. Iijima, Y. Goto and S. Hasegawa **795–799**

Regulation of metabolism

- Unique mechanism of GLUT3 glucose transporter regulation by prolonged energy demand: increased protein half-life Z.A. Khayat, A.L. McCall and A. Klip **713–718**

Membranes and bioenergetics

- Discrimination of two amino acid transport activities in 4F2 heavy chain-expressing *Xenopus laevis* oocytes A. Bröer, B. Hamprecht and S. Bröer **549–554**
- 4-Aminobutyrate (GABA) transporters from the amine-polyamine-choline superfamily: substrate specificity and ligand recognition profile of the 4-aminobutyrate permease from *Bacillus subtilis* C.E. Brechtel and S.C. King **565–571**
- Linear and cyclic peptides as substrates and modulators of P-glycoprotein: peptide binding and effects on drug transport and accumulation F.J. Sharom, P. Lu, R. Liu and X. Yu **621–630**
- Bacillus thuringiensis* Cry1Ac toxin interaction with *Manduca sexta* aminopeptidase N in a model membrane environment M.A. Cooper, J. Carroll, E.R. Travis, D.H. Williams and D.J. Ellar **677–683**
- Membrane composition can influence the rate of Al^{3+} -mediated lipid oxidation: effect of galactolipids S.V. Verstraeten, C.L. Keen, M.S. Golub and P.I. Oteiza **833–838**

Receptors and signal transduction

- Stimulation of neuropeptide Y gene expression by brain-derived neurotrophic factor requires both the phospholipase $C\gamma$ and Shc binding sites on its receptor, TrkB A.G. Williams, A.C. Hargreaves, F.J. Gunn-Moore and J.M. Tavaré **505–509**
- Native rat kidney mineralocorticoid receptor is a phosphoprotein whose transformation to a DNA-binding form is induced by phosphatases M.D. Galigniana **555–563**
- Stimulation of multiple mitogen-activated protein kinase sub-families by oxidative stress and phosphorylation of the small heat shock protein, HSP25/27, in neonatal ventricular myocytes A. Clerk, A. Michael and P.H. Sugden **581–589**
- Microvesicle release is associated with extensive protein tyrosine dephosphorylation in platelets stimulated by A23187 or a mixture of thrombin and collagen J.-M. Pasquet, J. Dachary-Prigent and A.T. Nurden **591–599**
- Effects of phosphorylation on function of the Rad GTPase J.S. Moyers, J. Zhu and C.R. Kahn **609–614**
- T-cell-receptor signalling in inositol 1,4,5-trisphosphate receptor (IP_3R) type-1-deficient mice: is IP_3R type 1 essential for T-cell-receptor signalling? J. Hirota, M. Baba, M. Matsumoto, T. Furuichi, K. Takatsu and K. Mikoshiba **615–619**

The broad specificity of dominant inhibitory protein kinase C mutants infers a common step in phosphorylation	P. Garcia-Paramio, Y. Cabrerizo, F. Bornancin and P.J. Parker	631–636
Loop III region of platelet-derived growth factor (PDGF) B-chain mediates binding to PDGF receptors and heparin	D. Schilling, J.D. Reid IV, A. Hujer, D. Morgan, E. Demoll, P. Bummer, R.A. Fenstermaker and D.M. Kaetzel	637–644
Identification and characterization of the human homologue of the short PDE4A cAMP-specific phosphodiesterase RD1 (PDE4A1) by analysis of the human HSPDE4A gene locus located at chromosome 19p13.2	M. Sullivan, G. Rena, F. Begg, L. Gordon, A.S. Olsen and M.D. Houslay	693–703
ErbB3 (HER3) interaction with the p85 regulatory subunit of phosphoinositide 3-kinase	N.J. Hellyer, K. Cheng and J.G. Koland	757–763
Age-related changes in human oestrogen receptor α function and levels in osteoblasts	M.A. Ankrom, J.A. Patterson, P.Y. d'Avis, U.K. Vetter, M.R. Blackman, P.D. Sponseller, M. Tayback, P.G. Robey, J.R. Shapiro and N.S. Fedarko	787–794
Expression and function of insulin/insulin-like growth factor I hybrid receptors during differentiation of 3T3-L1 preadipocytes	D. Modan-Moses, M. Janicot, J.C. McLenithan, M.D. Lane and S.J. Casella	825–831
Cell biology and development		
Tyrostatin A, a specific and novel inhibitor of microtubule assembly	T. Usui, M. Kondoh, C.-B. Cui, T. Mayumi and H. Osada	543–548
Differential regulation of the retinoblastoma family of proteins during cell proliferation and differentiation	J. Garriga, A. Limón, X. Mayol, S.G. Rane, J.H. Albrecht, E.P. Reddy, V. Andrés and X. Graña	645–654
Expression and phosphorylation of fibroblast-growth-factor-inducible kinase (Fnk) during cell-cycle progression	D. Chase, Y. Feng, B. Hanshaw, J.A. Winkles, D.L. Longo and D.K. Ferris	655–660
Protein kinase C isoforms play differential roles in the regulation of adipocyte differentiation	I. Fleming, S.J. MacKenzie, R.G. Vernon, N.G. Anderson, M.D. Houslay and E. Kilgour	719–727
Human thrombopoietin structure–function relationships: identification of functionally important residues	A. Jagerschmidt, V. Fleury, M. Anger-Leroy, C. Thomas, M. Agnel and D.P. O'Brien	729–734
Synthesis of calbindin-D28K during mineralization in human bone marrow stromal cells	C. Faucheux, R. Bareille and J. Amedee	817–823
Corrections		
Substrate specificity of sheep liver sorbitol dehydrogenase by R.I. Linstad, P. Köll and J.S. McKinley-McKee (volume 330, pages 479–487, 1998)		847
Identification of a <i>Caenorhabditis elegans</i> Δ^6 -fatty-acid-desaturase by heterologous expression in <i>Saccharomyces cerevisiae</i> by J.A. Napier, S.J. Hey, D.J. Lacey and P.R. Shewry (volume 330, pages 611–614, 1998)		847
Actin filaments participate in the relocalization of phosphatidylinositol 3-kinase to glucose-transporter-containing compartments and in the stimulation of glucose uptake in 3T3-L1 adipocytes by Q. Wang, P.J. Bilan, T. Tsakiridis, A. Hinek and A. Klip (volume 331, pages 917–928, 1998)		848
The role of calmodulin-binding sites in the regulation of the <i>Drosophila</i> TRPL cation channel expressed in <i>Xenopus laevis</i> oocytes by Ca^{2+} , inositol 1,4,5-trisphosphate and GTP-binding proteins by L. Lan, H. Brereton and G.J. Barritt (volume 330, pages 1149–1158, 1998)		848
