

Review Article

- Thymidine phosphorylase, 2-deoxy-D-ribose and angiogenesis**
by N.S. Brown and R. Bicknell 1–8

Research Communication

- Identification of the lectin-like receptor for oxidized low-density lipoprotein in human macrophages and its potential role as a scavenger receptor H. Yoshida, N. Kondratenko, S. Green, D. Steinberg and O. Quehenberger 9–13

Research Papers**Proteins**

- Precise determination of RNA–protein contact sites in the 50 S ribosomal subunit of *Escherichia coli* B. Thiede, H. Urlaub, H. Neubauer, G. Grelle and B. Wittmann-Liebold 39–42
- Cloning and functional expression of B chains of β -bungarotoxins from *Bungarus multicinctus* (Taiwan banded krait) P.-F. Wu, S.-N. Wu, C.-C. Chang and L.-S. Chang 87–92
- Identification and characterization of the antimicrobial peptide corresponding to C-terminal β -sheet domain of tenecin 1, an antibacterial protein of larvae of *Tenebrio molitor* K.H. Lee, S.Y. Hong, J.E. Oh, M.y. Kwon, J.H. Yoon, J.h. Lee, B.L. Lee and H.M. Moon 99–105
- Expression, characterization and engineered specificity of rat epididymal retinoic acid-binding protein M. Sundaram, A. Sivaprasadarao, D.M.F. van Aalten and J.B.C. Findlay 155–160
- Identification and localization of caldesmon in cardiac muscle G.C. Scott-Woo, M.P. Walsh, M. Ikebe and G.J. Kargacin 161–170
- Thermal inactivation and chaperonin-mediated renaturation of mitochondrial aspartate aminotransferase J.M. Lawton and S. Doonan 219–224
- Transferrin-binding protein B isolated from *Neisseria meningitidis* discriminates between apo and diferric human transferrin I.C. Boulton, A.R. Gorringer, N. Allison, A. Robinson, B. Gorinsky, C.L. Joannou and R.W. Evans 269–273
- Temperature-induced conformational changes in prosomatostatin-II: implications for processing J. Mitra, X.-j. Tang, S.C. Almo and D. Shields 275–282

Enzymes

- Trichomonas vaginalis* thymidine kinase: purification, characterization and search for inhibitors S. Strosselli, S. Spadari, R.T. Walker, I. Basnak and F. Focher 15–22
- Cloning of a rat brain succinic semialdehyde reductase involved in the synthesis of the neuromodulator γ -hydroxybutyrate C. Andriamampandry, J.-C. Siffert, M. Schmitt, J.-M. Garnier, A. Staub, C. Muller, S. Gobaille, J. Mark and M. Maitre 43–50
- Haem propionates control oxidative and reductive activities of horseradish peroxidase by maintaining the correct orientation of the haem S. Adak and R.K. Banerjee 51–56
- Thioltransferase activity of bovine lens glutathione S-transferase M. Dal Monte, I. Cecconi, F. Buono, P.G. Vilardo, A. Del Corso and U. Mura 57–62
- Site-directed mutations in fungal laccase: effect on redox potential, activity and pH profile F. Xu, R.M. Berka, J.A. Wahleithner, B.A. Nelson, J.R. Shuster, S.H. Brown, A.E. Palmer and E.I. Solomon 63–70
- Microsomal epoxide hydrolase of rat liver is a subunit of the anti-oestrogen-binding site F. Mésange, M. Sebbar, B. Kedjouar, J. Capdevielle, J.-C. Guillemot, P. Ferrara, F. Bayard, F. Delarue, J.-C. Faye and M. Poirot 107–112
- Identification of the regulatory autophosphorylation site of autophosphorylation-dependent protein kinase (auto-kinase). Evidence that auto-kinase belongs to a member of the p21-activated kinase family J.-S. Yu, W.-J. Chen, M.-H. Ni, W.-H. Chan and S.-D. Yang 121–131
- Expression of novel isoforms of carnitine palmitoyltransferase I (CPT-1) generated by alternative splicing of the CPT-1 β gene G.-S. Yu, Y.-C. Lu and T. Gulick 225–231

Bovine acetylcholinesterase: cloning, expression and characterization	I. Mendelson, C. Kronman, N. Ariel, A. Shafferman and B. Velan	251–259
Carbohydrates and lipids		
Permanent exposure of mucin-secreting HT-29 cells to benzyl- <i>N</i> -acetyl- α -D-galactosaminide induces abnormal O-glycosylation of mucins and inhibits constitutive and stimulated MUC5AC secretion	S. Hennebicq-Reig, T. Lesuffleur, C. Capon, C. de Bolos, I. Kim, O. Moreau, C. Richet, B. Hémon, M.-A. Recchi, E. Maës, J.-P. Aubert, F.X. Real, A. Zweibaum, P. Delannoy, P. Degand and G. Huet	283–295
Gene structure and expression		
Multiple transcripts coding for the Menkes gene: evidence for alternative splicing of Menkes mRNA	M.C.M. Reddy and E.D. Harris	71–77
Metalloproteinase-like, disintegrin-like, cysteine-rich proteins MDC2 and MDC3: novel human cellular disintegrins highly expressed in the brain	K. Sagane, Y. Ohya, Y. Hasegawa and I. Tanaka	93–98
Transcriptional activation of the haem oxygenase-1 gene by cGMP via a cAMP response element/activator protein-1 element in primary cultures of rat hepatocytes	S. Immenschuh, V. Hinke, A. Ohlmann, S. Gifhorn-Katz, N. Katz, K. Jungermann and T. Kietzmann	141–146
The gene for the human tMDC I sperm surface protein is non-functional: implications for its proposed role in mammalian sperm–egg recognition	J. Frayne and L. Hall	171–176
Molecular cloning and cell-cycle-dependent expression of a novel NIMA (never-in-mitosis in <i>Aspergillus nidulans</i>)-related protein kinase (<i>TpNrk</i>) in <i>Tetrahymena</i> cells	S. Wang, S. Nakashima, H. Sakai, O. Numata, K. Fujii and Y. Nozawa	197–203
Expression of the genes encoding CCAAT-enhancer binding protein isoforms in the mouse mammary gland during lactation and involution	G. Sabatakos, G.E. Davies, M. Grosse, A. Cryer and D.P. Ramji	205–210
Regulation of metabolism		
The role of ATP citrate-lyase in the metabolic regulation of plasma lipids. Hypolipidaemic effects of SB-204990, a lactone prodrug of the potent ATP citrate-lyase inhibitor SB-201076	N.J. Pearce, J.W. Yates, T.A. Berkhout, B. Jackson, D. Tew, H. Boyd, P. Camilleri, P. Sweeney, A.D. Gribble, A. Shaw and P.H.E. Groot	113–119
Physiological concentration of amino acids regulates insulin-like-growth-factor-binding protein 1 expression	C. Jousse, A. Bruhat, M. Ferrara and P. Fafournoux	147–153
Malonyl-CoA and the regulation of fatty acid oxidation in soleus muscle	N. Alam and E.D. Saggerson	233–241
Receptors and signal transduction		
Expression of ryanodine receptors in human embryonic kidney (HEK293) cells	H.W. Querfurth, N.J. Haughey, S.C. Greenway, P.W. Yacono, D.E. Golan and J.D. Geiger	79–86
Vitronectin binds to the gonococcal adhesin OpaA through a glycosaminoglycan molecular bridge	T.D. Duensing and J.P.M. van Putten	133–139
AMP-activated protein kinase: greater AMP dependence, and preferential nuclear localization, of complexes containing the α 2 isoform	I. Salt, J.W. Celler, S.A. Hawley, A. Prescott, A. Woods, D. Carling and D.G. Hardie	177–187
Signal transduction by epidermal growth factor and heregulin via the kinase-deficient ErbB3 protein	H.-H. Kim, U. Vijapurkar, N.J. Hellyer, D. Bravo and J.G. Koland	189–195
PTB domain of insulin receptor substrate-1 binds inositol compounds	H. Takeuchi, M. Matsuda, T.-a. Yamamoto, T. Kanematsu, U. Kikkawa, H. Yagisawa, Y. Watanabe and M. Hirata	211–218
α -Tocopherol specifically inactivates cellular protein kinase C α by changing its phosphorylation state	R. Ricciarelli, A. Tassinato, S. Clément, N.K. Özer, D. Boscoboinik and A. Azzi	243–249
Amino acid availability regulates p70 S6 kinase and multiple translation factors	X. Wang, L.E. Campbell, C.M. Miller and C.G. Proud	261–267
Cell biology and development		
Role for protein phosphatases in the cell-cycle-regulated phosphorylation of stathmin	S.J. Mistry, H.-C. Li and G.F. Atweh	23–29
Molecular characterization of a sarco(endo)plasmic reticulum Ca^{2+} -ATPase gene from <i>Paramecium tetraurelia</i> and localization of its gene product to sub-plasmalemmal calcium stores	K. Hauser, N. Pavlovic, R. Kissmehl and H. Plattner	31–38
