1 September 1998

Review

- Interleukin-6-type cytokine signalling through the gp 130/Jak/STAT pathway**
by P. C. Heinrich, I. Behrmann, G. Müller-Newen, F. Schaper and L. Graeve

297–314

Research Communications

- 5-Octadecenoic acid: evidence for a novel type of fatty acid modification in schistosomes
The survival of ingested lactoferrin in the gastrointestinal tract of adult mice

- J. F. H. M. Brouwers, C. Versluis, L. M. G. van Golde and A. G. M. Tielens
H. Kuwata, T.-T. Yip, K. Yamauchi, S. Teraguchi, H. Hayasawa, M. Tomita and T. W. Hutchens

315–319
321–323**Research Papers****Proteins**

- Effects of polyamine levels on the degradation of short-lived and long-lived proteins in cultured L-132 human lung cells
Prion protein expression and superoxide dismutase activity
Detailed characterization of a cyclophilin from the human malaria parasite *Plasmodium falciparum*
Secondary structure of oleosins in oil bodies isolated from seeds of safflower (*Carthamus tinctorius* L.) and sunflower (*Helianthus annuus* L.)

- D. Corella, M. Guillén, J. M. Hernández and J. Hernández-Yago
D. R. Brown and A. Besinger
M. Berrieman and A. H. Fairlamb
D. J. Lacey, N. Wellner, F. Beaudoin, J. A. Napier and P. R. Shewry

367–375
423–429
437–445
469–477**Enzymes**

- Determinants of catalytic activity with the use of purified I, D and H subunits of the magnesium protoporphyrin IX chelatase from *Synechocystis* PCC6803
Isolation and characterization of a processive DNA helicase from the fission yeast *Schizosaccharomyces pombe* that translocates in a 5'-to-3' direction
Enzymological characterization of the nuclease domain from the bacterial toxin colicin E9 from *Escherichia coli*
A glutamate residue contributes to the exopeptidase specificity in aminopeptidase A

- P. E. Jensen, L. C. D. Gibson and C. N. Hunter
C. Lee and Y.-S. Seo
A. J. Pommer, R. Wallis, G. R. Moore, R. James and C. Kleanthous
G. Vazeux, X. Iturrio, P. Corvol and C. Llorens-Cortes

335–344
377–386
387–392
407–413**Carbohydrates and lipids**

- Isolation and physical characterization of the MUC7 (MG2) mucin from saliva: evidence for self-association
Regulation of membrane release in apoptosis

- R. Mehrotra, D. J. Thornton and J. K. Sheehan
J. Zhang, T. A. Driscoll, Y. A. Hannun and L. M. Obeid

415–422
479–485**Gene structure and expression**

- Transcriptional control and essential roles of the *Escherichia coli* *ccm* gene products in formate-dependent nitrite reduction and cytochrome c synthesis
Sequence of the cDNA of a human dihydrodiol dehydrogenase isoform (AKR1C2) and tissue distribution of its mRNA

- S. Tanapongpipat, E. Reid, J. A. Cole and H. Crooke
H. Shiraishi, S. Ishikura, K. Matsuura, Y. Deyashiki, M. Ninomiya, S. Sakai and A. Hara

355–365
399–405

Inactivation of eukaryotic initiation factor 2B <i>in vitro</i> by heat shock	G. C. Schepers, A. A. M. Thomas and R. van Wijk	463–467
Membranes and bioenergetics		
Determination of the non-ionic detergent insolubility and phosphoprotein associations of glycosylphosphatidylinositol-anchored proteins expressed on T cells	K. R. Solomon, M. A. Mallory and R. W. Finberg	325–333
Receptors and signal transduction		
Selective loss of substrate recognition induced by the tumour-associated D294G point mutation in protein kinase C α	C. Prévostel, V. Alvaro, A. Vallentin, A. Martin, S. Jaken and D. Joubert	393–397
Luminal Ca ²⁺ regulates passive Ca ²⁺ efflux from the intracellular stores of hepatocytes	M. D. Beecroft and C. W. Taylor	431–435
A novel role for calmodulin: Ca ²⁺ -independent inhibition of type-1 inositol trisphosphate receptors	T. J. A. Cardy and C. W. Taylor	447–455
Cell biology and development		
Proteolytic processing of membrane-type-1 matrix metalloproteinase is associated with gelatinase A activation at the cell surface	K. Lehti, J. Lohi, H. Valtanen and J. Keski-Oja	345–353
Cell-cycle-dependent changes in ceramide levels preceding retinoblastoma protein dephosphorylation in G ₂ /M	J. Y. Lee, L. G. Leonhardt and L. M. Obeid	457–461
BJ Letters		
Human aldehyde dehydrogenase E3: the N-terminal primary structure	M.-K. Chern and R. Pietruszko	487–488
