

Review

- Receptor-activated Ca²⁺ inflow in animal cells: a variety of pathways tailored to meet different intracellular Ca²⁺ signalling requirements**
by G.J. Barritt 153–169

Research Papers**Proteins**

- Changes in the protein pattern of H1 histones associated with apoptotic DNA fragmentation M. Kratzmeier, W. Albig, T. Meergans and D. Doenecke 319–327

Enzymes

- [Difluoro(phosphono)methyl]phenylalanine-containing peptide inhibitors of protein tyrosine phosphatases S. Desmarais, R.W. Friesen, R. Zamboni and C. Ramachandran 219–223
- Biochemical characterization of a variant human medium-chain acyl-CoA dehydrogenase with a disease-associated mutation localized in the active site B. Küchler, A.-G. Abdel-Ghany, P. Bross, A. Nandy, I. Rasched and S. Ghisla 225–230
- Magnesium chelatase from *Rhodobacter sphaeroides*: initial characterization of the enzyme using purified subunits and evidence for a Bchl–BchD complex L.C.D. Gibson, P.E. Jensen and C.N. Hunter 243–251
- Crystal structure of the catalytic core domain of the family 6 cellobiohydrolase II, Cel6A, from *Humicola insolens*, at 1.92 Å resolution A. Varrot, S. Hastrup, M. Schülein and G.J. Davies 297–304
- Structural characterization of human aryl sulphotransferases L.A. Brix, R.G. Duggleby, A. Gaedigk and M.E. McManus 337–343

Gene structure and expression

- Transcriptional activation of vesicular monoamine transporter 2 in the pre-B cell line Ea3.123 F. Watson, D.G. Deavall, J.A. Macro, R. Kiernan and R. Dimaline 193–199
- Differential priming of RNA template during cDNA synthesis markedly affects both accuracy and reproducibility of quantitative competitive reverse-transcriptase PCR J. Zhang and C.D. Byrne 231–241
- Co-operation between the PAI and RED subdomains of Pax-8 in the interaction with the thyroglobulin promoter L. Pellizzari, G. Tell and G. Damante 253–262
- Isolation of pig mitochondrial 3-hydroxy-3-methylglutaryl-CoA synthase gene promoter: characterization of a peroxisome proliferator-responsive element J.A. Ortiz, J. Mallolas, C. Nicot, J. Bofarull, J.C. Rodríguez, F.G. Hegardt, D. Haro and P.F. Marrero 329–335

Regulation of metabolism

- In vitro* analysis of the zinc-finger motif in human replication protein A J. Dong, J.-S. Park and S.-H. Lee 311–317

Receptors and signal transduction

- Platelet-derived-growth-factor stimulation of the p42/p44 mitogen-activated protein kinase pathway in airway smooth muscle: role of pertussis-toxin-sensitive G-proteins, c-Src tyrosine kinases and phosphoinositide 3-kinase **171–177**
A.-M. Conway, S. Rakhit, S. Pyne and N.J. Pyne
- Association of protein-tyrosine phosphatase PTP-BAS with the transcription-factor-inhibitory protein I κ B α through interaction between the PDZ1 domain and ankyrin repeats **179–184**
K. Maekawa, N. Imagawa, A. Naito, S. Harada, O. Yoshie and S. Takagi
- Monosodium urate-crystal-stimulated phospholipase D in human neutrophils **185–192**
J. Marcil, D. Harbour, M.G. Houle, P.H. Naccache and S. Bourgoin
- Enhancement of chemotactic peptide-induced activation of phosphoinositide 3-kinase by granulocyte-macrophage colony-stimulating factor and its relation to the cytokine-mediated priming of neutrophil superoxide-anion production **201–209**
T. Kodama, K. Hazeki, O. Hazeki, T. Okada and M. Ui
- Simultaneous visualization of the translocation of protein kinase C α -green fluorescent protein hybrids and intracellular calcium concentrations **211–218**
K. Almholt, P.O.G. Arkhammar, O. Thastrup and S. Tullin
- Concerted action of cytosolic Ca²⁺ and protein kinase C in receptor-mediated phospholipase D activation in Chinese hamster ovary cells expressing the cholecystokinin-A receptor **263–268**
R.R. Bosch, R.L.L. Smeets, F. Sleutels, A.M.P. Patel, S.E. van Ernst-de Vries, J.J.H.H.M. de Pont and P.H.G.M. Willems
- Mildly oxidized low-density lipoproteins decrease early production of interleukin 2 and nuclear factor κ B binding to DNA in activated T-lymphocytes **269–274**
S. Caspar-Bauguil, J. Tkaczuk, M.-J. Haure, M. Durand, J. Alcouffe, M. Thomsen, R. Salvayre and H. Benoist
- Signalling pathway leading to an activation of mitogen-activated protein kinase by stimulating M₃ muscarinic receptor **275–280**
J.-Y. Kim, M.-S. Yang, C.-D. Oh, K.-T. Kim, M.J. Ha, S.-S. Kang and J.-S. Chun
- Interaction sites of the C-terminal region of the cGMP phosphodiesterase inhibitory subunit with the GDP-bound transducin α -subunit **281–288**
Y. Liu, V.Y. Arshavsky and A.E. Ruoho
- Expression and subcellular localization of the ryanodine receptor in rat pancreatic acinar cells **305–309**
M.F. Leite, J.A. Dranoff, L. Gao and M.H. Nathanson
- Cell biology and development**
- Subcellular localization of the G_{s13} protein and G alpha interacting protein, two proteins involved in the control of macroautophagy in human colon cancer HT-29 cells **289–295**
A. Petiot, E. Ogier-Denis, C. Bauvy, F. Cluzeaud, A. Vandewalle and P. Codogno
