

**Review**

- The proton-linked monocarboxylate transporter (MCT) family: structure, function and regulation** 281–299  
*by A.P. Halestrap and N.T. Price*

**Research Communications**

- Phage display identifies thioredoxin and superoxide dismutase as novel protein kinase C-interacting proteins: thioredoxin inhibits protein kinase C-mediated phosphorylation of histone J.A. Watson, M.G. Rumsby and R.C. Wolowacz 301–305
- Cathepsin P, a novel protease in mouse placenta K. Sol-Church, J. Frenck, D. Troeber and R.W. Mason 307–309

**Research Papers**

- Endogenously produced lipoprotein lipase enhances the binding and cell association of native, mildly oxidized and moderately oxidized low-density lipoprotein in mouse peritoneal macrophages X. Wang, J. Greilberger, S. Levak-Frank, R. Zimmermann, R. Zechner and G. Jürgens 347–353

**Proteins**

- Multiple interactions between pituitary hormones and the mannose receptor D.Z. Simpson, P.G. Hitchen, E.L. Elmhirst and M.E. Taylor 403–411
- Common structural features determine the effectiveness of carvedilol, daunomycin and rolitetracycline as inhibitors of Alzheimer  $\beta$ -amyloid fibril formation D.R. Howlett, A.R. George, D.E. Owen, R.V. Ward and R.E. Markwell 419–423
- Molecular modelling indicates that the pathological conformations of prion proteins might be  $\beta$ -helical D.T. Downing and N.D. Lazo 453–460

**Enzymes**

- Plant mitochondrial 2-oxoglutarate dehydrogenase complex: purification and characterization in potato A.H. Millar, S.A. Hill and C.J. Leaver 327–334
- Enzymic characterization of a novel member of the regulatory B-like carboxypeptidase with transcriptional repression function: stimulation of enzymic activity by its target DNA A.M. Muise and H.-S. Ro 341–345
- Hydration change during the aging of phosphorylated human butyrylcholinesterase: importance of residues aspartate-70 and glutamate-197 in the water network as probed by hydrostatic and osmotic pressures P. Masson, C. Cléry, P. Guerra, A. Redslob, C. Albaret and P.-L. Fortier 361–369
- Membrane-anchored metalloprotease MDC9 has an  $\alpha$ -secretase activity responsible for processing the amyloid precursor protein H. Koike, S. Tomioka, H. Sorimachi, T.C. Saido, K. Maruyama, A. Okuyama, A. Fuisawa-Sehara, S. Ohno, K. Suzuki and S. Ishiura 371–375
- A phosphotyrosine-containing quenched fluorogenic peptide as a novel substrate for protein tyrosine phosphatases M. Nishikata, K. Suzuki, Y. Yoshimura, Y. Deyama and A. Matsumoto 385–391
- Identification of Arg-12 in the active site of *Escherichia coli* K1 CMP-sialic acid synthetase D.M. Stoughton, G. Zapata, R. Picone and W.F. Vann 397–402
- Modification of luciferase to be a substrate for plant aspartic proteinase W.J. Amidon, J.E. Pfeil and S. Gal 425–433

Changes in intracellular localization of calpastatin during calpain activation	R. De Tullio, M. Passalacqua, M. Averna, F. Salamino, E. Melloni and S. Pontremoli	<b>467–472</b>
Major differences exist in the function and tissue-specific expression of human aflatoxin B <sub>1</sub> aldehyde reductase and the principal human aldo-keto reductase AKR1 family members	T. O'Connor, L.S. Ireland, D.J. Harrison and J.D. Hayes	<b>487–504</b>
<b>Gene structure and expression</b>		
Functional characterization of transcriptional regulatory elements in the upstream region of the yeast <i>GLK1</i> gene	P. Herrero, L. Flores, T. de la Cera and F. Moreno	<b>319–325</b>
Molecular characterization and expression of mandibular organ-inhibiting hormone, a recently discovered neuropeptide involved in the regulation of growth and reproduction in the crab <i>Cancer pagurus</i>	C. Tang, W. Lu, G. Wainwright, S.G. Webster, H.H. Rees and P.C. Turner	<b>355–360</b>
Structural and functional characterization of the mouse p8 gene: promotion of transcription by the CAAT-enhancer binding protein $\alpha$ (C/EBP $\alpha$ ) and C/EBP $\beta$ <i>trans</i> -acting factors involves a C/EBP <i>cis</i> -acting element and other regions of the promoter	S. Vasseur, G.V. Mallo, A. Garcia-Montero, E.M. Ortiz, F. Fiedler, E. Cánepa, S. Moreno and J.L. Iovanna	<b>377–383</b>
Molecular cloning and cell-cycle-dependent expression of the acetyl-CoA synthetase gene in <i>Tetrahymena</i> cells	S. Wang, S. Nakashima, O. Numata, K. Fujii and Y. Nozawa	<b>479–485</b>
<b>Regulation of metabolism</b>		
Up-regulation of liver glucose-6-phosphatase in rats fed with a P <sub>i</sub> -deficient diet	W. Xie, Y. Li, M.-C. Méchin and G. van de Werve	<b>393–396</b>
Metabolic adaptations to dietary fat malabsorption in chylomicron-deficient mice	H.R. Jung, S.M. Turner, R.A. Neese, S.G. Young and M.K. Hellerstein	<b>473–478</b>
<b>Membranes and bioenergetics</b>		
Fluctuations in mitochondrial membrane potential caused by repetitive gating of the permeability transition pore	J. Hüser and L.A. Blatter	<b>311–317</b>
Inhibition of glutamate uptake by a polypeptide toxin (phoneutriatoxin 3-4) from the spider <i>Phoneutria nigriventer</i>	H.J. Reis, M.A.M. Prado, E. Kalapothakis, M.N. Cordeiro, C.R. Diniz, L.A. De Marco, M.V. Gomez and M.A. Romano-Silva	<b>413–418</b>
<b>Receptors and signal transduction</b>		
Endothelial nitric oxide synthase interactions with G-protein-coupled receptors	M.B. Marrero, V.J. Venema, H. Ju, H. He, H. Liang, R.B. Caldwell and R.C. Venema	<b>335–340</b>
Activation of constitutive 5-hydroxytryptamine <sub>1B</sub> receptor by a series of mutations in the BBXXB motif: positioning of the third intracellular loop distal junction and its G <sub>o</sub> $\alpha$ protein interactions	P.J. Pauwels, A. Gouble and T. Wurch	<b>435–442</b>
Mechanism of A-kinase-anchoring protein 79 (AKAP79) and protein kinase C interaction	M.C. Faux, E.N. Rollins, A.S. Edwards, L.K. Langeberg, A.C. Newton and J.D. Scott	<b>443–452</b>
<b>Cell biology and development</b>		
Fibroblast growth factor-1 interacts with the glucose-regulated protein GRP75/mortalin	E. Mizukoshi, M. Suzuki, A. Loupatov, T. Uruno, H. Hayashi, T. Misono, S.C. Kaul, R. Wadhwa and T. Imamura	<b>461–466</b>
