

Review

- Retinoid-binding proteins: mediators of retinoid action** 481–495
by N. Noy

Research Papers**Proteins**

- Defensin-like peptide-2 from platypus venom: member of a class of peptides with a distinct structural fold A.M. Torres, G.M. de Plater, M. Doverskog, L.C. Birinyi-Strachan, G.M. Nicholson, C.H. Gallagher and P.W. Kuchel 649–656

Enzymes

- A novel lysine 2,3-aminomutase encoded by the *yodO* gene of *Bacillus subtilis*: characterization and the observation of organic radical intermediates D. Chen, F.J. Ruzicka and P.A. Frey 539–549
- Enzymic methylation of arginyl residues in -Gly-Arg-Gly- peptides Y.-L. Hyun, D.B. Lew, S.H. Park, C.-W. Kim, W.K. Paik and S. Kim 573–578
- Contrasting effects of *N*⁵-substituted tetrahydrobiopterin derivatives on phenylalanine hydroxylase, dihydropteridine reductase and nitric oxide synthase E.R. Werner, H.-J. Habisch, A.C.F. Gorren, K. Schmidt, L. Canevari, G. Werner-Felmayer and B. Mayer 579–583
- Characterization of β -galactosidase mutations Asp³³² → Asn and Arg¹⁴⁸ → Ser, and a polymorphism, Ser⁵³² → Gly, in a case of G_{M1} gangliosidosis S. Zhang, R. Bagshaw, W. Hilson, Y. Oho, A. Hinek, J.T.R. Clarke, A. Hinek and J.W. Callahan 621–632
- The molecular basis of phosphatidylcholine preference of human group-V phospholipase A₂ K.P. Kim, S.K. Han, M. Hong and W. Cho 643–647

Carbohydrates and lipids

- Glycosylation-site-selective synthesis of *N*-acetyl-lactosamine repeats in bis-glycosylated human lysozyme R. Melcher, A. Hillebrand, U. Bahr, B. Schröder, M. Karas and A. Hasilik 507–515
- Atomic force microscopy of gastric mucin and chitosan mucoadhesive systems M.P. Deacon, S. McGurk, C.J. Roberts, P.M. Williams, S.J.B. Tendler, M.C. Davies, S.S. (Bob) Davis and S.E. Harding 557–563

Gene structure and expression

- Multiple conserved segments of E1 small nucleolar RNA are involved in the formation of a ribonucleoprotein particle in frog oocytes D.D. Ruhl, M.E. Pusateri and G.L. Eliceiri 517–524
- a new method for the section of protein interactions in mammalian cells E. Rojo-Niersbach, D. Morley, S. Heck and N. Lehming 585–590
- Sequence of the 5'-flanking region and promoter activity of the human mucin gene *MUC5B* in different phenotypes of colon cancer cells I. Van Seuningen, M. Perrais, P. Pigny, N. Porchet and J.-P. Aubert 675–686

Regulation of metabolism

- Auto-catalysed progression of aneuploidy explains the Hayflick limit of cultured cells, carcinogen-induced tumours in mice, and the age distribution of human cancer D. Rasnick 497–506

Evidence that metformin exerts its anti-diabetic effects through inhibition of complex 1 of the mitochondrial respiratory chain	M.R. Owen, E. Doran and A.P. Halestrap	607–614
Dynamics of haem oxygenase-1 expression and bilirubin production in cellular protection against oxidative stress	J.E. Clark, R. Foresti, C.J. Green and R. Motterlini	615–619
Membranes and bioenergetics		
Determinant of the extracellular location of the N-terminus of human multidrug-resistance-associated protein	J.-T. Zhang	597–606
Activity of phosphatidylinositol transfer protein is sensitive to ethanol and membrane curvature	H. Komatsu, B. Bouma, K.W.A. Wirtz, T.F. Taraschi and N. Janes	667–673
Receptors and signal transduction		
Involvement of cytosolic phospholipase A ₂ and the subsequent release of arachidonic acid, in signalling by Rac for the generation of intracellular reactive oxygen species in Rat-2 fibroblasts	C.-H. Woo, Z.-W. Lee, B.-C. Kim, K.-S. Ha and J.-H. Kim	525–530
G-protein coupling of μ -opioid receptors (OP ₃): elevated basal signalling activity	N.T. Burford, D. Wang and W. Sadée	531–537
Ligand binding directly stimulates ubiquitination of the inositol 1,4,5-trisphosphate receptor	C.-C. Zhu and R.J.H. Wojcikiewicz	551–556
Repression of transforming-growth-factor- β -mediated transcription by nuclear factor κ B	R.P. Nagarajan, F. Chen, W. Li, E. Vig, M.A. Harrington, H. Nakshatri and Y. Chen	591–596
Modulation of the smooth-muscle L-type Ca ²⁺ channel α 1 subunit (α 1C-b) by the β _{2a} subunit: a peptide which inhibits binding of β to the I-II linker of α 1 induces functional uncoupling	A. Hohaus, M. Poteser, C. Romainin, N. Klugbauer, F. Hofmann, I. Morano, H. Haase and K. Groschner	657–665
Cell biology and development		
Annexin II is associated with mRNAs which may constitute a distinct subpopulation	A. Vedeler and H. Hollås	565–572
Possible interference between tissue-non-specific alkaline phosphatase with an Arg ⁵⁴ → Cys substitution and a counterpart with an Asp ²⁷⁷ → Ala substitution found in a compound heterozygote associated with severe hypophosphatasia	M. Fukushi-Irié, M. Ito, Y. Amaya, N. Amizuka, H. Ozawa, S. Omura, Y. Ikehara and K. Oda	633–642
Correction		
G _i -mediated translocation of GLUT4 is independent of p85/p110 α and p110 γ phosphoinositide 3-kinases but might involve the activation of Akt kinase by L. Wang, H. Hayashi, K. Kishi, L. Huang, A. Hagi, K. Tamaoka, P.T. Hawkins and Y. Ebina (volume 345, pages 543–545, 2000)		687
