

Review

- Sphingosine 1-phosphate signalling in mammalian cells** 385–402
by S. Pyne and N. J. Pyne

Research Communications

- Cloning and mapping of human *PKIB* and *PKIG*, and comparison of tissue expression patterns of three members of the protein kinase inhibitor family, including PKIA 403–407
L. Zheng, L. Yu, Q. Tu, M. Zhang, H. He, W. Chen, J. Gao, J. Yu, Q. Wu and S. Zhao
- HSP43, a small heat-shock protein localized to specific cells of the vulva and spermatheca in the nematode *Caenorhabditis elegans* 409–412
L. Ding and E.P.M. Candido
- Ascorbate oxidation is a prerequisite for its transport into rat liver microsomal vesicles 413–415
M. Csala, V. Mile, A. Benedetti, J. Mandl and G. Bánhegyi

Research Papers

- Evidence for phosphorylation and ubiquitinylation of the turnip yellow mosaic virus RNA-dependent RNA polymerase domain expressed in a baculovirus–insect cell system 417–425
F. Héricourt, S. Blanc, V. Redeker and I. Jupin
- Interferons activate the p42/44 mitogen-activated protein kinase and JAK-STAT (Janus kinase-signal transducer and activator transcription factor) signalling pathways in hepatocytes: differential regulation by acute ethanol via a protein kinase C-dependent mechanism 427–435
V.-A.T. Nguyen, J. Chen, F. Hong, E.J.N. Ishac and B. Gao
- Sp1-like activity mediates angiotensin-II-induced plasminogen-activator inhibitor type-1 (*PAI-1*) gene expression in mesangial cells 435–441
M. Motojima, T. Ando and T. Yoshioka
- Tissue-specificity, functional characterization and subcellular localization of a rat ubiquitin-specific processing protease, UBP109, whose mRNA expression is developmentally regulated 443–453
K.C. Park, E.J. Choi, S.W. Min, S.S. Chung, H. Kim, T. Suzuki, K. Tanaka and C.H. Chung
- Glutathione peroxidase-1 but not -4 is involved in the regulation of cellular 5-lipoxygenase activity in monocytic cells 455–461
D. Straif, O. Werz, R. Kellner, U. Bahr and D. Steinhilber
- Esterification of free fatty acids in adipocytes: a comparison between octanoate and oleate 463–471
W. Guo, J.-K. Choi, J.L. Kirkland, B.E. Corkey and J.A. Hamilton
- Link peptide cartilage growth factor is degraded by membrane proteinases 473–479
M.F. Dean and P. Sansom
- Evidence that 12-lipoxygenase product 12-hydroxyeicosatetraenoic acid activates p21-activated kinase 481–487
Y. Wen, J. Gu, U.G. Knaus, L. Thomas, N. Gonzales and J.L. Nadler
- Activation of protein kinase C alters P34^{cdc2} phosphorylation state and kinase activity in early sea urchin embryos by abolishing intracellular Ca²⁺ transients 489–499
F.A. Suprynowicz, L. Groigno, M. Whitaker, F.J. Miller, G. Sluder, J. Sturrock and T. Whalley
- Identification of active-site residues in *Bradyrhizobium japonicum* malonamidase E2 501–507
H.M. Koo, S.-O. Choi, H.M. Kim and Y.S. Kim

NIMA-related kinase 2 (Nek2), a cell-cycle-regulated protein kinase localized to centrosomes, is complexed to protein phosphatase 1	N.R. Helps, X. Luo, H.M. Barker and P.T.W. Cohen	509–518
Kinetics and control of oxidative phosphorylation in rat liver mitochondria after chronic ethanol feeding	A. Marcinkeviciute, V. Mildaziene, S. Crumm, O. Demin, J.B. Hoek and B. Kholodenko	519–526
Isolation and characterization of casein kinase I from <i>Dictyostelium discoideum</i>	G. Moreno-Bueno, C. Calés, M.M. Behrens and M. Fernández-Renart	527–537
Hepatic intralobular mapping of fructose metabolism in the rat liver	S.P. Burns, H.C. Murphy, R.A. Iles, R.A. Bailey and R.D. Cohen	539–545
Regulation of BAD by cAMP-dependent protein kinase is mediated via phosphorylation of a novel site, Ser ¹⁵⁵	J.M. Lizcano, N. Morrice and P. Cohen	547–557
The human breast carcinoma cell line HBL-100 acquires exogenous cholesterol from high-density lipoprotein via CLA-1 (CD-36 and LIMP-II analogous 1)-mediated selective cholesteryl ester uptake	P.J. Pussinen, B. Karten, A. Wintersperger, H. Reicher, M. McLean, E. Malle and W. Sattler	559–566
Novel application of <i>S</i> -nitrosoglutathione–Sepharose to identify proteins that are potential targets for <i>S</i> -nitrosoglutathione-induced mixed-disulphide formation	P. Klatt, E. Pineda Molina, D. Pérez-Sala and S. Lamas	567–578
Effect of inhibition of glutathione synthesis on insulin action: <i>in vivo</i> and <i>in vitro</i> studies using buthionine sulfoximine	M. Khamaisi, O. Kavel, M. Rosenstock, M. Porat, M. Yuli, N. Kaiser and A. Rudich	579–586
<i>N</i> -arginine dibasic convertase (nardilysin) isoforms are soluble dibasic-specific metalloendopeptidases that localize in the cytoplasm and at the cell surface	V. Hospital, V. Chesneau, A. Balogh, C. Joulie, N.G. Seidah, P. Cohen and A. Prat	587–597
Recovery of active medium-chain-length-poly-3-hydroxyalkanoate polymerase from inactive inclusion bodies using ion-exchange resin	Q. Ren, G. de Roo, B. Kessler and B. Witholt	599–604
Phosphoinositide 3-kinase-dependent phosphorylation of the dual adaptor for phosphotyrosine and 3-phosphoinositides by the Src family of tyrosine kinase	S. Dowler, L. Montalvo, D. Cantrell, N. Morrice and D.R. Alessi	605–610
Targeting and insertion of C-terminally anchored proteins to the mitochondrial outer membrane is specific and saturable but does not strictly require ATP or molecular chaperones	L. Lan, S. Isenmann and B.W. Wattenberg	611–621
pH-dependence of the fast step of maltose hydrolysis catalysed by glucoamylase G1 from <i>Aspergillus niger</i>	U. Christensen	623–628
Identification of the differential distribution patterns of mRNAs and consensus binding sequences for mouse DAF-16 homologues	T. Furuyama, T. Nakazawa, I. Nakano and N. Mori	629–634
Substrate specificity of the expressed carotenoid 3,4-desaturase from <i>Rubrivivax gelatinosus</i> reveals the detailed reaction sequence to spheroidene and spirilloxanthin	S. Steiger, C. Astier and G. Sandmann	635–640
Cloning and characterization of the 5' flanking region of the sialomucin complex/rat <i>Muc4</i> gene: promoter activity in cultured cells	S.A. Price-Schiavi, A. Perez, R. Barco and K.L. Carraway	641–649
Enhancement of the thermostability and hydrolytic activity of xylanase by random gene shuffling	H. Shibuya, S. Kaneko and K. Hayashi	651–656
