

# VITAMIN E

Pure synthetic racemic  $\alpha$ -tocopheryl acetate identical with the international standard for vitamin E (*Nature*, 1941, 148, 472), is now available for scientific work in bottles of 1 and 5 gm.

*Apply direct to the  
manufacturers.*

# LABORATORY CHEMICALS

The laboratory chemicals issued by The British Drug Houses Ltd. are pure chemicals specifically manufactured for scientific uses. They are made under careful analytical control, produced in the most suitable physical form for their purpose and packed immediately after manufacture in the standard metric quantities in which they are supplied.

B.D.H. Laboratory Chemicals may be used in responsible analysis and in research with complete confidence in their uniform purity and reliability.

## The Institute of Chemistry of Great Britain and Ireland

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register persons qualified to practise. The aims of the Institute include the elevation of the profession of chemistry and the maintenance of the efficiency, integrity and usefulness of persons practising the same by compelling the observance of strict rules of membership, and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar.

*All communications to be addressed  
to the Registrar*

*Third Edition*

# VITAMINS in Theory & Practice

By Dr Leslie HARRIS

*Based on a Series of Lectures given at  
The Royal Institution*

66 illustrations. 10s. net

"Dr Harris's popular book has been only slightly enlarged, but all the important recent discoveries receive due notice....The vigilance with which this revision has been carried out is exemplary; the reader is brought right up to date in a rapidly changing subject."

THE LANCET

"An excellent survey, the best at present available, should have a wide appeal: a standard text book which is destined to become a classic."

CAMBRIDGE UNIVERSITY PRESS

## BIOCHEMICAL SOCIETY ADVERTISEMENTS

The Committee have decided to place a limited amount of advertising space in the Journal at the disposal of Members of the Society, to enable them to make known such requirements for biochemical materials as cannot be met through the ordinary commercial channels. Short advertisements dealing with requirements of this type will be accepted without charge, and should be sent to PROFESSOR C. R. HARINGTON, F.R.S., UNIVERSITY COLLEGE HOSPITAL MEDICAL SCHOOL, UNIVERSITY STREET, LONDON, W.C. 1.

Replies to such advertisements from Laboratories which are able to fulfil the requirements should not, in the first instance, be addressed to the author of the advertisement, but should be sent to Dr F. G. YOUNG, NATIONAL INSTITUTE FOR MEDICAL RESEARCH, LONDON, N.W. 3, who will make the necessary arrangements.

### MATERIALS REQUIRED FOR RESEARCH

1. Glucose 1-phosphate (50 mg.). W. J. Dixon, Manchester.
2. Cobra venom (100 mg. dried). P. J. MacIntosh, Dundee.
3. 0.5 g. *d*-ribose, 0.5 g. *d*-erythrose. F. C. Happold, Leeds University.
4. 3-Ethyl-4-cyclohexyl-1:2:4-triazole ("Azoman") (0.5 g.). Harold Scarborough, Edinburgh.
5. Galactose (1 lb.). E. J. King, London.

# JOURNAL OF ENDOCRINOLOGY

*At present one volume, consisting of four parts, appears yearly*

Subscription Rate: 30s. per volume, or \$ 6.00 in the United States of America

## CONTENTS FOR PART 1 OF VOL. 3, 1942

Further investigations on the mechanism of oestrone production in the ovary; by B. ZONDEK and J. SKLOW.

Adrenocorticotrophic activity in pregnant mares' serum; by Y. M. L. GOLLA and M. REISS.

Further observations on the role of progesterone (pregnanediol) and oestrogen in pregnancy; by A. M. HAIN.

The endocrine system and hair growth in the rat; by C. W. EMMENS.

The effect of implanting tablets of synthetic oestrogens on the histology and cytology of the anterior pituitary of immature rats; by C. L. FOSTER.

Implantation of sex hormones in man; by G. L. FOSS.

The behaviour of the uterus of the rhesus monkey under the influence of certain hormones; by G. H. BELL.

The assay of hypophyseal growth-promoting extracts employing rats treated with diethylstilboestrol; by M. GRIFFITHS and F. G. YOUNG.

Serological protection against the diabetogenic substance of the anterior pituitary gland; by A. H. ENNOR and E. SINGER.

*Subscriptions should be sent to the*
