

Research Communications

- | | | |
|---|--|---------|
| Chondrocyte expressed protein-68 (CEP-68), a novel human marker gene for cultured chondrocytes | E. Steck, K. Benz, H. Lorenz, M. Loew, T. Gress and W. Richter | 169–174 |
| Mitochondrial priming modifies Ca ²⁺ oscillations and insulin secretion in pancreatic islets | E.K. Ainscow and G.A. Rutter | 175–180 |

Research Papers

- | | | |
|--|--|---------|
| Haem-linked interactions in horseradish peroxidase revealed by spectroscopic analysis of the Phe-221 → Met mutant | B.D. Howes, N.C. Veitch, A.T. Smith, C.G. White and G. Smulevich | 181–191 |
| Dual DNA-binding specificity of peroxisome-proliferator-activated receptor γ controlled by heterodimer formation with retinoid X receptor α | M. Okuno, E. Arimoto, Y. Ikenobu, T. Nishihara and M. Imagawa | 193–198 |
| Identification of essential active-site residues in the cyanogenic β -glucosidase (linamarase) from cassava (<i>Manihot esculenta</i> Crantz) by site-directed mutagenesis | Z. Keresztessy, K. Brown, M.A. Dunn and M.A. Hughes | 199–205 |
| <i>Escherichia coli</i> flavohaemoglobin (Hmp) with equistoichiometric FAD and haem contents has a low affinity for dioxygen in the absence or presence of nitric oxide | C.E. Mills, S. Sedelnikova, B. Søballe, M.N. Hughes and R.K. Poole | 207–213 |
| Phosphate exchange and ATP synthesis by DMSO-pretreated purified bovine mitochondrial ATP synthase | S. Beharry and P.D. Bragg | 215–222 |
| Negative cross-talk between interleukin-3 and interleukin-11 is mediated by suppressor of cytokine signalling-3 (SOCS-3) | F. Magrangeas, O. Boisteau, S. Denis, Y. Jacques and S. Minvielle | 223–230 |
| Fatty-acyl-CoA thioesters inhibit recruitment of steroid receptor co-activator 1 to α and γ isoforms of peroxisome-proliferator-activated receptors by competing with agonists | K. Murakami, T. Ide, T. Nakazawa, T. Okazaki, T. Mochizuki and T. Kadowaki | 231–238 |
| <i>Triticum aestivum</i> L. endoxylanase inhibitor (TAXI) consists of two inhibitors, TAXI I and TAXI II, with different specificities | K. Gebruers, W. Debyser, H. Goesaert, P. Proost, J. Van Damme and J.A. Delcour | 239–244 |
| Glutamine metabolism to glucosamine is necessary for glutamine inhibition of endothelial nitric oxide synthesis | G. Wu, T.E. Haynes, H. Li, W. Yan and C.J. Meininger | 245–252 |
| Peroxisomal bifunctional enzyme binds and activates the activation function-1 region of the peroxisome proliferator-activated receptor α | C.E. Juge-Aubry, S. Kuenzli, J.-C. Sanchez, D. Hochstrasser and C.A. Meier | 253–258 |
| Catalytic and spectroscopic analysis of blue copper-containing nitrite reductase mutants altered in the environment of the type 2 copper centre: implications for substrate interaction | M. Prudêncio, R.R. Eady and G. Sawers | 259–266 |
| Insulin inhibits glucocorticoid-stimulated L-type 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase gene expression by activation of the c-Jun N-terminal kinase pathway | E. de los Pinos, S. Fernández de Mattos, M. Joaquin and A. Tauler | 267–273 |

Analysis of mitogen-activated protein kinase pathways used by interleukin 1 in tissues <i>in vivo</i> : activation of hepatic c-Jun N-terminal kinases 1 and 2, and mitogen-activated protein kinase kinases 4 and 7	A. Finch, W. Davis, W.G. Carter and J. Saklatvala	275–281
Cloning and functional expression of rat kidney dipeptidyl peptidase II	K.M. Fukasawa, K. Fukasawa, K. Higaki, N. Shiina, M. Ohno, S. Ito, J. Otogoto and N. Ota	283–290
γ -Interferon decreases the level of 26 S proteasomes and changes the pattern of phosphorylation	S. Bose, P. Brooks, G.G.F. Mason and A.J. Rivett	291–297
Resistance of bone marrow-derived macrophages to apoptosis is associated with the expression of X-linked inhibitor of apoptosis protein in primary cultures of bone marrow cells	H. Lin, C. Chen and B.D.-M. Chen	299–306
5-Aminolaevulinic synthase gene promoter contains two cAMP-response element (CRE)-like sites that confer positive and negative responsiveness to CRE-binding protein (CREB)	L.E. Giono, C.L. Varone and E.T. Cánepa	307–316
Cross-talk between steroid-receptor-mediated and cell-membrane-receptor-mediated signalling pathways results in the <i>in vivo</i> modulation of c-Met and ornithine decarboxylase gene expression in mouse kidney	M. Dudkowska, A. Stachurska, W. Chmurzyńska, B. Grzelakowska-Sztabert and M. Manteuffel-Cymborowska	317–323
Activation of blood coagulation factor IX by gingipains R, arginine-specific cysteine proteinases from <i>Porphyromonas gingivalis</i>	T. Imamura, S. Tanase, T. Hamamoto, J. Potempa and J. Travis	325–331
Inhibition of prolyl 4-hydroxylase <i>in vitro</i> and <i>in vivo</i> by members of a novel series of phenanthrolinones	T.J. Franklin, W.P. Morris, P.N. Edwards, M.S. Large and R. Stephenson	333–338
Endogenous glycosylphosphatidylinositol-specific phospholipase C releases renal dipeptidase from kidney proximal tubules <i>in vitro</i>	S.W. Park, K. Choi, I.C. Kim, H.H.B. Lee, N.M. Hooper and H.S. Park	339–344
Probing a novel potato lipoxygenase with dual positional specificity reveals primary determinants of substrate binding and requirements for a surface hydrophobic loop and has implications for the role of lipoxygenases in tubers	R.K. Hughes, S.I. West, A.R. Hornostaj, D.M. Lawson, S.A. Fairhurst, R.O. Sanchez, P. Hough, B.H. Robinson and R. Casey	345–355
Oxidation of pyridine nucleotides during Fas- and ceramide-induced apoptosis in Jurkat cells: correlation with changes in mitochondria, glutathione depletion, intracellular acidification and caspase 3 activation	M.-C. Gendron, N. Schrantz, D. Métivier, G. Kroemer, Z. Maciorowska, F. Sureau, S. Koester and P.X. Petit	357–367
Overexpression of the human 2-oxoglutarate carrier lowers mitochondrial membrane potential in HEK-293 cells: contrast with the unique cold-induced mitochondrial carrier CGI-69	X.X. Yu, D.A. Lewin, A. Zhong, J. Brush, P.W. Schow, S.W. Sherwood, G. Pan and S.H. Adams	369–375
Interaction of the α subunit of Na,K-ATPase with cofilin	K. Lee, J. Jung, M. Kim and G. Guidotti	377–385
Identification of Cys ¹⁴⁰ in helix 4 as an exofacial cysteine residue within the substrate-translocation channel of rat equilibrative nitrobenzylthioinosine (NBMPR)-insensitive nucleoside transporter rENT2	S.Y.M. Yao, M. Sundaram, E.G. Chomey, C.E. Cass, S.A. Baldwin and J.D. Young	387–393
Studies on a single immunoglobulin-binding domain of protein L from <i>Peptostreptococcus magnus</i> : the role of tyrosine-53 in the reaction with human IgG	J.A. Beckingham, N.G. Housden, N.M. Muir, S.P. Bottomley and M.G. Gore	395–401
Characterization of monocot and dicot plant S-adenosyl-L-methionine decarboxylase gene families including identification in the mRNA of a highly conserved pair of upstream overlapping open reading frames	M. Franceschetti, C. Hanfrey, S. Scaramagli, P. Torrigiani, N. Bagni, D. Burtin and A.J. Michael	403–409
Mitochondrial respiratory chain-dependent generation of superoxide anion and its release into the intermembrane space	D. Han, E. Williams and E. Cadenas	411–416
