

Review**Recombinant aequorin and green fluorescent protein as valuable tools in the study of cell signalling**

by A. Chiesa, E. Rapizzi, V. Tosello, P. Pinton, M. de Virgilio, K.E. Fogarty and R. Rizzuto

1–12

Research Papers

- Organization of uroplakin subunits: transmembrane topology, pair formation and plaque composition
F.-X. Liang, I. Riedel, F.-M. Deng, G. Zhou, C. Xu, X.-R. Wu, X.-P. Kong, R. Moll and T.-T. Sun **13–18**
- Identification of the G13 (cAMP-response-element-binding protein-related protein) gene product related to activating transcription factor 6 as a transcriptional activator of the mammalian unfolded protein response
K. Haze, T. Okada, H. Yoshida, H. Yanagi, T. Yura, M. Negishi and K. Mori **19–28**
- α -Melanocyte-related tripeptide, Lys-D-Pro-Val, ameliorates endotoxin-induced nuclear factor κ B translocation and activation: evidence for involvement of an interleukin-1 β ^{193–195} receptor antagonism in the alveolar epithelium
J.J.E. Haddad, R. Lauterbach, N.E. Saadé, B. Safieh-Garabedian and S.C. Land **29–38**
- Kinetics of CO binding and CO photodissociation in *Pseudomonas stutzeri* *cd*₁ nitrite reductase: probing the role of extended N-termini in fast structural relaxation upon CO photodissociation
E.K. Wilson, A. Bellelli, F. Cutruzzolà, W.G. Zumft, A. Gutierrez and N.S. Scrutton **39–43**
- Characterization of the interaction between the transcription factors human polyamine modulated factor (PMF-1) and NF-E2-related factor 2 (Nrf-2) in the transcriptional regulation of the spermidine/spermine *N*¹-acetyltransferase (SSAT) gene
Y. Wang, W. Devereux, T.M. Stewart and R.A. Casero, Jr **45–49**
- The *Escherichia coli* CcmG protein fulfils a specific role in cytochrome *c* assembly
E. Reid, J. Cole and D.J. Eaves **51–58**
- Selective recognition of inositol phosphates by subtypes of the inositol trisphosphate receptor
E.P. Nerou, A.M. Riley, B.V.L. Potter and C.W. Taylor **59–69**
- Xenobiotic induction of cytochrome P450 2B1 (CYP2B1) is mediated by the orphan nuclear receptor constitutive androstane receptor (CAR) and requires steroid co-activator 1 (SRC-1) and the transcription factor Sp1
R. Muangmoonchai, D. Smirlis, S.-C. Wong, M. Edwards, I.R. Phillips and E.A. Shephard **71–78**
- Long-lived glycosyl-enzyme intermediate mimic produced by formate re-activation of a mutant endoglucanase lacking its catalytic nucleophile
J.-L. Viladot, F. Canals, X. Batllori and A. Planas **79–86**
- Nitric oxide and cGMP activate Ca²⁺-release processes in rat parotid acinar cells
D.K. Looms, K. Tritsarlis, B. Nauntofte and S. Dissing **87–95**
- Enzymic characterization of epidermis-derived 12-lipoxygenase isoenzymes
M. Siebert, P. Krieg, W.D. Lehmann, F. Marks and G. Fürstenberger **97–104**
- Differential regulation of expression of genes encoding uncoupling proteins 2 and 3 in brown adipose tissue during lactation in mice
N. Pedraza, G. Solanes, R. Iglesias, M. Vázquez, M. Giralt and F. Villarroya **105–111**

Characterization of a novel phosphatidylinositol 3-phosphate-binding protein containing two FYVE fingers in tandem that is targeted to the Golgi	P.C.F. Cheung, L. Trinkle-Mulcahy, P. Cohen and J.M. Lucocq	113–121
Proinsulin C-peptide rapidly stimulates mitogen-activated protein kinases in Swiss 3T3 fibroblasts: requirement of protein kinase C, phosphoinositide 3-kinase and pertussis toxin-sensitive G-protein	T. Kitamura, K. Kimura, B.D. Jung, K. Makondo, S. Okamoto, X. Cañas, N. Sakane, T. Yoshida and M. Saito	123–129
Protein–coenzyme interactions in adenosylcobalamin-dependent glutamate mutase	M.S. Huhta, H.-P. Chen, C. Hemann, C.R. Hille and E.N.G. Marsh	131–137
Control of Ca ²⁺ influx in human neutrophils by inositol 1,4,5-trisphosphate (IP ₃) binding: differential effects of micro-injected IP ₃ receptor antagonists	E.V. Davies-Cox, I. Laffafian and M.B. Hallett	139–143
Oxidative modification of H-ras: S-thiolation and S-nitrosylation of reactive cysteines	R.J. Mallis, J.E. Buss and J.A. Thomas	145–153
Pectate lyase 10A from <i>Pseudomonas cellulosa</i> is a modular enzyme containing a family 2a carbohydrate-binding module	I.E. Brown, M.H. Mallen, S.J. Charnock, G.J. Davies and G.W. Black	155–165
A new family of rhamnogalacturonan lyases contains an enzyme that binds to cellulose	V.A. McKie, J.-P. Vincken, A.G.J. Voragen, L.A.M. van den Broek, E. Stimson and H.J. Gilbert	167–177
Exonic Sp1 sites are required for neural-specific expression of the glycine receptor β subunit gene	H. Tintrup, M. Fischer, H. Betz and J. Kuhse	179–187
Sphingosylphosphocholine is a naturally occurring lipid mediator in blood plasma: a possible role in regulating cardiac function via sphingolipid receptors	K. Liliom, G. Sun, M. Bünemann, T. Virág, N. Nusser, D.L. Baker, D.-a. Wang, M.J. Fabian, B. Brandts, K. Bender, A. Eickel, K.U. Malik, D.D. Miller, D.M. Desiderio, G. Tigyi and L. Pott	189–197
Effect of polyamine depletion on caspase activation: a study with spermine synthase-deficient cells	C. Stefanelli, C. Pignatti, B. Tantini, M. Fattori, I. Stanic, C.A. Mackintosh, F. Flamigni, C. Guarnieri, C.M. Caldarera and A.E. Pegg	199–206
Enhancement of macrophage survival and DNA synthesis by oxidized-low-density-lipoprotein (LDL)-derived lipids and by aggregates of lightly oxidized LDL	J.A. Hamilton, W. Jessup, A.J. Brown and G. Whitty	207–214
Recombinant soluble betaglycan is a potent and isoform-selective transforming growth factor- β neutralizing agent	M.M. Vilchis-Landeros, J.L. Montiel, V. Mendoza, G. Mendoza-Hernández and F. López-Casillas	215–222
Structural and functional similarities between the central eukaryotic initiation factor (eIF)4A-binding domain of mammalian eIF4G and the eIF4A-binding domain of yeast eIF4G	D. Dominguez, E. Kislig, M. Altmann and H. Trachsel	223–230
The mitochondrial consequences of uncoupling intact cells depend on the nature of the exogenous substrate	B. Sibille, C. Filippi, M.-A. Piquet, P. Leclercq, E. Fontaine, X. Ronot, M. Rigoulet and X. Leverve	231–235
(S)-Preferential detoxification of 4-hydroxy-2(E)-nonenal enantiomers by hepatic glutathione S-transferase isoforms in guinea-pigs and rats	A. Hiratsuka, K. Tobita, H. Saito, Y. Sakamoto, H. Nakano, K. Ogura, T. Nishiyama and T. Watabe	237–244
The efficiency of N-linked glycosylation of bovine DNase I depends on the Asn-Xaa-Ser/Thr sequence and the tissue of origin	A. Nishikawa and S. Mizuno	245–248
