

Review

- Electrospray and tandem mass spectrometry in biochemistry** 545–561
by W.J. Griffiths, A.P. Jonsson, S. Liu, D.K. Rai and Y. Wang

Research Communication

- Subcellular localization and adaptive up-regulation of the System A (SAT2) amino acid transporter in skeletal-muscle cells and adipocytes R. Hyde, G.R. Christie, G.J. Litherland, E. Hajdich, P.M. Taylor and H.S. Hundal 563–568

Research Papers

- Controlled protonation of iron–molybdenum cofactor by nitrogenase: a structural and theoretical analysis M.C. Durrant 569–576
- Murine fibromodulin: cDNA and genomic structure, and age-related expression and distribution in the knee joint A.-M.K. Säämänen, H.J. Salminen, A.J. Rantakokko, D. Heinegård and E.I. Vuorio 577–585
- Expression of P-170 glycoprotein sensitizes lymphoblastoid CEM cells to mitochondria-mediated apoptosis P. Matarrese, U. Testa, R. Cauda, S. Vella, L. Gambardella and W. Malorni 587–595
- The kinase DYRK1A phosphorylates the transcription factor FKHR at Ser³²⁹ *in vitro*, a novel *in vivo* phosphorylation site Y.L. Woods, G. Rena, N. Morrice, A. Barthel, W. Becker, S. Guo, T.G. Unterman and P. Cohen 597–607
- The kinase DYRK phosphorylates protein-synthesis initiation factor eIF2B ϵ at Ser⁵³⁹ and the microtubule-associated protein tau at Thr²¹²: potential role for DYRK as a glycogen synthase kinase 3-priming kinase Y.L. Woods, P. Cohen, W. Becker, R. Jakes, M. Goedert, X. Wang and C.G. Proud 609–615
- Differential effects of mitomycin C and doxorubicin on P-glycoprotein expression R. Maitra, P.A. Halpin, K.H. Karlson, R.L. Page, D.Y. Paik, M.O. Leavitt, B.D. Moyer, B.A. Stanton and J.W. Hamilton 617–624
- The hexokinase 2 protein regulates the expression of the *GLK1*, *HXK1* and *HXK2* genes of *Saccharomyces cerevisiae* A. Rodríguez, T. de la Cera, P. Herrero and F. Moreno 625–631
- Evaluation of the role of proline residues flanking the RGD motif of dendroaspin, an inhibitor of platelet aggregation and cell adhesion X. Lu, Y. Sun, D. Shang, B. Wattam, S. Egglezou, T. Hughes, E. Hyde, M. Scully and V. Kakkar 633–638
- Plasmin-dependent elimination of the growth-factor-like domain in urokinase causes its rapid cellular uptake and degradation A. Poliakov, V. Tkachuk, T. Ovchinnikova, N. Potapenko, S. Bagryantsev and V. Stepanova 639–645
- Tissue-specific activity of lipoprotein lipase in skeletal muscle regulates the expression of uncoupling protein 3 in transgenic mouse models D. Kratky, J.G. Strauss and R. Zechner 647–652
- Reactive oxygen species involved in trichosanthin-induced apoptosis of human choriocarcinoma cells C.-y. Zhang, Y.-x. Gong, H. Ma, C.-c. An and D.-y. Chen 653–661
- The transient receptor potential, TRP4, cation channel is a novel member of the family of calmodulin binding proteins C. Trost, C. Bergs, N. Himmerkus and V. Flockerzi 663–670
- Ten isoenzymes of xyloglucan endotransglycosylase from plant cell walls select and cleave the donor substrate stochastically N.M. Steele, Z. Sulová, P. Campbell, J. Braam, V. Farkaš and S.C. Fry 671–679

Phosphate-binding loop and Rab GTPase function: mutations at Ser ²⁹ and Ala ³⁰ of Rab5 lead to loss-of-function as well as gain-of-function phenotype	G. Li and Z. Liang	681–689
Involvement of Hic-5 in platelet activation: integrin α IIb β 3-dependent tyrosine phosphorylation and association with proline-rich tyrosine kinase 2	M. Osada, T. Ohmori, Y. Yatomi, K. Satoh, S. Hosogaya and Y. Ozaki	691–697
Cytoplasmic interactions between phospholamban residues 1–20 and the calcium-activated ATPase of the sarcoplasmic reticulum	P. Sharma, V.B. Patchell, Y. Gao, J.S. Evans and B.A. Levine	699–706
Characterization of PHEX endopeptidase catalytic activity: identification of parathyroid-hormone-related peptide _{107–139} as a substrate and osteocalcin, PP _i and phosphate as inhibitors	G. Boileau, H.S. Tenenhouse, L. DesGroseillers and P. Crine	707–713
Cloning, expression and localization of human BM88 shows that it maps to chromosome 11p15.5, a region implicated in Beckwith–Wiedemann syndrome and tumorigenesis	M. Gaitanou, P. Buanne, C. Pappa, N. Georgopoulou, A. Mamalaki, F. Tirone and R. Matsas	715–724
Association of 4F2hc with light chains LAT1, LAT2 or y ⁺ LAT2 requires different domains	A. Bröer, B. Friedrich, C.A. Wagner, S. Fillon, V. Ganapathy, F. Lang and S. Bröer	725–731
Transport of lactate and pyruvate in the intraerythrocytic malaria parasite, <i>Plasmodium falciparum</i>	J.L. Elliott, K.J. Saliba and K. Kirk	733–739
Agonist-promoted trafficking of human bradykinin receptors: arrestin- and dynamin-independent sequestration of the B ₂ receptor and bradykinin in HEK293 cells	M.E. Lamb, W.F.C. de Weerd and L.M.F. Leeb-Lundberg	741–750
Monocyte chemoattractant protein 1 causes differential signalling mediated by proline-rich tyrosine kinase 2 in THP-1 cells	M. Yamasaki, H. Arai, N. Ashida, K. Ishii and T. Kita	751–756
Oxidative stress impairs insulin but not platelet-derived growth factor signalling in 3T3-L1 adipocytes	A. Tirosh, A. Rudich, R. Potashnik and N. Bashan	757–763
Lysosomal phospholipase A ₁ in <i>Trypanosoma cruzi</i> : an enzyme with a possible role in the pathogenesis of Chagas' disease	M. Wainszelbaum, E. Isola, S. Wilkowsky, J.J.B. Cannata, J. Florin-Christensen and M. Florin-Christensen	765–770
Sound attenuation of polymerizing actin reflects supramolecular structures: viscoelastic properties of actin gels modified by cytochalasin D, profilin and α -actinin	O. Wagner, H. Schüler, P. Hofmann, D. Langer, P. Dancker and J. Bereiter-Hahn	771–778
Determination of interaction sites of phospholipase D ₁ for RhoA	S. Cai and J.H. Exton	779–785
Occurrence of paradoxical or sustained control by an enzyme when overexpressed: necessary conditions and experimental evidence with regard to hepatic glucokinase	P. de Atauri, L. Acerenza, B.N. Kholodenko, N. de la Iglesia, J.J. Guinovart, L. Agius and M. Cascante	787–793
Involvement of mitogen-activated protein kinase activation in the signal-transduction pathways of the soya bean oxidative burst	A.T.S. Taylor, J. Kim and P.S. Low	795–803
Mammalian inositol polyphosphate 5-phosphatase II can compensate for the absence of all three yeast Sac1-like-domain-containing 5-phosphatases	C.J. O'Malley, B.K. McColl, A.M. Kong, S.L. Ellis, A.P.W. Wijayarathnam, J. Sambrook and C.A. Mitchell	805–817
Rat peptide methionine sulphoxide reductase: cloning of the cDNA, and down-regulation of gene expression and enzyme activity during aging	I. Petropoulos, J. Mary, M. Perichon and B. Friguet	819–825
Suramin and the suramin analogue NF307 discriminate among calmodulin-binding sites	M. Klinger, E. Bofill-Cardona, B. Mayer, C. Nanoff, M. Freissmuth and M. Hohenegger	827–833
Catalytic mechanism of a family 3 β -glucosidase and mutagenesis study on residue Asp-247	Y.-K. Li, J. Chir and F.-Y. Chen	835–840

Structure–function studies of human deoxyhypusine synthase: identification of amino acid residues critical for the binding of spermidine and NAD	C.H. Lee, P.Y. Um and M.H. Park	841–849
Characterization of membrane-localized and cytosolic Rac-GTPase-activating proteins in human neutrophil granulocytes: contribution to the regulation of NADPH oxidase	M. Geiszt, M.-C. Dagher, G. Molnár, A. Havasi, J. Faure, M.-H. Paclet, F. Morel and E. Ligeti	851–858
A neutral sphingomyelinase resides in sphingolipid-enriched microdomains and is inhibited by the caveolin-scaffolding domain: potential implications in tumour necrosis factor signalling	R.J. Veldman, N. Maestre, O.M. Aduib, J.A. Medin, R. Salvayre and T. Levade	859–868
<i>In vitro</i> studies of amyloid β -protein fibril assembly and toxicity provide clues to the aetiology of Flemish variant (Ala ⁶⁹² → Gly) Alzheimer's disease	D.M. Walsh, D.M. Hartley, M.M. Condron, D.J. Selkoe and D.B. Teplow	869–877

Correction

A new phosphospecific cell-based ELISA for p42/p44 mitogen-activated protein kinase (MAPK), p38 MAPK, protein kinase B and cAMP-response-element-binding protein by H.H. Versteeg, E. Nijhuis, G.R. van den Brink, M. Evertzen, G.N. Pynaert, S.J.H. van Deventer, P.J. Coffey and M.P. Peppelenbosch (volume 350, pages 717–722, 2000)		879
