

Reviews

- What the structure of a calcium pump tells us about its mechanism** 665–683
by A.G. Lee and J.M. East
- Structural similarities of Na,K-ATPase and SERCA, the Ca²⁺-ATPase of the sarcoplasmic reticulum** 685–704
by K.J. Sweadner and C. Donnet

Research Papers

- Characterization of matrix metalloproteinase-26, a novel metalloproteinase widely expressed in cancer cells of epithelial origin G.N. Marchenko, B.I. Ratnikov, D.V. Rozanov, A. Godzik, E.I. Deryugina and A.Y. Strongin 705–718
- Role of the System L permease LAT1 in amino acid and iodothyronine transport in placenta J.W.A. Ritchie and P.M. Taylor 719–725
- Endosomal localization of phospholipase D 1a and 1b is defined by the C-termini of the proteins, and is independent of activity W.E. Hughes and P.J. Parker 727–736
- A role of tensin in skeletal-muscle regeneration A. Ishii and S.H. Lo 737–745
- Reducible cationic lipids for gene transfer B. Wetzer, G. Byk, M. Frederic, M. Airiau, F. Blanche, B. Pitard and D. Scherman 747–756
- Fungal trehalose phosphorylase: kinetic mechanism, pH-dependence of the reaction and some structural properties of the enzyme from *Schizophyllum commune* C. Eis, M. Watkins, T. Prohaska and B. Nidetzky 757–767
- Amine oxidase substrates mimic several of the insulin effects on adipocyte differentiation in 3T3 F442A cells E. Fontana, J. Boucher, L. Marti, J.M. Lizcano, X. Testar, A. Zorzano and C. Carpené 769–777
- A mitochondrial uncoupling artifact can be caused by expression of uncoupling protein 1 in yeast J.A. Stuart, J.A. Harper, K.M. Brindle, M.B. Jekabsons and M.D. Brand 779–789
- Identification of novel β -mannan- and β -glucan-binding modules: evidence for a superfamily of carbohydrate-binding modules A. Sunna, M.D. Gibbs and P.L. Bergquist 791–798
- Role of ergothioneine on S-nitrosoglutathione catabolism F. Misiti, M. Castagnola, C. Zuppi, B. Giardina and I. Messana 799–804
- Response of neurons to an irreversible inhibition of endoplasmic reticulum Ca²⁺-ATPase: relationship between global protein synthesis and expression and translation of individual genes T. Mengesdorf, S. Althausen, I. Oberndorfer and W. Paschen 805–812
- Highly sensitive and selective fluorescence assays for rapid screening of endothelin-converting enzyme inhibitors N. Luciani, H. de Rocquigny, S. Turcaud, A. Romieu and B.P. Roques 813–819
- Superior role of apolipoprotein B48 over apolipoprotein B100 in chylomicron assembly and fat absorption: an investigation of apobec-1 knock-out and wild-type mice J.S. Kendrick, L. Chan and J.A. Higgins 821–827
- Interaction of human thymidine kinase 1 with p21^{Waf1} D.-Y. Huang and Z.-F. Chang 829–834
- Proteasomes are a target of the anti-tumour drug vinblastine M. Piccinini, O. Tazartes, C. Mezzatesta, E. Ricotti, S. Bedino, F. Grosso, U. Dianzani, P.-A. Tovo, M. Mostert, A. Musso and M.T. Rinaudo 835–841

Cholesterol-dependent interaction of syncollin with the membrane of the pancreatic zymogen granule	A. Hodel, S.J. An, N.J. Hansen, J. Lawrence, B. Wäsle, M. Schrader and J.M. Edwardson	843–850
Overproduction, purification and novel redox properties of the dihaem cytochrome c, NapB, from <i>Haemophilus influenzae</i>	A. Brigé, J.A. Cole, W.R. Hagen, Y. Guisez and J.J. Van Beeumen	851–858
Transcriptional activities of p73 splicing variants are regulated by inter-variant association	Y. Ueda, M. Hijikata, S. Takagi, T. Chiba and K. Shimotohno	859–866
Conjugation of an antibody Fv fragment to a virus coat protein: cell-specific targeting of recombinant polyoma-virus-like particles	K. Stubenrauch, S. Gleiter, U. Brinkmann, R. Rudolph and H. Lillie	867–873
Thrombopoietin stimulates cortactin translocation to the cytoskeleton independently of tyrosine phosphorylation	I. Lopez, V. Duprez, J. Melle, F. Dreyfus, S. Lévy-Tolédano and M. Fontenay-Roupeie	875–881
Effect of iron deficiency on placental transfer of iron and expression of iron transport proteins <i>in vivo</i> and <i>in vitro</i>	L. Gambling, R. Danzeisen, S. Gair, R.G. Lea, Z. Charania, N. Solanky, K.D. Joory, S.K.S. Srari and H.J. McArdle	883–889
Identification of a new subfamily of sulphotransferases: cloning and characterization of canine SULT1D1	C. Tsoi, C.N. Falany, R. Morgenstern and S. Swedmark	891–897
Inhibition of peroxisome-proliferator-activated receptor (PPAR) α by MK886	J.P. Kehrer, S.S. Biswal, E. La, P. Thuillier, K. Datta, S.M. Fischer and J.P. Vanden Heuvel	899–906
Cloning and characterization of human liver cytosolic β -glycosidase	M. de Graaf, I.C. van Veen, I.H. van der Meulen-Muileman, W.R. Gerritsen, H.M. Pinedo and H.J. Haisma	907–910

Correction

Kinetics of CO binding and CO photodissociation in <i>Pseudomonas stutzeri</i> <i>cd</i> ₁ nitrite reductase: probing the role of extended N-termini in fast structural relaxation upon CO photodissociation by E.K. Wilson, A. Bellelli, F. Cutruzzolà, W.G. Zumft, A. Gutierrez and N.S. Scrutton (volume 355, pages 39–43, 2001)		911
