OBITUARY NOTICE	543
63. Purification of tetanus toxoid. By P. J. MOLONEY and J. N. HENNESSY	544
64. Antibacterial action and chemical constitution in long-chain aliphatic bases. By A. T. FULLER	548
65. The acetone-soluble lipid of the atheromatous aorta. By C. S. MCARTHUR	559
66. <i>l</i> (-)-Cysteic acid decarboxylase. By H. BLASCHKO	571
67. Origin and relationship of acetylmethylcarbinol to 2:3-butylene glycol in bacterial fermentations. By G. L. STAHLY and C. H. WERKMAN. (With one figure)	575
68. Studies on the acetone-butyl alcohol fermentation. 2. Intermediates in the fermentation of glucose by <i>Cl. acetobutylicum</i> . 3. Potassium as an essential factor in the fermentation of maize meal by <i>Cl. acetobutylicum</i> (BY). By R. DAVIES. (With eight figures)	582
69. The effect of the <i>pH</i> of the medium during growth on the enzymic activities of bacteria (<i>Escherichia coli</i> and <i>Micrococcus lysodeikticus</i>) and the biological significance of the changes produced. By E. F. GALE and H. M. R. EPPS. (With fifteen figures)	600
70. The influence of the presence of glucose during growth on the enzymic activities of <i>Escherichia coli</i> : comparison of the effect with that produced by fermentation acids. By H. M. R. EPPS and E. F. GALE	619
71. The effect of the <i>pH</i> and the presence of glucose during growth on the production of α and θ toxins and hyaluronidase by <i>Clostridium welchii</i> . By E. F. GALE and W. E. VAN HEYNINGEN. (With five figures)	624
72. Intercellular hormones. 4. Further observations regarding the mechanism of the production and release of proliferation-promoting factors by injured cells. By J. R. LOOFBOUROW. (With one figure)	631
73. A necessary precaution in the use of takadiastase for the estimation of maltose. By A. H. BUNTING	639
74. The catalytic oxidation of ascorbic acid in the presence of tea infusions. By G. A. SNOW and S. S. ZILVA. (With five figures)	641
75. Microdiffusion methods. Ammonia and urea using buffered absorbents (revised methods for ranges greater than 10 μ g. N). By E. J. CONWAY and E. O'MALLEY. (With one figure)	655
76. The nitrogen of the potato. By A. NEUBERGER and F. SANGER	662
77. The effect of amino-acids on phosphate transfer in muscle extract. By H. LEHMANN and L. POLLAK. (With one figure)	672
78. The effect of protein intake on the absorption of calcium and magnesium. By R. A. McCANCE, E. M. WIDDOWSON and H. LEHMANN	686
79. The absorption and excretion of zinc. By R. A. McCANCE and E. M. WIDDOWSON	692
80. Palm oil carotenoids. 2. The isolation of lipid pigments from a West African plantation oil and some remarks on the isomerization of carotenoids. By R. F. HUNTER, A. D. SCOTT and J. R. EDISBURY	697
