<tr>
<td>Obituary Notice</td>
</tr>
<tr>
<td>63. Purification of tetanus toxoid. By P. J. Moloney and J. N. Hennessy</td>
</tr>
<tr>
<td>64. Antibacterial action and chemical constitution in long-chain aliphatic bases. By A. T. Fuller</td>
</tr>
<tr>
<td>65. The acetone-soluble lipoid of the atheromatous aorta. By C. S. McArthur</td>
</tr>
<tr>
<td>66. l(−)-Cysteic acid decarboxylase. By H. Blaschko</td>
</tr>
<tr>
<td>68. Studies on the acetone-butyl alcohol fermentation. 2. Intermediates in the fermentation of glucose by <em>Cl. acetobutylicum</em>. 3. Potassium as an essential factor in the fermentation of maize meal by <em>Cl. acetobutylicum</em> (BY). By R. Davies. (With eight figures)</td>
</tr>
<tr>
<td>69. The effect of the pH of the medium during growth on the enzymic activities of bacteria (<em>Escherichia coli</em> and <em>Micrococcus lysodeikticus</em>) and the biological significance of the changes produced. By E. F. Gale and H. M. R. Effs. (With fifteen figures)</td>
</tr>
<tr>
<td>70. The influence of the presence of glucose during growth on the enzymic activities of <em>Escherichia coli</em>: comparison of the effect with that produced by fermentation acids. By H. M. R. Effs and E. F. Gale</td>
</tr>
<tr>
<td>71. The effect of the pH and the presence of glucose during growth on the production of α and θ toxins and hyaluronidase by <em>Clostridium welchii</em>. By E. F. Gale and W. E. Van Heyningen. (With five figures)</td>
</tr>
<tr>
<td>72. Intercellular hormones. 4. Further observations regarding the mechanism of the production and release of proliferation-promoting factors by injured cells. By J. R. Loofbourow. (With one figure)</td>
</tr>
<tr>
<td>73. A necessary precaution in the use of takadiastase for the estimation of maltose. By A. H. Bunting</td>
</tr>
<tr>
<td>74. The catalytic oxidation of ascorbic acid in the presence of tea infusions. By G. A. Snow and S. S. Zilva. (With five figures)</td>
</tr>
<tr>
<td>76. The nitrogen of the potato. By A. Neuberger and F. Sanger</td>
</tr>
<tr>
<td>77. The effect of amino-acids on phosphate transfer in muscle extract. By H. Lehmann and L. Pollak. (With one figure)</td>
</tr>
<tr>
<td>79. The absorption and excretion of zinc. By R. A. McCance and E. M. Widdowson</td>
</tr>
<tr>
<td>80. Palm oil carotenoids. 2. The isolation of lipid pigments from a West African plantation oil and some remarks on the isomerization of carotenoids. By R. F. Hunter, A. D. Scott and J. R. Edisbury</td>
</tr>
