

Research Papers

The transfer of transthyretin and receptor-binding properties from the plasma retinol-binding protein to the epididymal retinoic acid-binding protein	M. Sundaram, D.M.F. van Aalten, J.B.C. Findlay and A. Sivaprasadarao	265–271
The death domain of Rab3 guanine nucleotide exchange protein in GDP/GTP exchange activity in living cells	T. Coppola, V. Perret-Menoud, S. Gattesco, S. Magnin, I. Pombo, U. Blank and R. Regazzi	273–279
Increasing the redox potential of isoform 1 of yeast cytochrome c through the modification of select haem interactions	C.M. Lett and J.G. Guillemette	281–287
Concentrated solutions of salivary MUC5B mucin do not replicate the gel-forming properties of saliva	B.D.E. Raynal, T.E. Hardingham, D.J. Thornton and J.K. Sheehan	289–296
<i>myo</i> -Inositol hexakisphosphate is a major component of an extracellular structure in the parasitic cestode <i>Echinococcus granulosus</i>	F. Irigoín, F. Ferreira, C. Fernández, R.B. Sim and A. Díaz	297–304
Ecdysone-inducible expression of oncogenic Ha-Ras in NIH 3T3 cells leads to transient nuclear localization of activated extracellular signal-regulated kinase by mitogen-activated protein kinase phosphatase-1	D. Plows, P. Briassouli, C. Owen, V. Zoumpourlis, M.D. Garrett and A. Pintzas	305–315
Molecular interactions between desmosomal cadherins	S.-e.H. Syed, B. Trinnaman, S. Martin, S. Major, J. Hutchinson and A.I. Magee	317–327
Purification, molecular cloning and heterologous expression of a glutathione S-transferase involved in insecticide resistance from the rice brown planthopper, <i>Nilaparvata lugens</i>	J.G. Vontas, G.J. Small, D.C. Nikou, H. Ranson and J. Hemingway	329–337
¹³ C-NMR study of the inhibition of δ -chymotrypsin by a tripeptide-glyoxal inhibitor	A. Djurdjevic-Pahl, C. Hewage and J.P.G. Malthouse	339–347
Sphingosine 1-phosphate evokes calcium signals in C ₂ C ₁₂ myoblasts via Edg3 and Edg5 receptors	E. Meacci, F. Cencetti, L. Formigli, R. Squecco, C. Donati, B. Tiribilli, F. Quercioli, S. Zecchi Orlandini, F. Francini and P. Bruni	349–357
Effect of brefeldin A on heparan sulphate biosynthesis in Madin–Darby canine kidney cells	S.O. Kolset, K. Prydz, K. Fjeldstad, F. Safaiyan, T.T. Vuong, E. Gottfridsson and M. Salmivirta	359–366
Differentiation regulates interleukin-1 β -induced cyclo-oxygenase-2 in human articular chondrocytes: role of p38 mitogen-activated protein kinase	B. Thomas, S. Thirion, L. Humbert, L. Tan, M.B. Goldring, G. Béréziat and F. Berenbaum	367–373
Phosphorylation of <i>Xenopus</i> transcription factor IIIA by an oocyte protein kinase CK2	C.J. Westmark, R. Ghose and P.W. Huber	375–382
A novel human small subunit of calpains	É. Schád, A. Farkas, G. Jékely, P. Tompa and P. Friedrich	383–388
Mutational analysis of the glucagon receptor: similarities with the vasoactive intestinal peptide (VIP)/pituitary adenylate cyclase-activating peptide (PACAP)/secretin receptors for recognition of the ligand's third residue	J. Perret, M. Van Craenenbroeck, I. Langer, P. Vertongen, F. Grégoire, P. Robberecht and M. Waelbroeck	389–394
Inhibitory effects of acidic phospholipids on the binding of origin-recognition complex to origin DNA	J.-R. Lee, M. Makise, H. Takenaka, N. Takahashi, Y. Yamaguchi, T. Tsuchiya and T. Mizushima	395–399

Transcriptional regulation of the human manganese superoxide dismutase gene: the role of specificity protein 1 (Sp1) and activating protein-2 (AP-2)	Y. Xu, S.Porntadavity and D.K. St Clair	401–412
A natural protective mechanism against hyperglycaemia in vascular endothelial and smooth-muscle cells: role of glucose and 12-hydroxyeicosatetraenoic acid	E. Alpert, A. Gruzman, H. Totary, N. Kaiser, R. Reich and S. Sasson	413–422
Measurement of ferrochelatase activity using a novel assay suggests that plastids are the major site of haem biosynthesis in both photosynthetic and non-photosynthetic cells of pea (<i>Pisum sativum</i> L.)	J.E. Cornah, J.M. Roper, D.P. Singh and A.G. Smith	423–432
Interaction of syncollin with GP-2, the major membrane protein of pancreatic zymogen granules, and association with lipid microdomains	I. Kalus, A. Hodel, A. Koch, R. Kleene, J.M. Edwardson and M. Schrader	433–442
Two mutations in troponin I that cause hypertrophic cardiomyopathy have contrasting effects on cardiac muscle contractility	D. Burton, H. Abdulrazzak, A. Knott, K. Elliott, C. Redwood, H. Watkins, S. Marston and C. Ashley	443–452
Biochemical analysis of DnaA protein with mutations in both Arg ³²⁸ and Lys ³⁷²	M. Makise, S. Mima, M. Koterawasa, T. Tsuchiya and T. Mizushima	453–458
Nitric oxide inactivation in brain by a novel O ₂ -dependent mechanism resulting in the formation of nitrate ions	C. Griffiths, B. Yamini, C. Hall and J. Garthwaite	459–464
The mechanism of aggrecan release from cartilage differs with tissue origin and the agent used to stimulate catabolism	R. Sztrolovics, R.J. White, P.J. Roughley and J.S. Mort	465–472
Hyaluronate degradation as an alternative mechanism for proteoglycan release from cartilage during interleukin-1 β -stimulated catabolism	R. Sztrolovics, A.D. Recklies, P.J. Roughley and J.S. Mort	473–479
Identification and characterization of four novel phosphorylation sites (Ser ³¹ , Ser ³²⁵ , Thr ³³⁶ and Thr ³⁶⁶) on LKB1/STK11, the protein kinase mutated in Peutz–Jeghers cancer syndrome	G.P. Sapkota, J. Boudeau, M. Deak, A. Kieloch, N. Morrice and D.R. Alessi	481–490
The unfolded protein response in a dolichyl phosphate mannose-deficient Chinese hamster ovary cell line points out the key role of a demannosylation step in the quality-control mechanism of N-glycoproteins	F. Foulquier, A. Harduin-Lepers, S. Duvet, I. Marchal, A.M. Mir, P. Delannoy, F. Chirat and R. Cacan	491–498
Evidence for the direct interaction between calmodulin and the human epidermal growth factor receptor	H. Li and A. Villalobo	499–505
Dehydroascorbic acid uptake by coronary artery smooth muscle: effect of intracellular acidification	M.E. Holmes, J. Mwanjewe, S.E. Samson, J.V. Haist, J.X. Wilson, S.J. Dixon, M. Karmazyn and A.K. Grover	507–512
