

Research Papers

The role of syndecan-2 in regulation of actin-cytoskeletal organization of Lewis lung carcinoma-derived metastatic clones	S. Munesue, Y. Kusano, K. Oguri, N. Itano, Y. Yoshitomi, H. Nakanishi, I. Yamashina and M. Okayama	201–209
Mitogen-activated protein kinase-dependent and -independent routes control shedding of transmembrane growth factors through multiple secretases	J.C. Montero, L. Yuste, E. Díaz-Rodríguez, A. Esparis-Ogando and A. Pandiella	211–221
Efficient identification of photolabelled amino acid residues by combining immunoaffinity purification with MS: revealing the semotiadil-binding site and its relevance to binding sites for myristates in domain III of human serum albumin	K. Kawahara, A. Kuniyasu, K. Masuda, M. Ishiguro and H. Nakayama	223–232
Actopaxin is phosphorylated during mitosis and is a substrate for cyclin B1/cdc2 kinase	M. Curtis, S.N. Nikolopoulos and C.E. Turner	233–242
Molecular dissection of membrane-transport proteins: mass spectrometry and sequence determination of the galactose–H ⁺ symport protein, GalP, of <i>Escherichia coli</i> and quantitative assay of the incorporation of [<i>ring</i> -2- ¹³ C]histidine and ¹⁵ NH ₃	H. Venter, A.E. Ashcroft, J.N. Keen, P.J.F. Henderson and R.B. Herbert	243–252
Promoter characterization of the novel human matrix metalloproteinase-26 gene: regulation by the T-cell factor-4 implies specific expression of the gene in cancer cells of epithelial origin	G.N. Marchenko, N.D. Marchenko and A.Y. Strongin	253–262
Transcriptional regulation of human 3'-phosphoadenosine 5'-phosphosulphate synthase 2	C. Shimizu, H. Fuda, Y.C. Lee and C.A. Strott	263–271
β 1 and β 2 integrins activate different signalling pathways in monocytes	M. Reyes-Reyes, N. Mora, G. Gonzalez and C. Rosales	273–280
Identification of protein-derived tyrosyl radical in the reaction of cytochrome <i>c</i> and hydrogen peroxide: characterization by ESR spin-trapping, HPLC and MS	S.Y. Qian, Y.-R. Chen, L.J. Deterding, Y.C. Fann, C.F. Chignell, K.B. Tomer and R.P. Mason	281–288
Regulation and recruitment of phosphatidylinositol 4-kinase on immature secretory granules is independent of ADP-ribosylation factor 1	C. Panaretou and S.A. Tooze	289–295
Cloning and expression of two novel pig liver and kidney fatty acid hydroxylases [cytochrome P450 (CYP)4A24 and CYP4A25]	K. Lundell	297–303
Modulation of <i>Mycobacterium tuberculosis</i> DnaA protein–adenine-nucleotide interactions by acidic phospholipids	K. Yamamoto, S. Muniruzzaman, M. Rajagopalan and M.V.V.S. Madiraju	305–311
Folate synthesis in higher-plant mitochondria: coupling between the dihydropterin pyrophosphokinase and the dihydropterolate synthase activities	J.-M. Mouillon, S. Ravanel, R. Douce and F. Rébeillé	313–319
Copper supplementation restores cytochrome <i>c</i> oxidase activity in cultured cells from patients with <i>SCO2</i> mutations	L. Salvati, E. Hernandez-Rosa, W.F. Walker, S. Sacconi, S. DiMauro, E.A. Schon and M.M. Davidson	321–327
The reassembling process of the nonameric <i>Mycobacterium tuberculosis</i> small heat-shock protein Hsp16.3 occurs via a stepwise mechanism	X. Feng, S. Huang, X. Fu, A. Abulimiti and Z. Chang	329–334

Substrate-binding recognition and specificity of trehalose phosphorylase from <i>Schizophyllum commune</i> examined in steady-state kinetic studies with deoxy and deoxyfluoro substrate analogues and inhibitors	C. Eis and B. Nidetzky	335–340
Thermodynamics of the ligandin function of human class Alpha glutathione transferase A1-1: energetics of organic anion ligand binding	Y. Sayed, J.A.T. Hornby M. Lopez and H. Dirr	341–346
Expression in mammalian cell cultures reveals interdependent, but distinct, functions for Star and Rhomboid proteins in the processing of the <i>Drosophila</i> transforming-growth-factor- α homologue Spitz	J.C. Pascall, J.E. Luck and K.D. Brown	347–352
Phenylalanine-24 in the N-terminal region of ammodytoxins is important for both enzymic activity and presynaptic toxicity	T. Petan, I. Križaj, F. Gubenšek and J. Pungerčar	353–358
Activation of rhodopsin kinase	N.E.M. McCarthy and M. Akhtar	359–364
Intracellular trafficking of glycosylphosphatidylinositol (GPI)-anchored proteins and free GPIs in <i>Leishmania mexicana</i>	J.E. Ralton, K.A. Mullin and M.J. McConville	365–375
The <i>Aspergillus niger faeB</i> gene encodes a second feruloyl esterase involved in pectin and xylan degradation and is specifically induced in the presence of aromatic compounds	R.P. de Vries, P.A. vanKuyk, H.C.M. Kester and J. Visser	377–386
Fusion of two distinct peptide exosite inhibitors of Factor VIIa	M. Roberge, M. Peek, D. Kirchhofer, M.S. Dennis and R.A. Lazarus	387–393
Phospholipase C- γ 1 is required for cell survival in oxidative stress by protein kinase C	X.-C. Bai F. Deng, A.-L. Liu, Z.-P. Zou, Y. Wang, Z.-Y. Ke, Q.-S. Ji and S.-Q. Luo	395–401
Probing the serpin structural-transition mechanism in ovalbumin mutant R339T by proteolytic-cleavage kinetics of the reactive-centre loop	Y. Arai and M. Hirose	403–409
A frequent human coagulation Factor VII mutation (A294V, c152) in loop 140s affects the interaction with activators, tissue factor and substrates	R. Toso, M. Pinotti, K.A. High, E.S. Pollak and F. Bernardi	411–416
