- The *Biochemical Journal* (ISSN 0264-6021 for print/online journal; ISSN 1470-8728 for online only journal) is published and distributed by Portland Press Ltd on behalf of the Biochemical Society (the owner), and appears twice monthly.
- **Editorial and publishing offices:** *Biochemical Journal*, 59 Portland Place, London W1B 1QW, U.K.
- **Biochemical Journal**, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
- **Subscriptions department:** Portland Customer Services, P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K.
- All rights reserved. Apart from any fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act, 1988, this publication may be reproduced, stored or transmitted, in any forms or by any means, only with the prior permission in writing of the publishers, or in the case of reprographic reproduction in accordance with the terms of permissions granted by copyright clearing houses such as the Copyright Licensing Agency (U.K.) or the Copyright Clearance Center (U.S.A.). The CCC item-fee code for this publication is 0264-6021/2003/\$30.00 + 0.00. Inquiries concerning reproduction outside those terms should be sent to the publishers at the above-mentioned address.
- Although, at the time of going to press, the information contained in this publication is believed to be correct, neither the authors nor the editors nor the publisher assume any responsibility for any errors or omissions herein contained. Opinions expressed in articles are not necessarily those of the editors, the publisher or the owner.
- Periodicals postage paid at Rahway, NJ, U.S.A.
- **Postmaster:** send address corrections to *Biochemical Journal*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
- **Cover illustration:** Rat insulinoma (RIN) cells were treated with 1 μ M dexamethasone for 7 days, immunostained for the transcription factor C/EBP β (red) and then co-stained with DAPI (blue). For further details, see Shen et al. *Biochem. J.* (2003), **375**, 41–50.

● **General policy** The *Biochemical Journal* publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The *Biochemical Journal* will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in refereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

● **Research Papers** are the normal form of publication, and may be of any length that is

justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the *Biochemical Journal* are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

● **Accelerated Publications (APs)** are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. One colour figure will be published free of charge in APs; subsequent figures will cost £300 each.

● **Reviews** will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one typed page) summary of the area they propose to cover.

● **Procedure for submission** These instructions do not replace the official *Biochemical Journal* Instructions to Authors (<http://www.BiochemJ.org>). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the *Biochemical Journal* contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work'

must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

● **Submit manuscripts online** Authors should submit manuscripts electronically using the Online Submission and Review System available at <http://www.BiochemJ.org/submit/>

● **Immediate Publications** Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

● **Queries and correspondence** Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; e-mail editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, *Biochemical Journal*, 59 Portland Place, London W1B 1QW, U.K. (telephone +44 20 7637 5873; fax +44 20 7323 1136; e-mail editorial@portlandpress.com).

● **Colour figures** The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Subsequent colour figures in the same paper cost £300 each.

● **Multimedia adjuncts** The Biochemical Journal Online is now able to offer authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The *Biochemical Journal* is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2003 volumes 369–376 (three parts each) will appear. The subscription also includes an author and key-word index.

● **Subscription rates** Institutional subscription rates for 2003 are shown below. Subscribers to the *Biochemical Journal* can subscribe additionally to *Biochemical Society Transactions* and *Biotechnology and Applied Biochemistry* on a joint subscription at a reduced rate. Terms are cash with order (US\$ in N. America, £ sterling for rest of the world, or US\$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address below, or through your usual agent.

	N. America	Rest of world	Euro price
One year (8 vols)	US\$2299	£1307	€2223
Print and online	US\$2115	£1202	€2044
Online only	US\$2226	£1271	€2156
Print only	US\$110	£64	€105
Single issues (print only)			

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £56/€95.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

● **Electronic back archive** This is freely available to all users with Internet access.

● **Microfiche and back issues** Volumes 102–336 of the *Biochemical Journal* are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

● **Subscription Department**
Portland Customer Services
P.O. Box 32, Commerce Way
Colchester CO2 8HP, Essex, U.K.
(telephone 01206 796351; fax 01206-799331; e-mail sales@portland-services.com).

● **Advertising** Enquiries about advertising in this journal should be addressed to Mark White or Philip Northcott, PRN Media Sales Ltd., Suite 209, 2nd Floor, Wellington House, Butt Road, Colchester CO3 3DA, U.K.; tel: 01206 767797; fax: 01206 767532; e-mail: sales@prnmediasales.co.uk; ISDN: 01376 562673.

Reviews**Multifaceted roles of β -arrestins in the regulation of seven-membrane-spanning receptor trafficking and signalling**

Mechanism of horseradish peroxidase inactivation by benzhydrazide: a critical evaluation of arylhydrazides as peroxidase inhibitors <i>Published as BJ Immediate Publication 18 July 2003, DOI 10.1042/BJ20021936</i>	S.M. Aitken, M. Ouellet, M.D. Percival and A.M. English	613–621
Eukaryotic translation-initiation factor eIF2 β binds to protein kinase CK2: effects on CK2 α activity <i>Published as BJ Immediate Publication 5 August 2003, DOI 10.1042/BJ20030915</i>	F. Llorens, N. Roher, F.A. Miró, S. Sarno, F.X. Ruiz, F. Meggio, M. Plana, L.A. Pinna and E. Itarte	623–631
Stable dimeric assembly of the second membrane-spanning domain of CFTR (cystic fibrosis transmembrane conductance regulator) reconstitutes a chloride-selective pore <i>Published as BJ Immediate Publication 1 August 2003, DOI 10.1042/BJ20030774</i>	M. Ramjeesingh, F. Ugwu, C. Li, S. Dhani, L.J. Huan, Y. Wang and C.E. Bear	633–641
Calpain cleavage of the B isoform of Ins(1,4,5)P ₃ 3-kinase separates the catalytic domain from the membrane anchoring domain <i>Published as BJ Immediate Publication 7 August 2003, DOI 10.1042/BJ20030505</i>	K. Pattni, T.H. Millard and G. Banting	643–651
Characterization of the lipid-binding domain of the <i>Plasmodium falciparum</i> CTP:phosphocholine cytidyltransferase through synthetic-peptide studies <i>Published as BJ Immediate Publication 5 August 2003, DOI 10.1042/BJ20031011</i>	M.-P. Larvor, R. Cerdan, C. Gumila, L. Maurin, P. Seta, C. Roustan and H. Vial	653–661
Caspase processing activates atypical protein kinase C ζ by relieving autoinhibition and destabilizes the protein <i>Published as BJ Immediate Publication 30 July 2003, DOI 10.1042/BJ20030926</i>	L. Smith, Z. Wang and J.B. Smith	663–671
Site-directed mutagenesis of the active site of diacylglycerol kinase α : calcium and phosphatidylserine stimulate enzyme activity via distinct mechanisms <i>Published as BJ Immediate Publication 8 August 2003, DOI 10.1042/BJ20031052</i>	T. Abe, X. Lu, Y. Jiang, C.E. Boccone, S. Qian, K.M. Vattem, R.C. Wek and J.P. Walsh	673–680
Isolation and characterization of haemoporphin, an abundant haemolymph protein from <i>Aplysia californica</i> <i>Published as BJ Immediate Publication 31 July 2003, DOI 10.1042/BJ20030726</i>	E. Jaenicke, P.J. Walsh and H. Decker	681–688
Characterization of a new p94-like calpain form in human lymphocytes <i>Published as BJ Immediate Publication 25 July 2003, DOI 10.1042/BJ20030706</i>	R. De Tullio, R. Stifanese, F. Salamino, S. Pontremoli and E. Melloni	689–696
Rapid agonist-evoked coupling of type II Ins(1,4,5)P ₃ receptor with human transient receptor potential (hTRPC1) channels in human platelets <i>Published as BJ Immediate Publication 11 August 2003, DOI 10.1042/BJ20030929</i>	S.L. Brownlow and S.O. Sage	697–704
Free fatty acids induce cell differentiation to infective forms in <i>Trypanosoma cruzi</i> <i>Published as BJ Immediate Publication 30 July 2003, DOI 10.1042/BJ20021907</i>	M.J. Wainszelbaum, M.L. Belaunzarán, E.M. Lammel, M. Florin-Christensen, J. Florin-Christensen and E.L.D. Isola	705–712
Co-incident signalling between μ -opioid and M ₃ muscarinic receptors at the level of Ca ²⁺ release from intracellular stores: lack of evidence for Ins(1,4,5)P ₃ receptor sensitization <i>Published as BJ Immediate Publication 25 July 2003, DOI 10.1042/BJ20030508</i>	D.S.K. Samways, W.-h. Li, S.J. Conway, A.B. Holmes, M.D. Bootman and G. Henderson	713–720
Variation of the axial haem ligands and haem-binding motif as a probe of the <i>Escherichia coli</i> c-type cytochrome maturation (Ccm) system <i>Published as BJ Immediate Publication 6 August 2003, DOI 10.1042/BJ20030752</i>	J.W.A. Allen and S.J. Ferguson	721–728

Molecular and structural characterization of NADPH-dependent D-glycerate dehydrogenase from the enteric parasitic protist <i>Entamoeba histolytica</i> <i>Published as BJ Immediate Publication 23 July 2003,</i> <i>DOI 10.1042/BJ20030630</i>	V. Ali, Y. Shigeta and T. Nozaki	729–736
Amoebapores and NK-lysin, members of a class of structurally distinct antimicrobial and cytolytic peptides from protozoa and mammals: a comparative functional analysis <i>Published as BJ Immediate Publication 13 August 2003,</i> <i>DOI 10.1042/BJ20030250</i>	H. Bruhn, B. Riekens, O. Berninghausen and M. Leippe	737–744
Serine acetyltransferase of <i>Escherichia coli</i> : substrate specificity and feedback control by cysteine <i>Published as BJ Immediate Publication 26 August 2003,</i> <i>DOI 10.1042/BJ20030429</i>	V.J. Hindson	745–752
Hyperthyroidism increases the uncoupled ATPase activity and heat production by the sarcoplasmic reticulum Ca ²⁺ -ATPase <i>Published as BJ Immediate Publication 30 July 2003,</i> <i>DOI 10.1042/BJ20031015</i>	A.P. Arruda, W.S. da-Silva, D.P. Carvalho and L. de Meis	753–760
Trafficking of Kv1.4 potassium channels: interdependence of a pore region determinant and a cytoplasmic C-terminal VXXSL determinant in regulating cell-surface trafficking <i>Published as BJ Immediate Publication 6 August 2003,</i> <i>DOI 10.1042/BJ20030885</i>	J. Zhu, I. Watanabe, B. Gomez and W.B. Thornhill	761–768
Allowed N-glycosylation sites on the Kv1.2 potassium channel S1–S2 linker: implications for linker secondary structure and the glycosylation effect on channel function <i>Published as BJ Immediate Publication 11 August 2003,</i> <i>DOI 10.1042/BJ20030517</i>	J. Zhu, I. Watanabe, A. Poholek, M. Koss, B. Gomez, C. Yan, E. Recio-Pinto and W.B. Thornhill	769–775
Interferon- γ regulates nucleoside transport systems in macrophages through signal transduction and activator of transduction factor 1 (STAT1)-dependent and -independent signalling pathways <i>Published as BJ Immediate Publication 18 July 2003,</i> <i>DOI 10.1042/BJ20030260</i>	C. Soler, A. Felipe, J. García-Manteiga, M. Serra, E. Guillén-Gómez, F.J. Casado, C. MacLeod, M. Modolell, M. Pastor-Anglada and A. Celada	777–783
Sulphonation of dehydroepiandrosterone and neurosteroids: molecular cloning, expression, and functional characterization of a novel zebrafish SULT2 cytosolic sulphotransferase <i>Published as BJ Immediate Publication 29 July 2003,</i> <i>DOI 10.1042/BJ20031050</i>	T. Sugahara, Y.-S. Yang, C.-C. Liu, T.G. Pai and M.-C. Liu	785–791
Functional studies of hephaestin in yeast: evidence for multicopper oxidase activity in the endocytic pathway <i>Published as BJ Immediate Publication 18 August 2003,</i> <i>DOI 10.1042/BJ20030866</i>	L. Li, C.D. Vulpe and J. Kaplan	793–798
Regulation of oxidative phosphorylation in different muscles and various experimental conditions <i>Published as BJ Immediate Publication 6 August 2003,</i> <i>DOI 10.1042/BJ20030882</i>	B. Korzeniewski	799–804
Modulation of NAADP (nicotinic acid-adenine dinucleotide phosphate) receptors by K ⁺ ions: evidence for multiple NAADP receptor conformations <i>Published as BJ Immediate Publication 13 August 2003,</i> <i>DOI 10.1042/BJ20030672</i>	G.D. Dickinson and S. Patel	805–812
